MUTUAL LIFE ASSURANCE

SCOTTISH PROVIDENT INSTITUTION.

ESTABLISHED
1837.

INCORPORATED
1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

ITS DISTINCTIVE SYSTEM of **whole Life Assurance** offers to Members the advantage of **with profit** rates which differ but little from the non-profit rates usually charged.

Premiums for **£100** payable at Death (with right to share in Surplus).

Age next Birthday.	25	30	35	40	45	50	55
During Life	£1 17 5	£2 2 4	£2 8 6	£2 16 6	£3 8 2	£4 3 2	£5 2 3
25 Payments	2 9 8	2 13 11	2 19 3	3 5 11	3 15 11	4 8 8	5 5 8

The **whole Surplus** goes to the Policy-holders on a system at once safe and equitable —no share being given to those by whose early death there is a **loss** to the Common Fund.

Endowment Assurance.

SPECIAL CLASS WITH SEPARATE FUND.

Policy-holders in this Class share exclusively in the whole Surplus thereof, and Bonuses are allotted on the compound system.

Annuities.

RATES MAY BE HAD ON APPLICATION.

FUNDS EXCEED £16,000,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON: 3, LOMBARD STREET, E.C. 3; WEST END: 17, Pall Mall, S.W. 1.

Subscribers to WHITAKER during the last 29 years will have noticed a marked rise in my quotations, approximately given, in last year's issue. In the present number no prices at all are given; this is owing to the phenomenal advance during the past year. In the public prints it has been shown that woollens have trebled in value since 1914. Many of my standard cloths advertised for 30-40 years are unobtainable at any price, through Government control of mills. In the rough schedule below is enumerated certain classes of which we have still an abundant supply. There is no immediate prospect of a decrease in price, owing to the serious shortage of wool, labour conditions, and the requirements of the foreign market. Our customers may be assured that their interests will be protected when a fall does take place. Meanwhile we shall be careful to maintain our reputation for supplying only genuine British all-wool textiles.

W. B.

SYNOPSIS OF STOCK:

HOMESPUNS, Irish and Scotch, from Tipperary, Connemara, Kerry, Donegal, and Cork; Harris, Lewis, Shetland, and St. Kilda.

SCOTCH CHEVIOTS from various districts, for warm rough Suits and Overcoats.

IRISH TWEEDS. Suitings for strong hard country wear.

IRISH FRIEZES for heavy great coats.

DUFFLE FRIEZES for warm, soft, woolly overcoats.

Dyed and natural cream peasant-made **HOMESPUNS.**

Durable and useful **TWEEDS** for ordinary town wear.

WORSTED SUITINGS, various weights, for business or professional wear.

SERGES, Navy and Black, rough and smooth, summer and winter weights.

GREY SUITINGS, in different classes of wool, and all weights.

CASHMERE SUITINGS for tropical and semi-tropical wear.

COSTUME TWEEDS for ladies' country and town wear.

FLANNEL TWEEDS for light Summer Suitings, &c.

OVERCOATINGS, light, medium, and heavy.

Pattern applications attended to in order of receipt, and subject to a definite idea being given of requirements, limit of price, purpose, and quantity.

A visit to the warehouse is recommended whenever possible—to view the extent of the stock, to examine the cloths in the piece, to compare values, and make a judicious selection.

SHIPPERS, the TRADE, and PUBLIC supplied at prices regulated by conditions. Important FOREIGN orders are under the special care of the principal.

Telephone: 8303 Gerrard.

AN

Almanack

For the Year of Our Lord

1919

BY

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

ASTRONOMICAL AND OTHER PHENOMENA

A vast Amount of INFORMATION respecting the
GOVERNMENT, FINANCES, POPULATION,
COMMERCE, and GENERAL STATISTICS of
the various Nations of

The World

with special reference to

The British Empire

and

The United States

LONDON

OFFICE: 12, WARWICK LANE.

PATERNOSTER ROW

PRICE SIX SHILLINGS NET

Ref. AY 754 WS 1919
NOTE.—WHITAKER'S ALMANACK is supplied to the Trade on the distinct understanding that it will not be sold to the Public at less than the published price.

PREFACE TO THE 1ST ANNUAL VOLUME.

(1919.)

FIVE Almanacks ago—at the end of 1914—we wrote in the Preface, "Now that the Gates of Janus' Temple have been flung asunder, he would be a wise man who foretold their closing." Few, if any, of our subscribers could then have anticipated a more than four years' war, or could have conceived the barbarisms which gradually emerged from the contemporary records of the Teutonic invasions in the various theatres of war. The Country settled down finally to the conviction that nothing short of complete and absolute victory was essential to the salvation of the world from a brutal tyranny, and the Armistice of last November came almost too suddenly to be credible. The Continent is now in the melting-pot, and we have to await the results of the Peace Conference for a final solution of its destinies.

The resulting conditions of commerce have necessitated a further increase in the price of the Almanack. This, it is hoped, with some measure of confidence, may be only a temporary expedient, though it is doubtful if the cheap rate maintained for so many years will be again achieved.

Publication has this year been postponed in order that the results of the recent Parliamentary election might be included, and this has enabled corrections to be made to a later date than is usually possible. Many difficulties have had to be faced owing to the holding back or suppression of Government information, but every effort has been made to ensure the general accuracy which has so long been the distinguishing characteristic of this publication.

Owing to the interruption of communications, a considerable amount of material from the outlying Dominions and the more distant countries arrived too late for incorporation in the present volume, but it is hoped that the edition may be found as complete in information as any of its predecessors.

A double-page map, illustrating the racial divisions of Europe, and one of Mesopotamia, have been inserted. The list of D.S.O.'s now extends to nearly thirty pages. Several articles on War and Labour problems have been included. Others deal with decimal coinage, Imperial Preference, the proposed Channel Tunnel, and Transporting the Americans. A list of Places of Interest to Americans in London should prove useful to our guests from the other side of the Atlantic, while the article on Naval Operations, to the end of October last, and Losses by Submarine Warfare will be read with special interest. The British Empire section has also again been included.

Our correspondence has this year been more extensive, and the suggestions offered as useful as ever. Shortage of staff and increased pressure of work have made it impossible for the Editor to send a personal reply in every instance, but all have been valued and considered, and in many instances our pages will testify that they have been adopted. Such correspondence is valued most highly, and it is hoped that a continuation of such help may be provided in the compilation of further issues.

* War Cabinet	

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 12th to the 18th of Jan. 1919, there is moonlight from 6 P.M. till 6 A.M., but from the 27th to the 31st it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

 Six to 9 6 to 12 6 to 3 6 to 6: Nine to 12 9 to 3 9 to 6: Twelve to 3 12 to 6: Three to 6:

WHITAKER'S ALMANACK, 1919.

BEING THE THIRD YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 9 AND 10 OF KING GEORGE V.

Mean Longitude of Moon's Ascending Node, January 1, 251° 40' 13".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 6h. 2m. morn. Civil twilight ends, 5h. 3m. aft. Night begins, 6h. 5m. aft. The length of the Day from Sunrise to Sunset is 7h. 52m.

The ending of Civil twilight is here defined as the time when the Sun's centre is 5° below the horizon. Night begins and Day breaks when it is 18° below.

Jan. 2. Jupiter in Opposition, 5h. morn. Distance from Earth, 389,800,000 miles.

Jan. 3. 8h. morn. Earth at least distance from the Sun—91,345,000 miles. Perihelion.

Jan. 5. Mean time of Sun's semidiameter crossing the meridian, 2m. 10 78.

Jan. 12. aft. Occultation of γ and δ Tauri, and of Piazzii IV. 8a; magnitudes 5.6, 5.2, and 5.8 respectively. See p. 80.

Jan. 13. aft. Occultation of η Tauri and δ Tauri; magnitudes 5.1 and 4.8 respectively. See p. 80.

Jan. 14. aft. Jupiter's Satellite IV. in eclipse. See p. 79.

Jan. 14. Jupiter in conjunction with γ , 6h. 50m. aft. $12^{\circ} 24'$ N.

Jan. 17. morn. Occultation of α Cancri; magnitude 5.9. See p. 80.

Jan. 18. Saturn in conjunction with γ , 10h. 27m. aft. $12^{\circ} 50'$ N.

Jan. 28. Neptune in Opposition, 10h. aft. Distance from Earth, 2,700,000,000 miles.

In this month the Mornings increase 25m., the Afternoons 45m. Venus is just past Full in January. Fraction of disc illuminated, .988 to .962. Neptune rises Jan. 1, 6h. 2am. aft.; Jan. 31, 4h. 20m. aft.

Constellations near the South meridian at 10 p.m.: Perseus, Taurus, Eridanus, Auriga, Orion, Gemini, Canis Minor, Canis Major.

Note.—The arrangement of the Table of Moonrising, southing, and setting on this page differs from that of the similar Tables in former issues of this Almanack. The times in the second column are those of Moonrise on the day of the month shown by the adjacent figure in the first column, morning or afternoon hours being indicated respectively by the letters M or A. The figures in the third and fourth columns show the time of the southing and of the setting which next follow that rising, and these sometimes happen after midnight of the day indicated. In such cases the figures are in heavy type. It is therefore to be remembered, in using this Table, that these distinctive figures always indicate a time on the

Day of

Time of High Water at the undermentioned Places—

MERCURY is a morning star. To be seen in the dawn in the first week of the month, S.E. by E.
 VENUS is an evening star, but sets early. It is in the constellation Sagittarius, and in Capricornus later. To be seen in the twilight, S.W. Magnitude, -3.4.
 MARS is in the same part of the sky as Venus, the latter being to the right.

JUPITER is visible from sunset to sunrise. High in the sky at midnight in the constellation Gemini, it forms a long triangle with Castor and Pollux. Magnitude, -2.3 at Opposition (Jan. 2).

SATURN is in the constellation Leo, above and preceding the star Regulus (Mag. 1.3). Rises in the early evening, E.N.E. Magnitude, +0.5 to +0.3, and therefore brighter than the star.

morning of the day of its rise. It is stated in the heading whether the first entries in the column are morning or afternoon hours. The introduction of the heavy type figures signifies a change from afternoon to morning hours, and *alt.* is inserted when the change is from morning to afternoon hours. To one day in each lunation there are necessarily no entries, but there are no omissions. On the lines immediately following that with no entry the times given for moonrise are in the early morning of the day to which they are assigned. A similar system is followed in the Tables of Rising, Southing, and Setting of the Planets on this page.

APPARENT RIGHT ASCENSION AND DECLINATION OF POLARS.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5^h. 45^m. morn. Civil twilight ends at 5^h. 44^m. aft. Night begins, 6^h. 43^m. The length of the Day is 9^h. 4^m.

Feb. 2. Mars in conjunction with ♃, 8^h. 9^m. aft. δ 6° 28' 8".

Feb. 4. aft. Jupiter's Satellite III. in eclipse. See p. 79.

Feb. 5. Mean time taken by Sun's semidiameter to cross the meridian, 1^m. 77^s.

Feb. 9. Occultation of 53 Tauri, α Tauri, and 105 Tauri; magnitudes 5'3, 4'7, and 6'0 respectively. See p. 80.

Feb. 10. Jupiter in conjunction with ♃, 9^h. 14^m. aft. ♃ 2° 20' N.

Feb. 12. Jupiter's Satellite III. in eclipse. See p. 79.

Feb. 12. aft. Occultation of Piazzi VII. 261 and 5 Cancri; magnitudes 6'0 and 5'9 respectively. See p. 80.

Feb. 13. Venus in conjunction with Mars, 1^h. 38^m. aft. ♀ 0° 35' S.

Feb. 13. aft. Occultation of α Cancri; magnitude 4'3. See p. 80.

Feb. 14. Saturn in Opposition, 2^h. aft. Distance from Earth, 764,100,000 miles.

Feb. 14. morn. Occultation of κ Cancri; magnitude 5'1. See p. 80.

Feb. 15. Saturn in conjunction with ♃, 3^h. 2^m. morn. ♃ 6° 45' N.

Feb. 17. morn. Jupiter's Satellite IV. in eclipse. See p. 79.

Feb. 17. morn. Occultation of ε Leonis; magnitude 5'1. See p. 80.

Feb. 23. 9^h. aft. Mercury in Superior Conjunction.

The disc of Venus is nearly full. Fraction of diameter illuminated, 0'961 to 0'923.

Neptune rises Feb. 1, 4^h. 16^m. aft.; Feb. 28, 2^h. 25^m. aft.

The Zodiacal light may be observed in the evenings of the latter part of this month, the Moon being absent.

In this month the Mornings increase 50^m, and the Afternoons 49^m.

Constellations near the S. meridian at 10 p.m.: Auriga, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argo, Cancer, Hydra.

The Opposition of Saturn.—Last year Saturn was in Opposition on Jan. 31, and the planet was in Cancer. This year Opposition is a fortnight later, and Saturn will be in the constellation Leo, East of last year's position. This happens because Saturn has moved a

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star at the beginning of the month, and an evening star at the end. In both cases, too near to the Sun to be seen by the unaided eye.

♀ VENUS is an evening star, and passes through Aquarius into Pisces. It remains above the horizon for about two hours after sunset, in the S.W. to W. Magnitude, -3.3.

♂ MARS will be to the right of Venus, and below, after their conjunction on the 13th. It moves slowly westward among the stars.

♃ JUPITER is brilliant and high in the S.E. sky at sunset, remaining visible until early morning. It moves slowly westward among the stars.

♄ SATURN is moving westward from Regulus. It rises about sunset and sets at sunrise. Its Magnitude at Opposition on Feb. 14 is +0.2.

short distance in its orbit round the Sun in the interval, and some-
what more than a year must elapse before the Earth is again in
line with the Sun and the planet. Because its orbit is not a circle,
a planet is not at precisely the same distance from the Sun at all
Oppositions, nor is it at equal distances from the Earth; but in the
case of Saturn these variations are not sufficient to make a very
appreciable difference in the brightness of the planet, which is as
much or more affected by the variation of phase of the ring-system,
at different Oppositions. The present is not a bright Opposition, as
the period is approaching when the edge of the rings will be pre-
sented to the Earth and they will be invisible.

Mean Longitude of Moon's Ascending Node, March 1, 248° 33' 1".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 56m. morn. Civil twilight ends at 6h. 31m. aft. Night begins, 7h. 29m. The length of the Day is 10h. 47m.

Mar. 2, 4h. aft. Jupiter at a stationary point.

Mar. 3. Mercury in conjunction with ♄, 3h. 4m. morn. ♄ 6° 37' S.

Mar. 3. Mars in conjunction with ♄, 6h. 28m. aft. ♄ 5° 51' S.

Mar. 4. Venus in conjunction with ♄, 8h. 46m. morn. ♄ 5° 43' S.

Mar. 5. Mean time taken by Sun's semidiameter to cross the meridian, 1m. 5' 0s.

Mar. 5. aft. Jupiter's Satellite IV. in eclipse. See p. 79.

Mar. 6. aft. Occultation of 45 Arietis and ρ Arietis; magnitudes 6' 0 and 5' 6. See p. 80.

Mar. 10. Jupiter in conjunction with ♄, 11h. 46m. morn. ♄ 2° 35' N.

Mar. 11. Mercury and Venus in conjunction, 6h. 39m. aft. ♄ 0° 59' N.

Mar. 12. Occultation of ι Cancri (morn.) and Λ Cancri (aft.); magnitudes 6' 0 and 5' 5 respectively. See p. 80.

Mar. 12. Jupiter's Satellite III. in eclipse. See p. 79.

Mar. 13. aft. Occultation of ω Leonis; magnitude 5' 5. See p. 80.

Mar. 14. Saturn in conjunction with ♄, 5h. 54m. morn. ♄ 6° 47' N.

Mar. 15. Occultation of ρ^3 Leonis; magnitude 6' 1. See p. 80.

Mar. 19. aft. Jupiter's Satellite III. in eclipse. See p. 79.

Mar. 21. Mercury at greatest elongation (18° 35') East.

Mar. 21. Sun enters the sign Aries (Spring Equinox), 4h. 19m. aft.

Mar. 22. aft. Jupiter's Satellite IV. in eclipse. See p. 79.

Mar. 25. Occultation of Bradley 2332; magnitude 5' 7. See p. 80.

Mar. 29, 5h. morn. Mercury stationary.

Neptune rises Mar. 1, 2h. 21m. aft.; Mar. 31, 12h. 21m. aft.

The Zodiacal light may be seen after dark in this month when the Moon is absent.

In this month the Mornings increase 6m.; the Afternoons 5m.

Constellations near the S. meridian at 10 p.m.: Gemini, Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

The Planet Mercury. — This planet, whose mean distance from the Sun is only about 36 million miles, is never very far from the Sun as seen in the sky, and hence is rarely visible by the unaided

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, and moves from the constellation Aquarius into Pisces. It will be due west, at altitude 6°, about 7 o'clock in the middle of the month, and at 6 o'clock (altitude 14°) at the end.

♀ VENUS is in Pisces until the 21st, when it passes into Aries. Its duration in the evening sky is lengthening. Sets due W. at the beginning of the month, W.N.W. at the end. Magnitude, - 3.4.

♂ MARS is also in Pisces, to the right of Venus, in a region devoid of bright stars. It sets in the twilight near the W. point.

♃ JUPITER still forms a configuration with Castor and Pollux, and is visible in the western half of the sky from twilight until after midnight. Magnitude, - 2.0 to - 1.8.

♄ SATURN, still in Leo, is well above the south-eastern horizon at sunset.

eye. There are, however, good opportunities of seeing it as an evening star at the time of Eastern elongation in Spring, such as will occur on the 21st of this month. The opportunity this year is not quite so favourable as some have been, but observers, by persistent watching, have succeeded in seeing the planet ten or twelve times at the same elongation. It is advisable to search on evenings before elongation rather than after. The appearance of Mercury is uncertain, but it may be considered to be at least as bright as a first magnitude star. There will be an opportunity of seeing Mercury as a morning star after the Western elongation on Sept. 1.

Configurations of Jupiter's Satellites at 9h. 30m. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 39m. morn. Civil twilight ends at 7h. 25m. aft. Night begins, 8h. 29m. The length of the Day is 12h. 50m.

Apr. 3. Venus in conjunction with ♃, 2h. 3m. morn. ♀ 1° 36' S. Apr. 4, aft. Occultation of W.B. (a) IV. 650; magnitude 5.8. See p. 80.

Apr. 5. Mean time taken by Sun's semidiameter to cross the meridian, 1m. 4.4s.

Apr. 5, aft. Occultation of ♄ Tauri; magnitude 3.0. See p. 80.

Apr. 6. Jupiter in conjunction with ♃, 9h. 5m. aft. ♃ 3° 0' N.

Apr. 8, morn. Mercury in Inferior Conjunction.

Apr. 10. Saturn in conjunction with ♃, 9h. 11m. morn. ♄ 6° 54' N.

Apr. 11. Occultation of 19 Sextantis (morn.) and of 55 Leonis (aft.); magnitudes 5.9 and 6.1 respectively. See p. 80.

Apr. 18. Occultation of B. D. — 20° 425; magnitude 5.9. See p. 80.

Apr. 20, 5h. aft. Mercury stationary.

Apr. 24, 2h. morn. Saturn stationary.

Apr. 24, aft. Jupiter's Satellite III. in eclipse. See p. 79.

Apr. 30. Mars in conjunction with ♃, 10h. 25m. morn. ♂ 2° 12' S.

The disc of Venus is gibbous. Fraction of diameter illuminated, 0.857 to 0.774.

Neptune sets Apr. 1, 3h. 47m. morn.; Apr. 30, 1h. 52m. morn.

The Zodiacal light may be seen after 8h. 30m. in the evenings of this month when the Moon is absent.

In this month the Mornings increase 1h. 2m., the Afternoons 48m.

Constellations near the South meridian at 10 p.m.: Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

Twilight.—The illumination of the sky which begins before sunrise and continues after sunset is caused by the reflection of light to the observer from the upper regions of the Earth's atmosphere. It is not certain whether this reflection is due to such things as minute crystals of ice and salt, particles of dust and infinitesimal drops of water, or whether the pure gases themselves have some power of

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

MORNING AND EVENING STARS.

- ☿ MERCURY rapidly ceases to be an evening star (see last month), and sets before sunset after the 8th.
- ♀ VENUS, still an evening star, passes into Taurus, and will be in the region between Aldebaran and the Pleiades about the middle of the month. Due west about 7 o'clock, at altitude 20° or 30°. Magnitude, - 3.4 to - 3.5.
- ♂ MARS lingers in the evening sky for less than an hour after sunset. Sets W.N.W., but will scarcely be visible.
- ♃ JUPITER, in Gemini, is now west of the meridian at sunset. Magnitude, - 1.8 to - 1.6.
- ♄ SATURN is east of the meridian at sunset. Magnitude, + 0.4 to + 0.6. The three bright planets will be equally spaced across the western sky from Taurus to Leo in mid-evening.

reflection. The latter is probable. The duration of twilight is also uncertain. It depends on the angular quantity by which the Sun is depressed below the horizon, but it is also modified by the serenity of the air and other circumstances. The curve which forms the separation between the zone directly illuminated by the Sun and that which is illuminated by reflection after sunset is called the Crepuscular or Twilight Bow. The moment when this bow in traversing the heavens from East to West passes through the zenith is said to be the end of Civil twilight, and it is at this time that stars begin to be visible.

APPARENT RIGHT ASCENSION AND DECLINATION OF POLARIS.

AVERAGE RAINFALL IN MAY,

in the 63 years, 1841-1903, was 1.922 inches in 12.3 days.

The time used in these pages is Greenwich Mean Time, except for lighting-up time on the opposite page *et seq.* To convert G.M.T. into Summer Time, or the time used for general purposes in some months of the year according to Act of Parliament, 1 hour must be added.

MONTHLY NOTES.

May 1. Holiday at London Stock Exchange.
6. 9 George V. ends. 7. 10 George V. begins.
ENGLISH QUARTER DAYS.—These are Lady Day, March 25; Midsummer, June 24; Michaelmas, Sept. 29; and Christmas, Dec. 25.

Mean Longitude of Moon's Ascending Node, May 1, 245° 20' 1".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 5m. morn. Civil twilight ends at 8h. 23m. aft. Night begins, 9h. 49m. The length of the Day is 14h. 44m.

May 1-2, aft. Jupiter's Satellite III. in eclipse. See p. 79.

May 2. Venus in conjunction with ☿, 8h. 16m. aft. ♀ 3° 5' N.

May 4. Jupiter in conjunction with ☿, 11h. 43m. morn. ♃ 3° 29' N.

May 5, aft. Occultation of B. F. 1146; magnitude 6.1. See p. 80.

May 5. Mean time taken by Sun's semidiameter to cross the meridian, 17m. 6.1s.

May 6, 7h. morn. Mercury at greatest elongation (26° 36') West.

May 7. Saturn in conjunction with ☿, 3h. 16m. aft. ♀ 7° 0' N.

May 9. Mars in Conjunction.

May 9. Jupiter's Satellite III. in eclipse. See p. 79.

May 10, morn. Occultation of e Leonis; magnitude 5.1. See p. 80.

May 11. Jupiter's Satellite IV. in eclipse. See p. 79.

May 25, 11h. 11m. aft. Venus and Jupiter in conjunction. ♀ 2° 7' N.

May 28. Mercury in conjunction with ☿, 11h. 36m. morn. ♀ 2° 50' S.

May 29. Mars in conjunction with ☿, 5h. 3m. morn. ♂ 0° 1' N.

May 29. Total Eclipse of the Sun, invisible at Greenwich. See p. 79.

The disc of Venus is gibbous. Fraction of diameter illuminated, 0.771 to 0.659.

Neptune sets May 1, 1h. 48m. morn.; May 31, 11h. 48m. aft.

In this month the Mornings increase 44m., and the Afternoons 44m.

Constellations near the S. meridian at 10 p.m.: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

Stellar Magnitude.—It is obvious that the stars as we see them are of varying brightness. The variation may occur either because the stars are actually of different intrinsic luminosity, or it may be because they are at different distances from us. Apart from any consideration of such reasons, the stars are classed according to their apparent magnitude. The brightest stars are said to be of the first magnitude, those just visible to the unaided eye on a fine night are of the sixth magnitude, and others are in classes

MORNING AND EVENING STARS.

- ☿ MERCURY rises shortly before the Sun E. by N. ; N.E. by E. at the end of the month.
 ♀ VENUS is growing brighter, and sets at its latest this month. It moves out of Taurus into Gemini, and will form a brilliant group with Jupiter and the twin stars in the last week of the month. Magnitude, - 3.5 to - 3.7.
 ♂ MARS, in conjunction with the Sun on the 9th, is neither morning nor evening star.
 ♃ JUPITER continues to be a bright object in the western sky throughout the evening. Sets in the N.W. by W. Magnitude, - 1.6 to - 1.5.
 ♄ SATURN is W. of the meridian at sunset, a short distance to the right of Regulus. Sets W.N.W. Magnitude, + 0.6 to + 0.8.

numerically between these. On this principle an accurate system of photometry has been devised. Naturally all stars in a class are not precisely equal. Regulus, magnitude + 1.3, and Capella, + 0.2, are both first magnitude stars, colloquially. The photometric scale has been extended so that there are stars of magnitude 0 and even of negative magnitude ; Sirius, the brightest star in the sky, being - 1.6. The varying magnitude of the planets given in these pages, which is frequently negative, is computed in accordance with this system, by the use of formulae derived from comparison of the brightness of the planets with that of the bright stars.

Configurations of Jupiter's Satellites at 8h. 30m. P.M.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 9h. 21m. aft. There is no closed night in this month in the latitude of London. The length of the Day on June 1 is 16h. 13m.

June 1. Venus in conjunction with ♄, 5h. 38m. aft. ♀ 6° 32' N.

June 2, aft. Occultation of A² Cancer; magnitude 5.7. See p. 80.

June 4. Saturn in conjunction with ♄, 1h. 17m. morn. ♄ 7° 2' N.

June 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 8.4s.

June 6, oh. 29m. morn. Mercury and Mars in conjunction. ♄ 0° 21' S.

June 11, 2h. aft. Mercury in Superior Conjunction.

June 14, aft. Occultation of Bradley 2335; magnitude 5.9. See p. 80.

June 22, 11h. 54m. morn. Sun enters the sign Cancer (Summer Solstice).

June 26. Mars in conjunction with ♄, 11h. 14m. aft. ♄ 2° 7' N.

June 27. Mercury and Jupiter in conjunction, 6h. 50m. morn. ♀ 1° 38' N.

June 29. Jupiter in conjunction with ♄, 2h. 44m. morn. ♄ 4° 20' N.

June 29. Mercury in conjunction with ♄, 8h. 31m. morn. ♄ 6° 6' N.

In this month the Mornings increase 7¹/₂ m. up to the 18th, and then decrease 3¹/₂ m. The Afternoons increase 15m. up to the 26th, and then decrease slightly.

Venus is nearly at half phase at the end of the month. Fraction of disc illuminated, 0.655 to 0.518.

Uranus rises June 1, oh. 38m. morn.; June 30, 10h. 40m. aft.

Neptune sets June 1, 11h. 44m. aft.; June 30, 9h. 52m. aft.

Constellations near the S. meridian at midnight: Corona, Hercules, Ophiuchus, Serpens, Scorpius, Lyra, Aquila, Sagittarius.

The Longest Day. — Though there is but slight difference in the length of the interval between sunrise and sunset on the days about June 21, there is in general one of these days which is a few seconds longer than any other. This is the day on which the Summer Solstice falls, and at the end of a century is June 20 or 21, whilst at the beginning it is a day later, and June 21 or 22 is the longest day. The reason for this difference in date may be briefly stated. Because the Tropical year is not an integral number of days, the solstice falls later in the calendar year by year by six hours, nearly. It is not permitted to be very late because the intercalation of the extra day in leap year brings

MORNING AND EVENING STARS.

☿ MERCURY is a morning star in the first part of the month, and an evening star at the end. It sets nearly N.W.

♀ VENUS now sets earlier night by night, but is still a bright object in the evening sky. It travels towards Saturn and Regulus. Magnitude, - 3'7 to - 3'9.

♂ MARS may be considered a morning star, as it rises in the dawn, N.E. by E.

♃ JUPITER will be seen in the west in the twilight, and sets N.W. by W. Magnitude, - 1'4.

♄ SATURN is joined by Venus at the end of the month, when these two planets will be in a short line with Regulus, Venus being much the brightest. Magnitude of Saturn, + 0'8.

it back one whole day. This whole day is too much, because the solstice is later yearly by *not quite* 6 hours, and hence, on the whole, it falls earlier in the calendar as the century progresses, and the dates of the longest day at the beginning and end are as stated. Next year (1920) the date will be June 21.

This acceleration of the date in the century is corrected by the omission of the intercalary day in the centennial year, which puts the date a day forward. This, however, does more than is necessary, and a further compensation is made by making the fourth centennial year a leap year.

Because Jupiter is near the Sun, the Satellites will not be visible from the middle of June to the middle of August. In this column the sign ♃ denotes that a Satellite is on the disc of Jupiter, and a black circle ● that it is either behind the disc or in the shadow of Jupiter.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends at *gh. 40m. aft.* In this month there is no closed night at Greenwich till after the 20th, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is *16h. 30m.*

July 1. Venus in conjunction with ♃, *12h. 26m. aft.* ♀ 6° 53' N.

July 1. Saturn in conjunction with ♃, *2h. 36m. aft.* ♄ 6° 58' N.

July 2. Venus and Saturn in conjunction, *gh. 4m. aft.* ♀ 0° 10' S.

July 3, 10h. morn. The Earth at maximum distance from the Sun—94,450,000 miles. Aphelion.

July 5, 7h. morn. Venus at greatest elongation (45° 28') East.

July 5. Mean time taken for Sun's semidiameter to cross the meridian, *1m. 8 4s.*

July 15, aft. Occultation of c¹ and c² Capricorni; magnitudes 5³ and 6³. See p. 80.

July 16, aft. Occultation of κ Aquarii; magnitude 5². See p. 80.

July 15, morn. Occultation of 16 Piscium; magnitude 5⁷. See p. 80.

July 18, 6h. aft. Mercury at greatest elongation (26° 47') East.

July 21, 2h. morn. Jupiter in Conjunction.

July 23, morn. Occultation of α Tauri; magnitude 4⁸. See p. 80.

July 25. Mars in conjunction with ♃, *5h. 2m. aft.* ♂ 4° 0' N.

July 29. Mercury in conjunction with ♃, *3h. 6m. morn.* ☿ 2° 14' N.

July 29. Saturn in conjunction with ♃, *3h. 36m. morn.* ♄ 6° 53' N.

July 30. Venus in conjunction with ♃, *5h. 0m. aft.* ♀ 3° 7' N.

Uranus rises July 1, *10h. 36m. aft.*; July 31, *8h. 36m. aft.*

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34m., and the Afternoons 29m.

Constellations near the S. meridian at midnight: Heracles, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

Venus at Greatest Brilliance.—Venus will be very bright in the early days of August as an evening star, and again in the middle of October in the dawn. Similar epochs of special brilliancy occurred in January and March of last year, 1918. This periodic maximum

MORNING AND EVENING STARS.

☿ MERCURY is an evening star throughout July. Sets N.W. by W. at the beginning, and W. by N. at the end of the month. It passes from Cancer into Leo.

♀ VENUS, in Leo, is approaching greatest brilliancy, and will be 20° above the west horizon at sunset, with Saturn and Regulus quite near at the beginning of the month. It makes close conjunction with Saturn on the 2nd. Sets in the W.N.W. early in July, in W. at end. Magnitude, -3.9 to -4.2.

♂ MARS is a morning star, and moves from Taurus into Gemini.

♃ JUPITER, in Conjunction on the 21st, is neither an evening nor a morning star.

♄ SATURN is leaving the evening sky. Magnitude, +0.9. (See Venus, above.)

brightness happens when the planet is near the Earth (distant 38 or 39 million miles). At inferior conjunction on September 13 she will be nearer by several million miles, but will be invisible, since her unilluminated hemisphere will be presented to us. In August and October only a part of the illuminated surface will be seen, like the crescent Moon; but, as the planet is near, the largeness and brightness of the disc compensate for the small fraction of it seen illuminated. Hence the appearance noted. Venus may sometimes be seen even when near inferior conjunction if she is higher in the sky than the Sun, and so rises earlier and sets later. But this is not an occasion of that kind.

Mean Longitude of Moon's Ascending Node, August 1, 240° 30' 1".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1h. 31m. morn. Civil twilight ends at 8h. 57m. aft. Night begins, 10h. 43m. The length of the Day is 15h. 24m.

Aug. 2. 10h. morn. Neptune in conjunction.

Aug. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 6' 18".

Aug. 8. morn. Venus at greatest brilliancy.

Aug. 15. 1h. aft. Mercury in inferior conjunction.

Aug. 20. Venus at a stationary point.

Aug. 21. morn. Occultation of γ^2 Orionis; magnitude 4'7. See p. 80.

Aug. 23. Mars in conjunction with γ , 10h. 15m. morn. $\delta 5^\circ 32' N$.

Aug. 23. Jupiter in conjunction with γ , 6h. 17m. aft. $\gamma 5^\circ 5' N$.

Aug. 23. Uranus in Opposition. Distance, 1,767,000,000 miles.

Aug. 24. Mercury in conjunction with γ , 2h. 29m. aft. $\gamma 2^\circ 28' N$.

Aug. 25. Saturn in conjunction with γ , 8h. 38m. aft. $\gamma 6^\circ 51' N$.

Aug. 25. midnight. Saturn in Conjunction.

Aug. 27. Venus in conjunction with γ , 12h. 34m. aft. $\gamma 2^\circ 47' S$.

Uranus rises Aug. 1, 8h. 32m. aft.; Aug. 31, 6h. 32m. aft.

Meteors of the Perseid stream are expected during this month: the nights of most abundance are from the 10th to the 14th. See p. 89.

In this month the Mornings decrease 47m., and the Afternoons 59m.

Constellations near the S. meridian at 10 p.m. are those which were in that position at midnight in July: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

Bright Variable Stars.—Among the stars whose brightness changes (see p. 91) there are a few whose variability may be detected by the unaided eye. Among these are Algol, Betelgeuse, and Mira Ceti, which represent three different types. Algol is a star whose variation is regular and of short period. The variation of Betelgeuse, the star in the north of Orion and the second brightest in the constellation, is irregular and unpredictable. The star α Ceti, known also as Mira Ceti, is a variable of the Long Period class, and is the first star whose brightness was ob-

MORNING AND EVENING STARS.

☿ MERCURY sets nearly with the Sun in the first part of the month, and rises in the dawn at the end.
 ♀ VENUS is at greatest brilliancy on the 8th, and will be in the south-west at sunset. It becomes fainter, and sets earlier rapidly as the month proceeds. Magnitude, -4.2 on August 7.
 ♂ MARS is a morning star, in Gemini, in the first part of the month, rising in the N.E. nearly with Pollux, to the right of the star. At the end of the month it is in Cancer, and rises N.E. by E.
 ♃ JUPITER, in Cancer, now rises in the dawn, N.E. by E. Magnitude, -1.4.
 ♄ SATURN, in Conjunction on the 25th, is above the horizon almost wholly in daylight hours.

observed to change, the variability having been discovered by Fabricius in 1596. Mira Ceti is sometimes as bright as the second magnitude, but fades away for two or three months until invisible to the naked eye, and then falls still further to magnitude 8 or 9, when it begins to recover its light. The mean period, or interval from maximum to maximum, is said to be 332 days, but both the length of the period and the limits of magnitude are subject to great variation. Maximum in 1919 is predicted for the middle or end of August, when the star will rise about an hour before midnight.

Mean Longitude of Moon's Ascending Node, September 1, 238° 49' m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 6m. morn. Civil twilight ends at 7h. 45m. aft. Night begins, 8h. 55m. The length of the Day is 13h. 35m.

Sept. 1, 8h. aft. Mercury at greatest elongation (18° 8') West.

Sept. 2, 6h. 20m. morn. Mars and Jupiter in conjunction. δ 0° 41' N.

Sept. 5. Mean time taken by Sun's semidiameter in crossing the meridian, 1m. 4"08.

Sept. 6, morn. Jupiter's Satellite IV., in eclipse. See p. 79.

Sept. 10, aft. Occultation of λ Piscium and 22 Piscium; magnitudes 4.6 and 5.8 respectively. See p. 80.

Sept. 11, 8h. 18m. morn. Mercury and Saturn in conjunction. γ 0° 7' N.

Sept. 12, aft. Occultation of π Piscium; magnitude 5.6. See p. 80.

Sept. 13, 3h. morn. Venus in Inferior Conjunction.

Sept. 20. Jupiter in conjunction with γ , 10h. 58m. morn. δ 25° 34' N.

Sept. 21. Mars in conjunction with γ , 2h. 33m. morn. δ 6° 35' N.

Sept. 22, morn. Jupiter's Satellite III. in eclipse. See p. 79.

Sept. 22. Saturn in conjunction with γ , 10h. 23m. morn. δ 6° 55' N.

Sept. 23, morn. Jupiter's Satellite IV. in eclipse. See p. 79.

Sept. 24. Sun enters the sign Libra, 2h. 36m. morn. (Autumn Equinox).

Sept. 27, 8h. morn. Mercury in Superior Conjunction.

Janus rises Sept. 1, 6h. 28m. aft.; Sept 30, 4h. 32m. aft.

In this month the Mornings decrease 47m., and the Afternoons 2h. 6m.

Constellations near the S. meridian at 10 p.m.: LYRA, CYGNUS, AQUILA, DELPHINUS, AQUARIUS, CAPRICORNUS, EQUULEUS, PEGASUS, PISCES.

The Harvest Moon.—It will be seen that the interval between successive entries in the column of Moonrise is only about 24 minutes near Full Moon in this month (Sept. 10), which is a less interval than in other parts of the column. This Full Moon is called the Harvest Moon.

The orbital motion of the Moon causes her to move among the stars rather rapidly from West to East, and she comes to the meridian of any place, or is due South, about 50 minutes later night by night. For this reason alone she would rise later night by night by this amount, but the time of rising (except at places on the Equator) is affected by her distance north or south of the celestial equator. In North latitude she rises earlier, with north declination. There is a certain period in each lunation

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, and may be seen in the E.N.E. in the early days of the month.

♀ VENUS sets before the Sun in the first part of the month. After Inferior Conjunction on the 13th it is a morning star, rising almost due E., but hardly visible until the end of the month.

♂ ♃ MARS and ♃ JUPITER are morning stars in the same part of the sky, and rise N.E. by E. about two hours after midnight. Mars is to the left of Jupiter and much the fainter object. Mars, +2.0; Jupiter, -1.4. Jupiter remains in Cancer; Mars moves from that constellation into Leo.

♄ SATURN, in Leo, is a morning star, rising E.N.E. Magnitude, +1.0.

when the Moon is moving northward rather rapidly, and this causes an acceleration which modifies the 50 minutes' retardation in the time of rising already mentioned, and in a high latitude she will rise nearly at the same time for several nights in succession. This happens in every lunation, and in general passes unnoticed; but in the September lunation it happens when the Moon is full, and then the Moon, full or nearly so, rises about sunset on two or three consecutive nights. This phenomenon is known as the Harvest Moon. The precise details vary in different years according to certain circumstances (see p. 87), and two Full Moons may have nearly equal claims (compare October 5 g), but the term is always applied to the Full Moon nearest to the Autumnal Equinox. See note, p. 87.

MONTHLY NOTES.

October 1. Revising Barristers must complete revision of all lists of voters by 12th. — Pheasant shooting begins. Common Lodging-houses to be whitewashed in the first week.

5. Dividends due.
9. Various Licences expire.
12. Fire Insurances must be paid.
13. Quarter Sessions begin.
24. Borough Councillors to be nominated.

AVERAGE RAINFALL IN OCTOBER.

in 63 years, 1841-1903, was 2'821 inches on 15'1 days.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 7m. morn. Civil twilight ends at 5h. 33m. aft. Night begins, 7h. 33m. The length of the Day is 12h. 38m.

Oct. 1, aft. Occultation of μ Sagittarii; magnitude 4.0. See p. 80.

Oct. 2, 10h. morn. Venus at a stationary point.

Oct. 5. Mean time taken by the Sun's semidiameter in crossing the meridian, 1m. 4.3s.

Oct. 8, morn. Occultation of 16 Piscium; magnitude 5.7. See p. 80.

Oct. 9, morn. Occultation of 51 Piscium; magnitude 5.6. See p. 80.

Oct. 18. Jupiter in conjunction with δ , 5h. 54m. morn. γ 5° 56' N.

Oct. 19. Mars in conjunction with δ , 5h. 38m. aft. δ 7° 0' N.

Oct. 19. Saturn in conjunction with δ , 10h. 14m. aft. γ 7° 3' N.

Oct. 20, 4h. morn. Venus at greatest brilliancy.

Oct. 20. Venus in conjunction with δ , 9h. 4m. morn. α 2° 27' N.

Oct. 24, noon. Mars and Saturn in conjunction. δ 5° 5' S.

Oct. 25. Mercury in conjunction with δ , 10h. 11m. morn. γ 1° 3' S.

Oct. 28, morn. Jupiter's Satellite III. in eclipse. See p. 79.

Uranus sets Oct. 1, 2h. 26m. morn.; Oct. 31, 0h. 25m. morn.

In this month the Mornings decrease 52m., and the Afternoons 1h. 4m.

The Zodiacal light may be seen before dawn in the first and last weeks of this month, when there will be no moonlight.

Constellations near the S. meridian at 10 p.m.: Delphinus, Equuleus, Aquarius, Capricornus, Pegasus, Andromeda, Pisces, Piscis Australis, Cetus.

Sirius—The Dog Star.—For reasons which are given in another place (p. 82), the stars of the night sky change continuously during the year, and the winter stars are a different set to the summer stars. Well-recognised winter stars are those of the constellation Orion and a circle of bright stars which surround them—Capella, the Pleiades, Aldebaran, Castor and Pollux, with Procyon and Sirius, the bright stars of the constellations Little Dog and Great Dog, respectively. These winter stars come into view above the eastern horizon in October. The Pleiades

☿ MERCURY is technically an evening star, but sets very soon after the Sun. W. by S. at the beginning of the month, and S.W. by W. at the end.

♀ VENUS, at greatest brilliancy on the 20th (magnitude, -4.3), rises more than an hour before daybreak. Venus is in the following part of Leo.

♂ MARS is in the preceding part of Leo, and also a morning star. On the 7th is about a degree distant from Regulus. Saturn is also in the constellation Leo, midway between Venus and Mars at the beginning of the month. Mars and Saturn will be close together on the mornings of the 24th and 25th, rising E. by N. Magnitude of Mars, +1.8; of Saturn, +1.1.

♃ JUPITER is in Cancer, and rises before midnight after the middle of the month, N.E. by E. Magnitude, -1.5 to -1.7.

are fairly high at ten o'clock at the beginning of the month, and Sirius rises at midnight at the end. Somewhat paradoxically, Sirius, a winter star, gave the name to the Dog days—the hot days of July and August—the association being that this star rose heliacally, i.e. at the same time as the Sun, at that period of the year. Sirius is the brightest star in the sky, and has a faint companion, or satellite, which is eleven magnitudes fainter than the primary, but is believed to be only about a half its mass or weight. Recent observations have confirmed the previously determined period of fifty years as the time in which the satellite makes a complete revolution.

AVERAGE RAINFALL IN NOVEMBER,

in 63 years, 1841-1903, was 2'220 inches on 14'0 days.

MONTHLY NOTES.

November 1. Latest day for receiving corrections for Whitaker's Almanack.

— Fox-hunting begins. Salmon-fishing with rod and line ends (with some local exceptions).

— Ordinary day of election of Borough Councillors.

— Holiday at London Stock Exchange.

9. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.

12. County Sheriffs for next year nominated.

15. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 4h. 59m. morn. Civil twilight ends at 5h. 31m. aft. Night begins, 5h. 29m. The length of the day is 9h. 40m.

Nov. 4, aft. Occultation of 22 Piscium; magnitude 5.8. See p. 80.

Nov. 6, aft. Occultation of 7 Piscium; magnitude 5.6. See p. 80.

Nov. 7, aft. The Moon partially eclipsed. Visible at Greenwich. See p. 79.

Nov. 10. Occultation of 1 Tauri, magnitude 5.2 (morn.); and of 57 and 64 Orionis, magnitudes 5.8 and 5.1 (aft.). See p. 80.

Nov. 12, morn. Jupiter's Satellite IV. in eclipse. See p. 79.

Nov. 12, gh. aft. Mercury at greatest elongation (22° 48') East.

Nov. 14. Jupiter in conjunction with 12h. 17m. aft. 7 6 11' N.

Nov. 14, morn. Occultation of 8 Canceri; magnitude 5.1. See p. 80.

Nov. 16. Saturn in conjunction with 3h. 17m. morn. 5 7 11' N.

Nov. 17. Mars in conjunction with 7h. 19m. morn. 6 45' N.

Nov. 18. Venus in conjunction with 7h. 29m. aft. 9 5 25' N.

Nov. 22. Annular Eclipse of the Sun, partly visible at Greenwich. See p. 79.

Nov. 23, 10h. aft. Venus at greatest elongation (46° 44') West.

Nov. 29, morn. Jupiter's Satellite IV. in eclipse. See p. 79.

Uranus sets Nov. 1. oh. 21m. morn.; Nov. 30, 10h. 24m. aft.

In this month the Mornings decrease 49m., and the Afternoons 39m.

Constellations near the S. meridian at 10 p.m.: Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus.

Planetary Conjunctions.—The assemblage of the four bright planets in the morning sky this autumn is noteworthy. Jupiter makes the complete circuit of the stars in about twelve years, Saturn in about thirty, and from this it can be easily calculated that these two planets are in the same neighbourhood at intervals of twenty years. The last actual conjunction of these two planets was on 27 Nov., 1901, the next will be on 14 Sept., 1921. They are now getting together, and will be in the same neighbourhood for some years. Conjunctions of Mars and Jupiter, or of Mars and Saturn are less rare; the interval between consecutive conjunctions of either pair being about 800 days, and it naturally follows that Jupiter and Saturn will be joined by Mars at some time during the period when they are in proximity. Venus visits the two distant planets at shorter

☿ MERCURY continues to be an evening star, setting soon after the Sun nearly in the S.W.

♀ VENUS is still a bright object in the morning sky throughout the month. Magnitude, $-4\frac{1}{2}$ to $-4\frac{1}{10}$. It moves from Leo into Virgo.

♂ MARS also passes into Virgo. Magnitude, $+1\frac{1}{7}$ to $+1\frac{1}{5}$.

♃ JUPITER, in the constellation Cancer, not far from Leo, rises in the late evening E.N.E. Magnitude, $-1\frac{1}{8}$.

♄ SATURN rises E. by N. The four planets Jupiter, Saturn, Mars, Venus, rise at the times given in the above table, and at 4 or 5 o'clock in the morning will range, with the star Regulus between the first two, at almost equal intervals, in the order named, from south to east across the eastern sky.

intervals, but of course, not necessarily at the same time as Mars. When Jupiter and Saturn come into view next year Mars and Venus will be in a far distant part of the sky. The actual conjunction of Jupiter and Saturn in September 1922 will happen when the planets are not in the night-sky, but later in that year these planets will be seen congregated in a smaller area of the morning sky than they are now.

It may be noted that the occurrence of heavy type figures in the tables of risings and settings on this page, as now arranged, readily shows the limits of the period during which the planet may be conveniently observed, or the Apparition as it is often termed.

APPARENT RIGHT ASCENSION AND DECLINATION OF POLARIS.

AVERAGE RAINFALL IN DECEMBER,
in 64 years, 1841-1903, was 1'829 inches on
14'2 days.

MONTHLY NOTES.

Dec. 10. Grouse and Black Game Shooting ends.
15. Last day for renewing solicitors' certificates.
— Notices to owners and occupiers affected
by private Bills in Parliament must be delivered.
25. Quarter Day. Bills of Exchange falling due
this day must be provided for on the 24th.
26. Bank and General Holiday. Bills of ex-
change falling due on 26th are not payable till
the 27th. 31. Various Licences expire.

Mean Longitude of Moon's Ascending Node, December 1, 233° 59' m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 40m. morn. Civil twilight ends at 5h. 16m. aft. Night begins, 5h. 57m. The length of the Day is 8h. 9m. On Dec. 19 the length of the Day is 7h. 46m.

Dec. 2, aft. Jupiter's Satellite III. in eclipse. See p. 79.

Dec. 2, morn. Occultation of 16 Piscium; magnitude 5.7. See p. 80.

Dec. 5, aft. Jupiter at a stationary point.

Dec. 5. Mean time taken by the Sun's semidiameter in crossing the meridian, 1m. 10.38.

Dec. 9-10. Jupiter's Satellite III. in eclipse. See p. 79.

Dec. 11, morn. Occultation of A¹ and A² Cancri; magnitudes 5.5 and 5.7. See p. 80.

Dec. 11. Jupiter in conjunction with ♄, 9h. 29m. aft. 2° 6' 16' N.

Dec. 13. Saturn in conjunction with ♄, 5h. 15m. aft. 1° 7' 13' N.

Dec. 15. Mars in conjunction with ♄, 7h. 26m. aft. 5° 58' N.

Dec. 18. Venus in conjunction with ♄, 9h. 27m. morn. ♀ 4° 0' N.

Dec. 20. Mercury in conjunction with ♄, 11h. 29m. morn. ♀ 1° 15' N.

Dec. 2, aft. Mercury at greatest elongation (21° 47') West.

Dec. 22, 9h. 27m. aft. Sun enters the sign Capricornus (Winter Solstice).

Neptune rises Dec. 1, 8h. 41m. aft.; Dec. 31, 6h. 40m. aft.

In this month the Mornings decrease 24m., the decrease continuing throughout the month.

The Afternoons decrease 4m. up to the 13th, and then increase 9m.

Constellations near the S. meridian at 10 p.m.: Andromeda, Triangulum, Aries, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion.

The Duration of Moonlight.—

A star crosses the sky from east to west in the same diurnal path at all times, the altitude when due south being fixed for each star. With the Moon and planets this is not the case, for they move among the stars in paths which are inclined to the Equator, and are sometimes high, sometimes low in the sky when they attain the greatest altitude of the day. In the case of the planets this change is slow, but the Moon goes through much change of altitude in the course of a month or lunation. The high altitude occurs at different periods of the different lunations, and this is the immediate cause of a difference in the amount of moonlight we enjoy at different times of the year. In the summer the Full Moon is low, and the New Moon high. Hence we see little of the Full Moon, for low altitude necessarily implies a shortened duration between rising

MORNING AND EVENING STARS.

☿ MERCURY being in inferior conjunction on the 2nd is a morning star, and in the middle of the month rises two hours before the Sun, S.E. by E.

♀ VENUS rises two hours before daybreak nearly E.S.E. throughout the month. Magnitude, - 4.0 to - 3.8. It moves into Libra about the 20th.

♃ ♄ The configuration of Jupiter, Saturn, Mars, and Venus is similar to that of last month. These four planets are ranged across the constellations Cancer, Leo, and Virgo, and rise in the order named, the first two before midnight. With Neptune and Mercury, there will be six major planets above the horizon at sunrise. Magnitudes; Jupiter - 2.0, Saturn + 1.0, Mars + 1.5 to + 1.2.

and setting. In the winter, on the contrary, the Full Moon is high and she remains above the horizon through the long night. In the spring months the Moon is high between the First Quarter and Full, and as she then souths during the evening the large share of moonlight is very evident, whereas in autumn months the high Moon happens between Full and Last Quarter, and the long duration of moonlight occurs largely in non-waking hours.

The Full Moon is estimated to give nearly ten times as much light as she does at the quarters, and we receive twice as much light from a high Full Moon as from a low one.

Tidal Constants,

71

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

NOTE.—The time thus found will be Greenwich Time for British, French and Belgian Ports, and Irish Ports, and Amsterdam time for Dutch Ports.

EXAMPLE 1.—Required the time of high water at Aberdeen on January 7th:—

Time of high water at London Bridge 4h. 49m. Morn.
 Subtract tide interval 0 50

Time of high water at Aberdeen 3 59 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 9th:—

Time of high water at London Bridge 6h. 17m. Morn.
 Add tide interval 2 15

Time of high water at Scarborough .. 8 32 Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sun "high water" at London Bridge "tide interval" will exceed 12 hours; in this case, the excess will be the time of high water after the noon or midnight following according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, January 14th aft:—

Time of high water at London Bridge
 on January 15th + 12 hours 12h. 42 m. Morn.
 Subtract tide interval 0 50

Time of high water at Aberdeen, Jan 14th 11 52 After.

Calendar of Church Lessons, 1919,

73

APPOINTED FOR SUNDAYS AND OTHER HOLY DAYS THROUGHOUT THE YEAR.

The Athanasian Creed to be read on the days marked*.		MORNING PRAYER.		EVENING PRAYER.	
		First Lesson.	Second Lesson.	First Lesson.	Second Lesson.

Previous to 1752 the above dates are computed from the Old Style. The tables in modern Prayer-Books are calculated for the New Style only. Dates here printed in heavier type are leap-years. 1752 had E D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. The Table of Moveable Feasts in the Prayer-Book gives all the others after finding Easter in this.

† New Style.

Tables for Finding the Times of Sunrise and Sunset. 75

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found the *local apparent time* of sunset. Subtracting this from *12h.* will give the *local apparent time* of sunrise. To obtain from this the local mean time, the quantity in the second column on the second page of each month (which is known as the Equation of Time) appropriate to the day in question must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versa*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack are the times when the centre of the Sun's disc is on the visible horizon at sea-level at Greenwich, computed on the assumption that the horizontal refraction is $34\frac{1}{2}'$. Whatever may be the legal definition of sunrise and sunset, the above has generally been adopted as a correct statement; but in some Tables the instant when the upper limb, or edge, of the Sun is on the visible horizon is given as the time when the

Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset. It has been held by a legal tribunal, as would be expected,

that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign -, that it is earlier.

The second Table shows that on June 1 the Sun will set at about the same moment at Aberdeen, Glasgow, Belfast, and Killarney. Reference to a map will show that these four places lie on a line which is nearly straight. On the same day the Sun sets at Plymouth, Bristol, and Birmingham nearly at the same moment, and these three places similarly lie on an approximately straight line which is parallel to the former. This particular case is given as example, but examination of the Tables will show that lines of same sunset or same sunrise on any day are approximately straight and parallel, and in general inclined to the meridians, the inclination changing according to the period of the year.

3 30	-0 59 11+	15 30	7 30	-0 0 35+	19 30	11 30	+0 58 35-	23 30
3 40	-0 57 40+	15 40	7 40	+0 2 22-	19 40	11 40	+1 0 2-	23 40
3 50	-0 56 2+	15 50	7 50	+0 5 20-	19 50	11 50	+1 1 23-	23 50
4 0	-0 54 18+	16 0	8 0	+0 8 17-	20 0	12 0	+1 2 36-	24 0

The sign on the left-hand side of the *correction* is to be used when the argument is on the left, and *vice versa*; + means that the correction is to be added to the reduced altitude, and - that it is to be subtracted.

The corrections in Tables II. and III. are always to be added; *r* is to be subtracted from the final result because the quantities in Table III. above have been increased by that amount in order that they may all be additive.

Solar and Sidereal Time.

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND VICE VERSA.

The length of a Sidereal day is 23h. 56m. 4.09s. of Mean Time. One hour of Sidereal Time is, therefore, equivalent to 59m. 50.17s. of Mean Time, and one hour of mean solar time is equivalent to 1h. 0m. 9.86s. of Sidereal Time. This may be expressed otherwise by saying that the Mean Time clock loses or retards 9.83s. per hour on the sidereal clock, and that the sidereal clock gains or accelerates 9.86s. per hour on the Mean Time clock. These quantities—"acceleration" and "retardation"—are tabulated below for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. On the other hand, if it is considered to be Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Accelera- tion.	Argu- ment.	Retar- dation.	Accelera- tion.	Argu- ment.	Retar- dation.	Accelera- tion.	Argu- ment.	Retar- dation.	Accelera- tion.	Argu- ment.	Retar- dation.	Accelera- tion.	Argu- ment.	Retar- dation.

see page 97.

ECLIPSES IN 1919.

IN the year 1919 there will be two Eclipses of the Sun and one of the Moon.

I. A Total Eclipse of the Sun in the forenoon and afternoon of May 29. Entirely invisible at Greenwich. The path of the Moon's shadow from which a total eclipse may be seen crosses South America from Northern Chili to North-east Brazil, and then traverses the Atlantic. After skirting Liberia the path of the shadow strikes the West African Coast again, almost at the Equator, and ends its course off the East Coast at about 12° South latitude. Some of the places from which totality may be seen are Sobral in Brazil; St. Paul's Rocks in the Atlantic, off the coast of Brazil; Cape Palmas; Prince's or Principe Island; Libreville, the capital of French Congo; and Baudouinville, on the west shore of Lake Tanganyika. The duration of totality at this eclipse will be unusually long, being only 10 or 15 seconds less than 7 minutes as seen from Mid-Atlantic, 5 minutes in Eastern Brazil and in the neighbourhood of Libreville, and about 4 minutes in Western Brazil and Central Africa. Central eclipse will begin half an hour before Greenwich noon at a place whose longitude is 75° 9' West, latitude 19° 43' South, and will end at 2h. 47m. p.m., G.M.T., in longitude 42° 27' East, latitude 12° 25' South. A partial eclipse will be seen from almost the whole of South America, and from nearly the whole of Africa, Morocco, North Algeria, and Northern Egypt being excepted. At Johannesburg, Natal, and the Cape of Good Hope, the fraction of the Sun's diameter that will be obscured is about a half, two-fifths, and one-sixth respectively; and the eclipse will begin at 1h. 38m., 1h. 42m., and 1h. 39m. p.m. by Greenwich time at the three places.

II. A Partial Eclipse of the Moon will happen about midnight of November 7. Visible at Greenwich. Only a small portion of the lunar disc near the southern edge will be obscured, scarcely more than a sixth of the diameter being in eclipse at Greatest Phase.

Moon enters Penumbra	7d. 9h. 34m. aft.
" " Umbra	7 10 58
" leaves Umbra	8 0 30 morn.
" " Penumbra	8 1 55

III. An Annular Eclipse of the Sun in the afternoon of November 22. The Sun will be seen partially eclipsed from Greenwich and from places throughout the British Isles just before it sets. The track from which annularity may be seen begins its course in Texas, U.S.A., then crosses the Gulf of Mexico and the Atlantic and comes to land on the West Coast of Africa, passing over the islands of Biasago, and ends its course in the Sahara. The greater part of the island of Cuba, the western part of Haiti, and the islands of Grenada and Tobago are within the limits of this shadow track, whilst the island of Barbados is outside its northern border. Central eclipse will begin at a place in longitude 102½° W., latitude 32° 41' N., at 2h. 28m. p.m. by Greenwich time, and ends at a place in longitude 4° 11' E., latitude 19° 11' N., at 5h. 0m. p.m. The duration of annularity will be nearly 12 minutes at places precisely on the central line in the middle of the track, and about 8 minutes at the ends.

A partial eclipse will be seen from North America near sunrise and from the northern half of South America in the local forenoon. At Montreal an eclipse, two-fifths diameter at maximum, will be seen from 12h. 53m. p.m. to 3h. 22m. p.m., G.M.T. At Dublin, the magnitude of the eclipse is one-fifth; it will begin at 3h. 16m. p.m., Greatest Phase will be at 4h. 8m., and the Sun will set in eclipse. At Greenwich, first contact will take place at 3h. 20m. p.m. at 44° from the south point towards the west, and the Sun will set before Greatest Phase is reached.

ECLIPSES OF JUPITER'S SATELLITES.

The following Table contains details of the Eclipses of the Satellites of Jupiter that will be visible from Greenwich in the year 1919, with a few outside this limit added. (Contd. next page.)

The above list contains the names of all the stars of the 6th magnitude and brighter that will be seen occulted from Greenwich during the year, with the times of disappearance and reappearance. The times of the occultations if seen from other places will be different—earlier in general, if the place is West, later if it is East. Disappearances usually happen on the East or left-hand side of the Moon, reappearances on the West; but the exact position is shown by the figures in the fourth and sixth columns, which give the angle from the vertex, or highest point of the Moon's disc, counting towards the East from 0° to 360°.

The letters D. and R. in the second column signify respectively Disappearance and Reappearance.

From January to June the disappearances and reappearances take place on the Eastern side of the planet. During this period Satellites I. and II. do not disappear by eclipse, but pass behind the Western limb of the planet and reappear from the shadow on the East. This is true in some cases of Satellite III. From Aug. to January (1920), the disappearances and reappearances take place on the Western side of the planet, but Satellites I. and II. after disappearing into the shadow of the planet reappear at its Eastern limb, and simi-

larly for Satellite III. in cases towards the end of the list. These changes in method occur at Conjunction and Opposition of Jupiter.

The local Mean Time of the Eclipse for any other place than Greenwich may be found by applying the longitude (in time) to the times given in the Table, adding if the longitude of the place is East of Greenwich, and subtracting if it is West. If Standard Time be required the zone difference is to be treated in the same way; or, in other words, the phenomena of Jupiter's satellites are seen simultaneously from all places where the planet is above the horizon at the time.

Fixed Stars.

SOME FUNDAMENTAL STARS VISIBLE IN THE SOUTHERN HEMISPHERE.

THE shape of our Earth is that of an oblate spheroid, or a soid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, or the line joining the North and South Pole, is 7,900·1 miles; the diameter of the circle, which is the Equator, is 7,926·8 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5·5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Sun and Moon moves in this plane, and the Earth revolves round this centre not remaining precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of $23\frac{1}{2}^\circ$, and it is this tilt which causes the Seasons, for the inclination is always in the same direction, and is such that the Northern hemisphere enjoys the heating and lighting effects of the Sun more in the period of the year we call our Summer than it does in the Winter months. The case is reversed for the Southern hemisphere. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the Sun appears to change its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. Because of the inclination of the Equator to the Ecliptic, the Sun is high in the sky in Summer and low in Winter. The dates when the Sun is at the exact mean or intermediate positions—i.e., when it is at the points in the sky defined by the line of intersection of the planes of the Equator and Ecliptic—are called the Equinoxes, and on these dates day and night are of equal duration all over the globe. The average velocity of the Earth in its orbit is $18\frac{1}{2}$ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time. Because the Earth moves round the Sun in the same direction as it rotates on its axis, the length of a solar day is more than the length of a rotation by about four minutes (see p. 92). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity circles about the pole of figure at a distance of a few feet.

THE TIDES.

The Tides of the Ocean have always been justly connected with the movements of the Moon, and it is certainly right to attribute them to the attractive influence of our Satellite on the water, modified by a similar influence of the Sun of less amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it might be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but

these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide is compiled and analysed, to show in a series of periodic terms the effects of the Moon and of the Sun, and when these terms are each carried forward to some future date their recombination gives the predicted tide. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes, one of these being the height of the barometer. Taking the mean sea-level as datum, high water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs $2\frac{1}{4}$ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports.

TERRESTRIAL MAGNETISM.

A phenomenon of the Earth, the origin of which is obscure, but on which some light has been thrown by recent investigations, is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle, except in particular cases, is not the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to Chichester the declination is the same as at Greenwich. Along a parallel line through Dover the West declination is about fifty minutes of arc less; from Newcastle to Plymouth it is about $1\frac{1}{2}^\circ$ greater; whilst at Dublin the declination West is 3° or 4° greater than at Greenwich. Observations of magnetic declination are made and charted to show the amount of this magnetic

(See page 81.) Polaris = α Urse Minoris; Aldebaran = α Tauri; Rigel = β Orionis; Capella = α Aurigæ; Betelgeuse = α Orionis; Sirius = α Canis Majoris; Castor = α Geminorum; Procyon = α Canis Minoris; Pollux = β Geminorum; Regulus = α Leonis; Spica = α Virginis; Arcturus = α Boötis; Antares = α Scorpii; Vega = α Lyre; Fomalhaut = α Piscis Australis; α Aquilæ = Altair; α Pegasi = Markab; Achernar = α Eridani; Canopus = α Argus.

The variation of light of Betelgeuse is irregular. α Herculis, the limits of magnitude are $3\frac{1}{2}$ and $3\frac{9}{10}$. η Argus, the variation is irregular; the limits of magnitude are $7\frac{1}{2}$ and $7\frac{4}{5}$.

element over our globe, and from such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. The position of the North Magnetic Pole is about latitude 70° , longitude 100° W.; the South is in latitude 73° , longitude 150° E. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs is given in the table below. That the compass needle does not in general point true north and south, but that it is inclined a certain amount east and west, and that the amount varies with the locality was recognised among western nations by the end of the fifteenth century, Columbus being credited with the discovery. That there is a secular change in the magnetic declination, or that the amount at any place changes slowly year by year, was discovered by Gellibrand in 1634.

Year.		
1580	11	15 East.
1665	1	30 West.
1765	20	0 West.
1800	24	0 West.

In 1815 the declination at London reached its westward maximum, and since then it has been moving slowly eastward. The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only. The figures for 1918 are approximate.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
1900	$16^{\circ} 29' 0''$	1846	$67^{\circ} 8' 5''$
1910	$15^{\circ} 41' 2''$	1855	$66^{\circ} 52' 6''$
1911	$15^{\circ} 33' 0''$	1855	$66^{\circ} 52' 1''$
1912	$15^{\circ} 24' 3''$	1855	$66^{\circ} 51' 8''$
1913	$15^{\circ} 15' 3''$	1853	$66^{\circ} 50' 5''$
1914	$15^{\circ} 6' 3''$	1852	$66^{\circ} 51' 2''$
1915	$14^{\circ} 56' 5''$	1851	$66^{\circ} 51' 8''$
1916	$14^{\circ} 46' 9''$	1849	$66^{\circ} 52' 8''$
1917	$14^{\circ} 37' 0''$	1848	$66^{\circ} 53' 6''$
1918	$14^{\circ} 27' 0''$	1847	$66^{\circ} 54' 2''$

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about $12'$ in summer and $7'$ in winter. The needle occupies its mean position about 10 h. a.m., and again about 6 h. p.m., throughout the year. It reaches its most westerly position about 2 h. p.m., and its most easterly position during the night or early morning. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. Since these variations of the magnetic elements are mainly confined to the hours of daylight, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the variation is larger at times of Sun-spot maximum than at minimum—it may be concluded that they are in some way dependent on solar radiation, and it is suggested

that the ionisation of the upper atmosphere by the Sun, which causes it to be highly conducting, may produce the effect.

EARTHQUAKES.

The rock formations which make up the crust of the Earth are in general highly elastic, and therefore of a nature to be set in vibratory motion by a jar, just as the metal of a bell vibrates when made to sound by a blow. Earthquakes, or earth tremors, are generally acknowledged to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the breaking point. Whatever the nature of the impulse may be, it gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface, sometimes with disastrous effects, by setting up vibrations in the surface formations and in the buildings thereon. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origiu, or focus. That part of the Earth which is vertically above the centre is called the epicentre. The waves transmitted through the Earth may come to the surface hundreds, or even thousands, of miles from the epicentre, and are recorded by seismologists by means of an instrument whose essential feature is known as a horizontal pendulum. This piece of mechanism is a slender rod supported near one end by two wires—one from above, the other from below—and any measurable movement will cause the further end of the rod to sway through a considerable arc. It has been described as a gate hanging on a post which is not upright. The gate in such a case will remain at rest in a certain position, but any further deflection of the supporting post will cause it to take up some other position, and a vibratory motion will cause an oscillation. Generally two waves of different types are recorded, the preliminary tremors being followed after an interval by the principal wave. It is believed that the preliminary tremors pass through the body of the Earth and that the principal wave travels along or parallel to the surface. From the interval of time between the records of these shown by the seismograph and the amplitude of the trace on the recording sheets, the direction, distance, and size of the originating disturbance may be inferred. The velocity of the preliminary wave increases with depth from $4\frac{1}{2}$ miles per second at the Earth's surface to $6\frac{1}{2}$ miles per second at a depth of 400 miles, and continuously increases to 8 miles per second at 1,000 miles. The surface wave travels at the rate of 2 or 3 miles per second.

These branches of science—Tides, Earth-Magnetism, and Earthquakes, with Geodesy, Geology, and Meteorology in some aspects—are included under the general title of Geophysics. A series of meetings was initiated in the year 1918 at which geophysical subjects were discussed, preliminary to the establishment of an organisation to develop the study of these sciences, which may take form as a branch of the Royal Astronomical Society.

The International Geodetic Association, whose headquarters were at Potsdam, came to an end in 1916. It is proposed to re-establish this Association in a manner such that Germany will have a less prominent position.

The Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, is not unlike many of the stars we see in magnitude and constitution. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The study of accurate astronomy begins with the Solar or Planetary system, since its members are nearest to us. This system consists of the Sun, with eight major planets and a thousand minor planets, or asteroids, circulating round him at varying distances in oval-shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals, since they move in elongated elliptical orbits of which the Sun is at one focus, are also members of the Solar system, but shine chiefly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (see p. 82) is used as a fundamental plane of reference. The other planets move, at varying distances from the Sun, in planes inclined but little to the plane of the Ecliptic, and describe orbits in periodic times which are connected with the distances by a certain relation. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form. The time of rotation about the axis or the length of the day of the planet, is added where this is known.

THE SUN.

The surface of the Sun presents a mottled appearance, and on it black spots appear sporadically. The nature of these is not known with certainty, but it was formerly supposed that they are at a lower level than the surrounding surface, the photosphere, though some modern views assert that spots are due to a central uprush. They are signs of storms and whirling disturbances in the solar atmosphere, and it has been recently demonstrated by Prof. Hale, of the Solar Observatory at Mount Wilson, California, that they are centres of magnetic disturbance. The spots vary in size and number, and their total area reaches a maximum about every eleven years. They seldom appear more than 30° of latitude from the solar equator, north or south, and the spotted regions converge towards that equator as the time of minimum approaches. The Sun rotates on its axis in about 25 days 8 hours, which is shown by the apparent movement of the spots since they cross the visible disc from the eastern to the western edge in 13 or 14 days on account of the Sun's rotation, the time of passage being affected by the orbital movement of the Earth in the interval. Like Jupiter, the Sun appears not to rotate as a whole, the period of rotation being different in different latitudes. The Equator makes a complete rotation in less than 25 days, whereas the period for latitude 35° is nearly 27 days. Sun-spots are of irregular shape, vary greatly in size, and consist of a nucleus apparently black, and a penumbra faintly dark.

DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima.		Minima.	
1805.2	1860.1	1810.6	1867.2
1816.4	1870.6	1823.3	1878.9
1829.9	1883.9	1833.9	1889.6
1837.2	1894.1	1843.5	1901.7
1848.1	1906.1	1856.0	1913.1

A Sun-spot maximum is now in progress. The spots of 1918 were not so large nor so numerous as those of 1917, but, judging by previous maxima, it cannot yet be said that the present maximum has passed.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, certain red prominences are seen projecting from the Sun's limb, which consist of masses of glowing hydrogen gas arising from the chromosphere, sometimes to a height of nine or ten times the diameter of the Earth. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun, extending to an immense distance outside the chromosphere, is called the corona, and can at present only be seen during total eclipses of the Sun. The lower portion consists of a pale green light containing hydrogen, the upper a beautiful mass of silvery white light, in form of feather-like plumes with dark spaces between. These plumes have sometimes been traced to twice the Sun's diameter. The corona does not appear to retain a constancy of form, but has been observed to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are only total at certain places on the globe, and an eclipse is partial in localities off the line of totality, because the change in the observer's position places the Moon out of the direct line between him and the Sun. Total eclipses of the Sun are very rare in this country; there will be none till the year 1927, but an annular eclipse will be visible from a small region in the north of Ireland and Scotland in April, 1921.

The mean distance from Sun to Earth is about 93,000,000 miles. In comparing distances expressed in high numbers it is not easy to get a clear idea of their relation to each other, and for distances in the solar system astronomers take this distance as the unit and express all others in terms of it.

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and the times and distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 29° . The period of revolution round the Sun—in other words, Mercury's year—comprises 88 solar days, and he turns on his axis either in the same time, and therefore always presents the same face to the Sun, like

the Moon with respect to the Earth, or in about 25 hours. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West.

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbours, the angles of Elongation exceed those of Mercury, and extend to 47° . The disc of Venus is not telescopically interesting, for owing to her dense cloud-laden atmosphere very few markings are visible, and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth, whilst others have concluded that it is equal to the year of Venus, or, in other words, that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she appears as a beautiful crescent like the Moon when about $3\frac{1}{2}$ days from New. Such epochs will occur in the current year in August and October (see page 46).

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth, and it will not be at opposition, and therefore not very conspicuous, in the year 1919. Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. His disc departs from exact circular form, or is gibbous only to the extent of one-eighth of its diameter. The other superior planets are too far away to show any very appreciable phase, though traces of it are sometimes to be detected in Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained, and there are besides white spots at the poles of rotation. These are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely. The interesting statement has been made by a well-known observer of Mars that when the Sun-spots are numerous the melting of the Martian caps is accelerated, and when they are few it is retarded. The continents and seas, as the markings are called, have been charted and their positions accurately laid down. Many excellent photographs of Mars have also been obtained showing the white polar spots and other markings very plainly. Some of the markings have been named "canals," perhaps a little unfortunately, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof.

MINOR PLANETS.

Between the orbits of Mars and Jupiter a large number of small planets have been discovered. Every year adds new discoveries to this very abundant class of objects, and up to the end of the year 1917 orbits had been computed for

949 of them. There must still be thousands awaiting detection. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 118 miles; and Vesta, 243 miles. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, amounting on an average to about 1,600 days, or $4\frac{1}{2}$ years. Some of the orbits are very oval and the inclination of their planes to the Ecliptic varies considerably; in the case of Pallas it amounts to 35° , that of Juno being only 13° . One of these small bodies, named Eros, at some oppositions approaches nearer to the Earth than Mars does at any time, and thus affords a good opportunity for determination of the solar parallax.

JUPITER.

The next planet in order from the Sun, Jupiter, whose distance from the central body is $5\frac{1}{2}$ times that of the Earth, is the largest planet in the system, and has a diameter eleven times that of the Earth, but the density is only $\frac{1}{4}$ th of the latter. On viewing Jupiter through a telescope it will be at once seen that the disc is not circular, and the polar diameter is known to be 84,778 miles and the equatorial 90,254 miles.

This form, of an oblate spheroid, is due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. The planes of their orbits are but slightly inclined to that of Jupiter about the Sun, and in consequence eclipses of the three inner moons, which shine by the light of the Sun, occur every Jovian lunation, their distance from Jupiter not being large enough to permit them to escape the shadow, as is the case with Satellite IV. in some circumstances.

THE GREAT RED SPOT ON JUPITER.

This may be said to have formed the most remarkable and the best observed planetary feature of modern times. Though it has undergone marked changes it appears to have been visible since the Rev. W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857. A curious bay or hollow on this belt has been visible since 1831; and if we accept this as identical with the one now visible (which includes the red spot), then the rotation of this object during the 84 years from 1831 to 1914 was $9^h. 55^m. 36^s. 98$. from 74.170 rotations.

On January 1, 1919, the red spot will probably be in zero longitude and coincide with the position of System II. of the ephemeris. But the motion of the spot being now more rapid than the rate adopted for the ephemeris it will soon precede the zero meridian of System II., the spot gaining 5 degrees per month. On September 1, 1919, the object will precede zero longitude by 40° , or about 66 minutes, and at the end of the year by 60° , or 100 minutes, and the spot must therefore be expected central at these intervals before the passage of the zero

meridian of System II. This conclusion is based on the rate of its rotation during the first eight months of 1918, which was *gh. 55m. 31^s.55*. The transits of the λ .M., System II., of Jupiter on various dates are as under in 1919:—

H. M.			H. M.		
Jan.	1	9 55 p.m.	Sept.	2	4 31 a.m.
"	11	8 9 "	"	14	4 29 "
"	28	7 9 "	"	26	4 25 "
"	30	8 48 "	Oct.	11	1 52 "
Feb.	13	10 20 "	"	6	0 56 "
"	28	7 46 "	Nov.	28	11 13 p.m.
Mar.	14	9 21 "	"	25	11 54 "
"	31	8 28 "	Dec.	5	10 9 "
Apr.	14	10 5 "	"	15	8 24 "
May	1	9 14 "	"	24	10 47 "

The times for other dates may be found by adding periods of *gh. 55m. 40s*.

Note.—Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as *gh. 55m. 30s*. System II. applies to the Temperate Zones, and in this the time of rotation is *gh. 55m. 40^s.63s*.

SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of three bright rings and an inner dusky ring through which the body of the planet can be seen. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Of the three bright rings the middle is the brightest. When the Earth is in the plane of the rings they are invisible except in the field of a good telescope, on account of their thinness. Also, on the rare occasions when the Sun and Earth are on opposite sides of their plane, the rings will be invisible to us. A remarkable observation of an occultation of a small star by Saturn's ring made in 1917 showed that the star could be seen through the outer ring. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. His figure shows a bulging at his equator,

the ratio of the polar to the equatorial diameter being as 14 to 15.

Saturn has ten satellites, situated outside the rings, some of which are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is about the same size as our satellite.

URANUS.

Discovered by William Herschel at Bath in 1781, this planet is only just visible to the naked eye. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than $4''$ in diameter, and by the quality of his light, which is less piercing than that of the stars. Very little is known about his surface markings, but a rotation period of 10 hours 49 minutes has been inferred from the observed variability of his light, which has been supposed to be due to some specially reflective spot coming into the Sun's rays. A determination of the rotation period by the spectroscopic method agrees with this. Uranus will be favourably situated for observations in the autumn months in 1919.

NEPTUNE.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. He will occupy nearly a stationary position in Cancer, and may be observed with best effect in the early months of this year.

THE MOON.

Neither Mercury nor Venus, so far as is known, has a satellite; the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. When viewed through a telescope, charts of very great accuracy can be made of her surface, as she has no appreciable atmosphere to obscure the more delicate markings. With a powerful telescope the Moon may be brought apparently within about 500 miles, so that any changes which might occur over large tracts of country could be easily distinguished: cities might be distinguished perhaps from cultivated fields. The Moon's surface shows signs of tremendous volcanic action; craters are abundantly found over it, which vary greatly in size and are crowded closely together. Only one side of the Moon is seen, and from this fact we infer that she must turn on her axis in the same time that

she moves round the Earth. As there is no sign of water or vapour on the disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature: in the lunar day of half a month it must be heated to a very high temperature, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles, and her rate of motion through the firmament $13^{\circ} 10' 35''$ per day and $32' 56''$ per hour. Thus she travels over a space slightly exceeding her own diameter in one hour. The actual time, she takes to move around the Earth is 27d. 7h. 43m. 11.5s., but the time from one New Moon to another is 29d. 12h. 44m. 3s. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. The phases of the Moon occur because only a half of the lunar sphere is bright at any one time, and we on the Earth may, or may not, be in a position to see the whole of that bright hemisphere.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is this difference—that a lunar eclipse is visible to all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but because the Sun's light is scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a dark copper-coloured disc. From what has been said above, it will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

In a note on page 54 it is stated that the small daily retardation of moonrise, which is the essential characteristic of the Harvest Moon, occurs each month, though not always at the Full Moon. As this small retardation happens earlier, lunation by lunation, by 2 or 3 days only, in the lunations which precede and follow the Autumnal Equinox it happens when the Moon is not far from Full, and the three Full Moons at this period partake in some degree of the character of Harvest Moon. The position of the node of the Moon's orbit has an effect on

this minimum retardation of rising, so that its amount is different in different years. The retardation depends essentially on the inclination of the lunar orbit to the horizon at time of moonrise, therefore in some degree it is a question of latitude; but apart from this, when the Ascending node of the Moon's orbit is *oh*, the inclination, and therefore the daily retardation, is small. In the year 1913 the longitude of the node in September was 354° , and the difference between time of rising on consecutive days at Full Moon was 8 or 9 minutes only. The present position of the node does not give such a small minimum retardation as this, and it tends to make it occur at the Full Moon before that in September. Though there are these differences in the details of the phenomenon, the expression "Harvest Moon" is held to apply in all cases to the Full Moon which happens nearest the Autumn Equinox, whilst that which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and $3\frac{1}{2}$ –5 miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles; highest summit (Huygens) reaches 18,000 feet.

Aristarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a bright spot when all the surrounding region is involved in shadow.

Mare Crisium.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon, and about 142 miles in diameter. Situated on S. limb.

Copernicus.—N.E. of centre. Large crater, 56 m. in diameter, surrounded by a mountainous wall, and including a central hill with several peaks.

Cassendi.—Near E.S.E. limb. A conspicuous walled plain, 55 miles broad. Its highest point is nearly 10,000 feet above the interior.

Langrenus.—Near W. edge. A splendid object when the sun has just risen over it. Has a central hill and a multiple ring around it about 9,600 feet high.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

The various formations may be readily identified by reference to a lunar map and catalogue, many of which have been published, and are fairly comprehensive.

Other Satellites.

All the planets outside our own in the Solar system possess attendant moons: thus Jupiter has nine, and Saturn ten. Four of Jupiter's moons and one of Saturn's are visible in small telescopes, but the rest are nearly all very faint and require powerful instruments. In all 27 satellites are known within the Solar system, and of these seven have been discovered during the last 25 years. Satellites VIII. and IX. of Jupiter, Phoebe, the four satellites of Uranus, and the satellite of Neptune all have retrograde motion *i.e.*, they circulate about their primary in the opposite direction to the motion of the other bodies of the Solar system. The satellites of Jupiter are generally known by their numbers, as shown by the Roman figures, which follow the order of discovery.

COMETS.

In addition to the planets, there are other interesting objects belonging to the Solar system, called comets. Some of these revolve in elliptical orbits, and the periodic times of those whose return has been observed ranges from $3\frac{1}{2}$ to nearly 80 years, whilst computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from $3\frac{1}{2}$ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their paths extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets. The following are the approximate months when some of the members of this family may be expected to return to perihelion in 1919 and 1920:—

Expected Return.	Period in Years.	Name of Comet and Year of Discovery.
1919. August.....	6.640..	Kopff 1906
September.....	6.857..	Holmes 1892
October.....	6.540..	Vinkay 1886
1920. January ...	5.678..	Tempel Swift 1869
April.....	6.400..	E. Swift 1894
June.....	6.583..	Giacobini 1900
July.....	5.279..	Tempel 1873

The comets of this class move in elliptic orbits not much inclined to the Ecliptic. Without

exception they travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two thirds have a retrograde (westerly) motion.

There are other families of comets, none so large as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for reasons similar to that given above. Halley's comet belongs to the Neptunian family.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. On examination of the light of comets with the spectroscopic, it appears to consist of carbon in various forms, and cyanogen has also been detected. These materials exhibit themselves as bright bands. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS.

Another class of objects which belong to the Solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, which are all the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena. 1916 will be known as rather a notable year in this branch of astronomy, since it provided a remarkably abundant and previously unknown stream on June 28, having a distinct connexion with Pons-Winnecke's periodical comet, the orbits being nearly the same. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. On December 3, 1917, a meteor was observed from S.E. Scotland which came to earth in Perthshire in several pieces, one of which weighed as much as 22 lb. This is known as the Strathmore meteorite.

No.	Epoch 1919.	Rebut Point R.A. Dec.	Name of Shower.

24	Dec. 1—14	108° 33'	♄ Geminids.

THE PERSEIDS.

This is the most regularly recurrent and long-continued display of the whole year. It begins to be visible early in July, and ends at about the close of August. The radiant shows a motion to the E.N.E., and its positions on eight nights are:—

July 8.....	9° +46'	Aug. 1.....	33° +55'
" 14.....	14° +48'	" 7.....	40° +56'
" 20.....	20° +51'	" 13.....	48° +57'
" 26.....	26° +53'	" 19.....	57° +58'

THE AURORA BOREALIS.

This phenomenon is one of the most uncertain as regards its occurrence and particular aspect, though it chiefly manifests itself at pretty regular intervals of about eleven years, and seems to be associated with magnetic disturbances and Sun-spots, which have similar periods. There were conspicuous displays of aurora on December 16, 1917, March 7, 1918, and on May 16, 1918. The northern sky should be scanned on clear nights in order to detect any undue luminosity there in the form of streamers, arches, or condensations, and it is desirable to record the varying phases and times of the

features observed. The aurora is sometimes regarded as showing the outer limit of our atmosphere, and its height has been determined. The general result is that the height of an aurora is between 50 and 200 miles. The great majority are about 60 miles high, and there are few above 200 miles. There is some suggestion that, with magnetic storms, the period of their appearance follows that of the Sun's synodic rotation (27½ days).

THE ZODIACAL LIGHT.

This is another little understood appearance in the skies, and as such merits further attentive study from observers. It shows as a band of faint light stretching up slantingly from the Sun chiefly on the mornings of October and evenings of March. Whether it is a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems is uncertain. It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain, but its true nature is not clearly distinguishable on the evidence before us.

The Stellar System.

FAR beyond the confines of the Solar system are the Stars, apparently scattered about without any particular plan. To us they appear fixed on the interior surface of a hemisphere of which the observer is the centre. Actually they are at great and very various distances from us, and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is one of the aims of modern astronomy to investigate the method of distribution of these bodies in space, and their possible movements.

THE CONSTELLATIONS.

In the earliest ages the stars were formed into groups named from some fanciful resemblance to men, animals, or mythological personages, and these names of the constellations have come down to us and still play a part in astronomical nomenclature. It has been said that the constellations were designed about five thousand years ago by a people living somewhere near the valley of the Euphrates, but the statement is necessarily conjectural. To some of the brightest stars names were given—the star Arcturus is mentioned in the Book of Job—and many of these names survive and are in general use. More commonly stars are distinguished by a method designed by Bayer in the early part of the seventeenth century, who assigned a Greek letter to the individual stars of each constellation, the brightest star of the configuration being generally, but not invariably, called α , the next brightest β , and so on. Arcturus, according to this scheme, is therefore known also as α Bootis. When the letters were insufficient in number for the stars of a constellation, the Roman alphabet was brought into use in continuation. There are said to be about 10,000 stars visible to the naked eye in the whole celestial sphere, the number including the cases where two or more faint stars close together combine to form one which is so visible. The number naturally depends on the effi-

ciency of the observing eye and the clearness of the atmosphere, and the estimate will be less generous if stars to magnitude 6.0 and no fainter are included, which is sometimes taken as the limit of naked-eye visibility. The whole number of stars down to this limit of magnitude is 4,300, of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid. The action of a faint light imperceptible to the eye makes an impression on the photographic plate when continued for a long time, and hence the number of stars recorded increases as the time of exposure is lengthened. One hundred millions is an under-estimate of the number of stars already photographed, and it may be supposed that this number would be much increased with increased exposure. Stars are divided into classes according to their magnitude or brightness, the brightest being of zero magnitude, and stars of magnitude 9 being those just visible in a telescope with an object glass of 1 inch diameter. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th magnitude. A star of magnitude 21 has been photographed.

THE MILKY WAY.

It is believed that the great mass of the stars that we are considering are arranged in space in a form which may be likened, in homely simile, to that of a bun or lens. In other words, our stellar Universe is considerably flattened on both sides, and the median plane is marked out in the sky by the band of star cloud of irregular shape which is seen crossing the sky on a clear night, known as the Milky Way or Galaxy. Our Sun is not precisely at the centre of the bun, but is probably not far distant from that point. Any estimate of the size of this Universe of stars can at present be little more than conjecture, but it may be considered that the radius of the section in the median plane is at least of the order of 2,000 light years (see page 91).

and that the height, or the radius at right angles to that plane is estimated to be a quarter or a third of this distance. This Universe is more densely populated in the region of its central plane, called the Galactic plane, than elsewhere. On either side of it the stars lie thick, but the number becomes progressively less as the distance from that plane increases, until at the poles they are relatively few. Around the circumference of the bun is a huge ring or girdle made up of stars, generally very faint, because of their distance, clusters of stars which appear like stellar clouds, and nebulae. These agglomerations of celestial matter make up the appearance we recognise as the Milky Way. Its distance from the centre of our stellar system, just described, is again a matter almost of conjecture, but it may not be far, as stellar distances go, from its outer limits; in fact, it has been reasoned that the stellar system and the nearest parts of the girdle commingle. It is suggested that within the space which comprises the Universe of stars there is dark obscuring matter which is the immediate cause of some of the dark patches in the Milky Way. As seen in the sky the Galaxy always passes through the same constellations, sharing with them the diurnal motion, but its direction bears no special relation to the direction of the Ecliptic, Equator, or horizon. Such a relation is not to be expected, for these three planes pertain only to our Sun and Earth, which are minor bodies of the Cosmos of which the Galaxy is a main outstanding feature.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them. The spectral types are marked by the letters O, B, A, F, G, K, M, and the order as written is supposed to indicate the order of evolution or growth of stars. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen, and have some affinity to planetary nebulae. Stars whose spectra range between A and F—and it is to be

remarked that there is no rigorous line of division between the classes—are white or blue stars, and in their spectra the absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls within the group F to G. The spectra of the remaining classes, K to M, indicate a lowering of temperature, and the stars are red. Antares, Betelgeuse, and a Hercules are notable stars of this type.

STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. Formerly the 6th magnitude star, No. 1830 in Groombridge's catalogue, which moves through 7" a year, was known as the Runaway Star because of its rapid movement; but in 1916 Prof. Barnard found a faint star with an annual proper motion of rather more than 10", which for the present is the largest known. Consideration of these proper motions has led to the conclusion that they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallax motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19.5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, but the precise position of this point is not yet known. This movement of 19.5 kilometres per second being established, if by any means it is possible to find out the mean parallax motion of a group of stars, the mean parallax, or distance of this group from us, follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base line with which to measure the distances of the stars.

The last column of each table shows the actual brightness compared with that of our Sun. The Sun is here taken to be a star of magnitude -26.7 on the Stellar scale. α Centauri.—The components of this binary are combined. Besides its two larger components there is a star near α Centauri which is perhaps a member of the same system and must be the least luminous star known.

DISTANCE OF THE STARS.

The determination of a star's distance or stellar parallax is a matter of difficulty, and the distances of less than 1,000 stars have been found by the direct method, which consists in measuring the minute difference of direction of the star, as seen from opposite points of the Earth's orbit. Recently a more rapid method has been evolved for finding the distance of a star by examination of its spectrum, and already a list of the parallaxes of 500 stars determined in this way has been published. If a sphere be assumed round the Sun as centre with a radius of a hundred billion miles, there are within it, so far as is known, only 20 stars. The nearest of these is the bright star α Centauri and its companion. They are not all first magnitude stars, but all have large proper motion. The ordinary astronomical unit, or distance of the Sun from the Earth, is not sufficiently large to conveniently express the immense distances of the stars. A common unit is the "light year," or the distance that light travels in one year, which in miles is approximately a number formed by 6 followed by 12 zeros. A unit lately brought into use, the parsec (parallax of $1''$), is $3\frac{1}{2}$ times this, or 2 followed by 13 zeros. The parallax of α Centauri has been found to be $0.76''$, which would make its distance from the Earth 271,000 times that of the Sun, or about 25 million million miles. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is

THE VARIABLE STAR ALGOL (BETA PERSEI).

Approximate Times of Minima for 1919—max. $2\frac{1}{4}$, min. $3\frac{1}{2}$ mag.

The times are given to the nearest hour—M, signifies morning, A, afternoon.

The variation of the star shows a slight shortening of period.

NEW OR TEMPORARY STARS.

The most notable celestial phenomenon of the year 1918 was the outburst of a new star in the early part of June. The exact date when it sprang to naked-eye visibility is not decisively known, but it was seen by several persons on the night of June 8, when it was nearly equal in brightness to Altair (α Aquilæ). Its light increased in intensity, and on the evening of June 9 the star exceeded Vega in brightness. From that date the brightness declined somewhat rapidly and the star was of magnitude $3\frac{1}{2}$ at the end of the month. Except for some spasmodic increases the light declined with fair uniformity in the succeeding months, and the Nova appeared as a sixth magnitude star in

the best known. In general this star is of nearly the second magnitude, but at stated intervals of something less than three days it fades away to nearly the fourth magnitude, remains so for about 20 minutes, and then regains its light. The whole eclipse occupies about 9 hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table below. The position of Algol is given by R.A. 3^h 20^m. 46^s, Declination 40° 38' N.

Variable stars may be divided roughly into two classes, short-period variables such as Algol, and long-period variables, of which Mira Ceti may be taken as the type (see p. 50). There are other kinds of short-period variables besides those of the Algol type. The star β Lyre, situated at R.A. 18^h 47^m, Declination 33° 16' N., passes from minimum to minimum in about $6\frac{1}{2}$ days, the range of brightness being about a magnitude, but the star is peculiar because it is not at the same brightness at all the minima. The alternate minima are equal, whilst the brightness is the same at all the maxima. The Cepheid variables form a type which take their name from δ Cephei, a star in R.A. 22^h 26^m, Declination 57° 59' N. The average period of variation of stars of this class is about 7 days, and their peculiarity is that the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. There are stars more capricious in their variation than any of these, of which SS Cygni is a good example, but want of space prevents any further description of the details of this subject, which is now followed by observers and mathematical investigators from various points of view.

November. The brightness of Nova Aquilæ in its early days was greater than that of any Nova since the year 1604, and it was decidedly more brilliant than the Nova which appeared in Perseus in February, 1901. Its position is given by R.A. 18^h 44^m. 44^s, Declination 0° 29' 30" N., so that it is in the S.W. of Aquila and in the region of the Milky Way, as these stars generally are.

In the spectroscope the star exhibited a continuous spectrum with dark lines during its rise to maximum brightness, and in its second stage the broad bright bands due to hydrogen, accompanied by absorption bands which is a typical feature of New stars. The lines of the spectrum which indicate transition to the nebula stage appeared at the end of June, and were strongly

equivalent of January *ad. 10h. a.m.* in ordinary parlance, and January *ad. gh.* in astronomy is recognised as being January *ad. gh. p.m.* of ordinary life. In some special astronomical tables, the day begins at Apparent noon, or at the moment when the True Sun is on the meridian, but the abbreviation G.M.T. always indicates the time of a day which begins at Mean Noon.

The use of the astronomical day is of great antiquity, but proposals have frequently been made for its abolition and for the unification of astronomical and civil time. Such a proposal is again before the astronomical and nautical public. In 1918 views were exchanged and published on the question whether the astronomical data in the Nautical Almanac, and the time used for navigational purposes on board ship, should be based upon a day of 24 hours beginning at midnight. This system was adopted for military purposes during the year.

In this edition of this Almanack the day begins as hitherto, at midnight, and is divided into two periods, morning and afternoon, of 12 hours each. The hour which follows midnight is called 0, and that which follows noon is called 12. The only exception to this is in the ninth column of page 2 of each month, where the beginning of the sidereal day is given in astronomical time.

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars. This is of uniform length, and is divided, like the mean solar day, into 24 equal hours, which are shorter than a solar hour by about 9.83 seconds of mean time. In actual observatory practice time is measured, and the standard clock is regulated by this rotation of the Earth with respect to the stars, and Mean

1916. May 21d. 2h. a.m. to Oct. 1d. 2h. a.m.	} The hour being Greenwich Mean in each case.
1917. April 8d. 2h. a.m. to Sept. 17d. 2h. a.m.	
1918. Mar. 24d. 2h. a.m. to Sept. 30d. 2h. a.m.	

Solar Time is derived from Sidereal Time by computation (see p. 78). The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian, or are due south, and comparison of this with the known or calculated time of transit will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing the instant by the Mean Time clock when the stars cross the meridian. On the following page are given the times of transit, to the nearest minute of ten such stars on two days in each month. From these the time of transit on other days may be inferred.

As the sidereal day is about 4 minutes shorter than the mean solar day (see page 78), it begins earlier day by day by about that amount. The instant of the beginning of the sidereal day in G.M.T. is given on p. 2 of each month.

"Summer" Time.

In the spring of 1916 the Government adopted as an advantage during the war the principle of a scheme proposed by Mr. William Willett about the year 1907 and an Act was passed, known as the Summer Time Act (1916), the first clause of which runs: "During the prescribed period in each year in which this Act is in force the time for general purposes in Great Britain shall be one hour in advance of Greenwich Mean Time." The second clause ordained the period during which the Act should be in force in 1916, and that His Majesty may in any subsequent year during the present war declare by Order in Council any period in which the Act shall be in force. A committee appointed to consider the working of the Act in 1916 reported in its favour, and Summer Time was again used in 1917 and 1918. The prescribed periods have been:—

Astronomical Glossary.

Right Ascension, Declination.—The heavenly bodies appear to be affixed to the inner surface of a sphere of which the observer is the centre, and this celestial sphere is supposed to be marked with meridians and parallel circles just as is the terrestrial globe. The central of these circles is the extension of the Earth's Equator. On the celestial sphere Right Ascension is the counterpart of longitude on the Earth. Declination is the counterpart of terrestrial latitude.

The Ecliptic.—The extension of the plane of the Ecliptic (see p. 82) marks a circle round the celestial sphere called the Ecliptic. The position of the Ecliptic in the sky may be traced approximately in the sky by the moon and planets which always lie near it. The Sun is always in the Ecliptic.

The First Point of Aries.—The Ecliptic and Equator intersect in two points, the Sun being at one of these at the Spring Equinox. This point is called the First Point of Aries, and this is taken as the zero point from which Right Ascension is measured.

A similar system of circles parallel to the Ecliptic, with meridians at right-angles to them, is imagined, and the position of a heavenly body with reference to these is called its celestial latitude and longitude. Celestial longitude is

also measured from the First Point of Aries, and does not differ greatly in amount from Right Ascension.

The R.A. and Dec. of a Star, except for small changes due to Precession and Proper Motion (see pp. 81 and 90) are constant. The R.A. and Dec. of a Planet change because of the movement of the Earth and Planet round the Sun. The Right Ascension of the Sun continually increases because of the Earth's movement.

Opposition.—Since the Earth and planets move round the Sun at different rates, the Earth will at certain times pass between the Sun and an exterior planet, and the latter is then said to be in Opposition. The longitude of the planet measured from the Earth differs from that of the Sun by 180°, and the planet is in the South at midnight.

Conjunction.—When the Earth and an Exterior Planet are in line with the Sun, the latter being between the two other bodies, the Planet is in Conjunction, and the Sun and the Planet have the same longitude. For Mercury and Venus, this configuration is called Superior Conjunction. When either of these planets is in line with the Sun and Earth and between these two bodies, it is said to be in Inferior Conjunction. A planet in either kind of Conjunction (contd. on p. 97)

GREENWICH OBSERVATORY.

John Flamsteed (a protégé of Sir Jonas Moore, the mathematician, and of Sir Christopher Wren, the architect) was appointed "Astronomical Observer" by Charles II., by royal warrant dated 4 March, 1675. A building designed by Wren to serve as an observatory and habitation for the observer, and "a little for pomp," as he said, was erected at a small cost on the site of an old tower or castle on a hill in Greenwich Park, which has since been supplemented by another and more commodious edifice.

ASTRONOMERS ROYAL.

John Flamsteed	1675
Edmund Halley	1720
James Bradley	1742
Nathaniel Bliss	1762
Nevil Maskelyne	1765
John Pond	1811
Sir George Biddell Airy, K.C.B.	1835
Sir William Henry Mahoney Christie, K.C.B.	1881
Sir Frank Watson Dyson	1910

IN the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian. A law passed in France in the year 1891 made the mean time of the Paris Observatory the legal time for France and Algeria, but this has since been altered, and Greenwich Time is now the Standard for these countries. There are other examples of the adoption by nations of the time of their own capital as the Standard Time of the country, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now the majority of the countries of the world use as Standard Time the time of some meridian which differs from that of Greenwich by a multiple of 15°, and the Standard therefore differs from Greenwich Mean Solar Time by an integral number of hours, either fast or slow. In a few cases differences including a half hour have been adopted.

The countries in which Standard Time according to this scheme has been adopted are given in the accompanying table. In the large territories of the United States and Canada it has been found expedient to adopt five different standard times, the territories being divided into five by meridians, 7½° on either side of the five central meridians. This arrangement is not strictly adhered to, but towns and cities near the dividing lines adopt which of the two times is the more suitable to railway or local requirements. The same plan is followed in Brazil, which is divided into three zones, in which the time, 3 hours, 4 hours, or 5 hours slow on Greenwich, is adopted as standard respectively.

Fast or Slow on Greenwich Time.	
12 hours fast.....	Fiji Islands.
11½ " fast.....	New Zealand.*
10 " fast.....	Victoria, New South Wales, Queensland, Tasmania.
9½ " fast.....	South Australia.
9 " fast.....	Japan, Corea.
8 " fast.....	West Australia, East China, Hong Kong, Philippine Islands, Formosa Islands, North Borneo and Labuan, Macao, Portuguese Timor.
7 " fast.....	Straits Settlements.
6½ " fast.....	Burma.
5½ " fast.....	India.
5 " fast.....	Chagos Archipelago, Portuguese India.
4 " fast.....	Mauritius, Seychelles.
3 " fast.....	Italian Somaliland.
2 " fast.....	Turkey, Greece, Bulgaria, Roumania, Russia (time of Pulkovo 2 hours 1 minute fast on Greenwich), Egypt, Orange River Colony, Transvaal, Natal, Cape Colony, Portuguese East Africa.
1 hour fast.....	Sweden, Norway, Denmark, Germany, Luxembourg, Austria, Hungary, Switzerland, Italy, Bosnia, Serbia, Western Turkey, Malta, Portuguese West Africa, South-West Africa.
½ " fast.....	Nigeria.

Greenwich Time ...Great Britain, Ireland, France,
Belgium, Spain, Portugal,

Fast or Slow on
Greenwich Time.

		Farøe Islands, Gibraltar, Algeria, St. Thomas and Princes Island.
1 hour slow	Iceland, Madeira, Portuguese Guinea, Sierra Leone.	
2 hours slow	Azores, Cape Verde Islands, Fernando and Trinidad Island (Brazil).	
3 " slow	Eastern Brazil.	
4 " slow	Eastern Provinces of Canada, the Leeward Islands, Central Brazil.	
5 " slow	Western Labrador, Quebec, Ontario to 82° 30' W., New Brunswick, Eastern Zone of the United States, Jamaica, Bahama Islands, Peru, Panama, Western Brazil.	
6 " slow	Central Zones of Canada and United States, Honduras.	
7 " slow	Mountain Zones of Canada and the United States.	
8 " slow	British Columbia, and Pacific Coast Zone of United States.	
9 " slow	Yukon, Alaska.	
10½ " slow	Sandwich Islands.	
11½ " slow	Samoa.	

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European. The time appropriate to Eastern Canada, 4 hours slow on Greenwich, has been called alternatively Maritime, Inter-Colonial, and Atlantic Time. The standard times in use in the other four zones of the North American continent are called respectively Eastern, Central, Mountain, and Pacific Time.

It will be inferred from the above table that when it is noon at Greenwich on any day of the week, it will be midnight of that day in the Fiji Islands but half-past twelve in the morning of that same day in Samoa. In other words, at half an hour after midnight of Wednesday in Samoa, it is midnight of Thursday in Fiji, though these two places are separated by a comparatively short distance. In an ocean-going ship travelling westward this fact necessitates the omission of a day from the week, and in the case supposed, Thursday would be omitted from the log and the record would pass directly from Wednesday to Friday.

ZONE TIME AT SEA.

A scheme is being considered officially to extend the Zone Time system to the use of ships at sea. The time kept by the clocks used for ordinary life on board a vessel has hitherto been a time which corresponds approximately to the longitude in which she then is, and that this may be so the timekeepers have been altered at some arbitrary moment of the day, by an arbitrary amount. It is now proposed that the clocks shall show the time of the hour-zone in which the vessel is at any moment, an adjustment being made at about the time the ship enters that zone. The zones will be numbered for this purpose +1, +2, +3, ... Westward from Greenwich, -1, -2, -3, ... Eastward, and the number of the zone is to be shown prominently on the clock. The object of this arrangement is that the number of the zone, as well as the time, may be given in any record made, and the corresponding Greenwich Time can then be readily inferred by addition or subtraction as shown by the sign.

* It is proposed that the time of New Zealand shall be altered to 12 hours fast on Greenwich.

SCIENTIFIC CHRONOLOGY is not yet a hundred years old, and in so far as it deals with the age of the world in which we live, it may be said to have its origin in the researches of geologists and ethnologists in the nineteenth century. These researches led to the discovery of extinct mammals buried under a surface which was calculated by geologists to have required many thousands of years in formation. The geological measure of time is the period occupied in the stratification of rocks, with allowances for intervals between the periods. By this measure the conjectural age of the World varies from 40 to 100 million years.

Geological Chronology.—The periods of stratification of the Earth's crust are classified by geologists as shown in the following list, each period having sub-divisions:—

I. Eozoic.

II. PALÆOZOIC OR PRIMARY.

- i. Cambrian.
- ii. Silurian.
- iii. Devonian or Old Red Sandstone.
- iv. Carboniferous.
- v. Permian.

III. MEZOZOIC OR SECONDARY.

- i. Triassic.
- ii. Jurassic.
- iii. Lower Cretaceous.
- iv. Upper Cretaceous.

IV. CAINOZOIC OR TERTIARY.

- i. Eocene.
- ii. Oligocene.
- iii. Miocene.
- iv. Pliocene.

V. QUATERNARY OR POST-TERTIARY.

- i. Pleistocene or Glacial.
- ii. Recent or Post-Glacial.

No dates are assigned to these periods, as they are too indefinite and remote for comprehension. Traces of human life are found in V. i. and ii., which correspond with the Eolithic, Palæolithic, Neolithic, Bronze, and Iron Ages of our next paragraph.

Ethnological Periods.—The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only. The terms in use are:—

1. Eolithic, or Dawn of the Stone Age.
2. Palæolithic, or Older Stone Age.
3. Neolithic, or Later Stone Age.
4. Bronze Age.
5. Early Iron Age.

Of these periods the last three can be dated for Europe as follows:—

Neolithic ends about 2000 B.C.

Bronze Age ends about 1000 to 500 B.C.

Early Iron Age from about 500 B.C.

Various systems of Chronology are dealt with in alphabetical sequence in the following list:—

Abyssinian.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D.

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology with the era of the founder of their Empire. Their epoch corresponds to 20th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century James Ussher, Archbishop of Armagh, adopted the system, and *Ussher's Notation* was thenceforward printed in marginal notes to the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Chinese.—In 1913 the Chinese Republic adopted the calendar of Western Europe.

Christian.—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Anno Domini*). The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, and the 4714th year of the Julian Period. The Christian Era commenced originally on 25th March, but in England Christmas Day was adopted as the beginning of the year from the seventh to twelfth centuries, after which time the Annunciation (25th March) prevailed until January 1 was adopted at the reform of the calendar in 1752. The reform of 1752 (see also "Roman Chronology" below) omitted 11 days from the year in order to connect the civil and astronomical years, and thenceforward the *New Style* was adopted, the previous period being known as the *Old Style*. Through the omission of the extra day in 1800 and 1900 (which were not leap years) the difference between the Old and New Styles is now 13 days. The Eastern Church employs the Old Style, and a Greek and Russian calendar for 1919 will be found on p. 98.

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyuga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1919 A.D. is, therefore, the year 1976 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1919 A.D. is 1841 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish.—In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1919 A.D. is *Anno Mundi* 5680 in the Jewish Calendar. A calendar for 5679–5680 will be found on p. 98.

Julian Period.—“A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting of the product of the number of years in the solar and lunar cycles and the cycle of the indiction ($28 \times 19 \times 15$).”—*New English Dictionary*.

Macedonian.—The epoch was the occupation of Babylon by Seleucus Nicator in 311 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

Muhammadan.—The Muhammadan Epoch is the Hejira, or Flight of Mahomet, from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadan Era corresponds to 16th July, 622 A.D. The year 1919 is therefore 1337–1338 of the Hejira, a calendar for which year will be found on p. 98.

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1919 is, therefore, 1288 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which they signified by the abbreviation A.U.C., *Ab Anno Urbis Condite* (From the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution: it was revised and reformed in 46 B.C. by Julius Cesar, and remained unchanged in Western Europe until the year 1752 A.D. The Julian year contained 365½ days, so that of every four years three were *Common Years* of 365 days and the fourth a *Leap Year* of

366 days. But this system made the civil year longer than the astronomical year, the difference being 3 days in 400 years, so that in the year 1752 A.D. there was an error of 11 days. Under the reformed scheme 3 leap years are omitted in each 400 years, and the years 1800 and 1900 each consisted of 365 days only. The year 2000 will be a leap year, the next subsequent end-of-century leap year being 2400.

CHRONOLOGICAL TERMS EXPLAINED.

Golden Number, so called from its importance in calculating the date of Easter, is the number of any year in a lunar cycle of nineteen years. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

Easter Day is the first Sunday after the *Paschal Full Moon* (i.e., the full moon which happens upon, or next after, March 21; if that full moon occurs on a Sunday, Easter Day is the Sunday after).

Epact.—The age of the Moon at the commencement of the year, thus indicating the difference between the solar and lunar cycles.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

ASTRONOMICAL GLOSSARY (continued from p. 93).

has the same longitude as the Sun, and therefore approximately the same Right Ascension.

Elongation of Mercury and Venus (see p. 84).

Stationary Points.—A line being supposed joining the Earth and a planet, at certain epochs on either side of Opposition, or of Inferior Conjunction in the case of Mercury and Venus, this line remains parallel to itself for some days, and the planet does not change its position among the stars.

Heliocentric Position.—For some purposes it is convenient to consider the position of a celestial body supposed to be seen from the centre of the Sun. In this convention the position is given in latitude and longitude, but the longitude is not

the same in amount as that referred to in the preceding paragraphs.

Full Moon.—When the Moon is in Opposition to the Sun, or distant from it by 180° of celestial longitude, it is said to be Full.

Occultations.—Because the Moon is near to the Earth, in its orbital motion it passes in front of and covers the stars which lie behind it. Bright stars can be seen up to the moment when they apparently touch the Moon's circumference, and the instant when this happens can be observed with accuracy (see p. 80). The light of faint stars is overpowered by that of the Moon, and these become invisible as the Moon approaches them, and the "Occultation" of these cannot be observed.

Sidereal and Solar Time (see p. 78).

To obtain the Sidereal Time corresponding to a given Mean Time, take from the second page of the month the Sidereal Time at the preceding Mean Noon. To this add the given Mean Time, with 12 hours added if the time is a.m., and also the acceleration for each item of the Mean Time (or Mean Time + 12h.) as given in the Table.

Example: To find the Sidereal Time which corresponds to Mean Time 8h. 35m. 27.58. a.m. on March 16

			Add.....			IN
			20	35	27.5	
Add Sidereal Time at Mean Noon, March 15.....			23	28	9.6	
Add acceleration for 20h.				3	17.13	
27.....	29	31			5.75	
27.....	29	31			27.58	08
Sum (less 24h.) = corresponding Sidereal Time.....						
20h. 77m. 0.13.						

To convert Sidereal Time into Mean Time, subtract the Sidereal Time at the preceding Mean Noon and convert this into Mean Time by subtracting the Retardation for each item.

JEWISH CALENDAR. (A.M. 5679 and part of A.M. 5680.)

ROMAN CALENDAR.

In the ancient Roman (Julian) Calendar the days of the month were not counted onward from

the beginning, as with us, but three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

The first day of a month being called its "Kalends," the last day of the preceding month is called the day *before* the Kalends (*pridie Kalendas*). Thus December 31 would have been written "pridie Kal. Jan." The day before that, December 30, is the third day of the Kalends, both the beginning and ending days of the interval being taken in the reckoning, and so on back to the Ides, and from thence again to the Nones.

THE COPTIC CALENDAR.

Year 1635.	A.D. 1919.	Year 1635.	A.D. 1919.
Tubah	Jan.	9 Masri	August 7
Amshir	Feb.	8 Intercalary	Sept. 6-11
Barmahat	March	10 "	Year 1636.
Barmudah	April	9 Tit	Sept. 12
Bashuns	May	9 Babah	Oct. 12
Bunah	June	8 Hatur	Nov. 11
Ahib	July	8 Kihak	Dec. 11

In the Coptic Calendar, used by part of the population of Egypt and Ethiopia, the year is composed of 12 months of 30 days each, followed by 6 or 5 Intercalary days according as the year is or is not a Leap-year. The Era of this Calendar is that of Diocletian, 284 A.D.

THE *Superficial Area* of the Earth is estimated to be 106,520,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926 English miles, and at the Poles 7,896 English miles. The *Equatorial Circumference* is 24,872.4 English miles, divided into 360 Degrees of Longitude, each of 69.09 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	400,000,000
Asia	17,000,000	910,000,000
Africa	11,500,000	180,000,000
North America...	8,000,000	120,000,000
South America...	6,800,000	38,000,000
Oceania	3,450,000	8,000,000
Polar Regions ..	5,000,000	...
	55,500,000	1,646,000,000

The British Empire extends over the largest area (13,123,000 sq. miles); Russia is the second largest country (8,400,000 sq. miles); France is third, with 4,330,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Arca.	Estimated Number.
Mongolian ...	Asia	655,000,000
Caucasian ...	Europe & Orient	645,000,000
Negro	Africa	190,000,000
Semitic	North Africa ...	81,000,000
Malayan	Australasia	54,000,000
Red Indian ...	America	23,000,000
		1,646,000,000

* The Earth is a Sphere, with a Northern and Southern Hemisphere; the Ocean surface is called the *Hydrosphere*, and the gaseous envelope the *Atmosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*. The study of the Races of Mankind is *Ethnology*, and of their location *Ethnogeography*. The study of extinct organic life is *Paleontology*, and of existing life *Biology*.

† If an airship, with a constant speed of 50 miles an hour, started from the Earth on a journey to the Sun on January 1, 1928, it would be nearly 220 years on the journey, as it would not arrive until Nov. 23, 2127! The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,872.4 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,000 miles an hour (530,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2200, at the present rate of increase.

THE LARGEST CITIES.

The following 48 cities have an ascertained population exceeding half a million, according to the latest census returns:—

LONDON (Greater), England (1914) ...	7,419,704
New York (Greater), U.S.A. (1914) (estimated)	7,300,000
PARIS, France (1911)	2,888,000
Chicago, U.S.A. (1916)	2,408,000
PETROGRAD, Russia (1915)	2,318,000
TOKYO, Japan (1913)	2,225,000
VIENNA, Austria (1914)	2,150,000
BERLIN, Prussia (1910)	2,071,000
Moscow, Russia (1913)	1,818,000
Philadelphia, U.S.A. (1916)	1,710,000
BUENOS AIRES, Argentina (1916)	1,597,000
Osaka, Japan (1916)	1,460,000
Calcutta, India (1911)	1,222,000
RIO DE JANEIRO, Brazil (1910)	1,130,000
Glasgow, Scotland (1911)	1,008,000
Bombay, India (1911)	980,000
Hamburg, Germany (1910)	931,000
WARSAW, Poland (1913)	909,000
BUDAPEST, Hungary (1910)	880,000
Birmingham, England (1911)	840,000
St. Louis, U.S.A. (1916)	757,000
Boston, U.S.A. (1916)	756,000
Liverpool, England (1911)	746,000
Manchester, England (1911)	716,000
Naples, Italy (1915)	698,000
Cleveland, U.S.A. (1916)	674,000
Milan, Italy (1915)	663,000

Cologne, Prussia (1910)	517,000
Breslau, Prussia (1910)	512,000
Hyderabad, India (1911)	500,000

Estimated Populations.

Canton (China)	1,250,000
PEKING (China)	1,000,000
CONSTANTINOPLE (Turkey)	1,000,000
Hankow (China)	900,000
Tientsin (China)	850,000
Fuchow (China)	650,000
Chungking (China)	600,000
Suchow (China)	500,000

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Oceans.		
Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,531,600	North Polar, 23,200
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,000	Caribbean, 20,568
Mediterranean	1,145,000	Pola Deep, 12,276
Behring	572,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	about 10,500
Hudson Bay	472,000	about 1,500
Japan	405,000	about 10,200
Amur	395,000	about 11,000
North Sea	221,000	Skagzerak, 1,998
Red Sea	178,000	20° N., 7,254
Baltic	158,000	about 12,000

THE HIGHEST MOUNTAINS.

Name.	Range.	Height in Feet.
Everest	Himalayas	29,002
Godwin-Austen (K 2)	"	28,250
Kanchanganga I.	"	28,146
Makalu	"	27,893
Tengri Khan	Thian Shan	24,000
Chumalhari	Himalayas	23,044
Aconcagua	Andes	22,668
*Sahama	Andes	22,349

* SPECIAL TRADE includes Imports retained for Home Consumption and Exports of Domestic Produce or Manufacture, and excludes Imports that are re-exported.

† GENERAL TRADE includes the total value of Imports and the total value of Exports, and the combined total under these two headings is given where the value of the Special Trade cannot be definitely ascertained.

Merchant Shipping Owned in each Country. — (Extracted from " Lloyd's Register Book," 1915-1916.)

Welsh Sovereigns and Princes.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I. and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfillment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

Surgeon in Ordinary, Edgar Seymour, M.V.O., M.B.

The Family of King Edward VII.

EDWARD VII., eldest son of Queen Victoria, born November 9, 1841; married March 10, 1863, Her Royal Highness Princess Alexandra (Caroline Marie Charlotte Louise Julia, born December 1, 1844 (QUEEN ALEXANDRA), eldest daughter of His late Majesty King Christian IX. of Denmark; succeeded to the Throne January 22, 1901; crowned at Westminster Abbey, August 9, 1902; died May 6, 1910. Their Majesties had issue:—

1. H.R.H. Prince ALBERT VICTOR Christian Edward, Duke of Clarence and Avondale and Earl of Athlone, born Jan. 8, 1864, died Jan. 14, 1922.

2. H.R.H. GEORGE Frederick Ernest Albert, Prince of Wales and Earl of Chester, Duke of Cornwall and York, Duke of Rothesay, Earl of Warwick and Inverness, Baron of Renfrew and Killarney, Lord of the Isles and Great Steward of Scotland, K.G., K.T., K.P., G.C.S.I., G.C.M.G., C.I.E., G.C.V.O., G.M.B.E., I.S.O., General and Admiral, born June 3, 1865; married July 6, 1893, to the Princess Mary of Teck; succeeded to the Throne May 6, 1910, as KING GEORGE V., *q.v.*

3. H.R.H. LOUISE Victoria Alexandra Dagmar, Princess Royal, born Feb. 20, 1867;

married July 27, 1889, to the late Duke of Fife. Issue:—

(i.) H.H. Princess Alexandra (Duchess of Fife), born May 17, 1891; married Oct. 15, 1913, to H.R.H. Prince Arthur of Connaught, K.G., and has issue (see p. 113).

(ii.) H.H. Princess Maud, born April 3, 1893.

4. H.R.H. Princess VICTORIA Alexandra Olga Mary, born July 6, 1868.

5. H.R.H. Princess MAUD Charlotte Mary Victoria (H.M. Queen of Norway), born Nov. 26, 1869, married July 22, 1896, to Haakon VII., KING OF NORWAY. Issue:—

H.R.H. Olav, Crown Prince of Norway, born July 2, 1903.

6. H.R.H. Prince ALEXANDER John Charles Albert, born April 6, died April 7, 1871.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the Civil List, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations, which were adopted by the House of Commons:—

Their Majesties' Privy Purse	£110,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Princess Christian of Schleswig-Holstein	6,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,200	Duchess of Edinburgh	6,000
Inappropriated	8,000	Duchess of Albany	6,000
	<hr/>	Princess Beatrice (Henry of Battenberg)	6,000
	£470,000	Duchess of Mecklenburg-Strelitz (<i>susp.</i>)	3,000
		King Edward VII.'s Daughters	18,000

THE CROWN LANDS.

The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000, and he net return to about £11,000.

In the year ended 31 March, 1917, the total Receipts by the Commissioners were £1,151,451, of which amount £651,845 was derived from Crown Rents, and £97,462 from the Mines. The Expenditure was £351,156, of which £329,366 represented the expenses of the Woods, Forests and Land Revenue, and £21,790 the Mines. The sum of £650,000 was paid to the Exchequer in 1916-1917, being a net sum from which no deductions have to be made for administration.

THE DUCHY OF LANCASTER.

Lancaster was erected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £29,000 in 1847, and amounted to £117,464 in the year ended 31 December, 1917. The con-

tributory items are Rents and Profits of Courts, £60,646; Royalties and Dues, £33,164. Expenditure: £8,964. Outlay for the benefit of the Estate; £24,711, deducted under various Acts of Parliament; £4,654. Allowances, Donations, and Charities; £2,000. Salary of the Chancellor of the Duchy; and £8,362. Expenses of Management. The sum of £58,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

THE DUCHY OF CORNWALL.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1917, was £194,816, and was derived principally from Rents and Profits of Courts, £122,343; Annuity in lieu of Tin Coinage Duties, £16,217; and Dividends on Stock, £8,150. The Payments include £24,237. Outlay for the benefit of the Estate; £46,880. Deductions under various Acts; £37,320. Allowances, Donations, and Charities; and £11,260. Expenses of Management. The sum of £50,000 was paid on account of His Royal Highness the Prince of Wales.

His Most Excellent Majesty **George the Fifth**, by the Grace of God King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Defender of the Faith, Emperor of India; only surviving son of His late Majesty King Edward VII. and of Her Majesty Queen Alexandra; *born at Marlborough House, June 3, 1865; married July 6, 1893, Her Serene Highness Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes, born May 20, 1897 (QUEEN MARY), only daughter of Her Royal Highness the late Duchess and His Highness the late Duke of Teck; succeeded to the Throne May 6, 1910; crowned at Westminster Abbey, June 22, 1911.* Their Majesties have issue:—

1. H.R.H. **EDWARD** Albert Christian George Andrew Patrick David, **PRINCE OF WALES** and Earl of Chester, Duke of Cornwall (Duke of Rothesay, Earl of Carrick, Baron of Renfrew, Lord of the Isles and Great Steward of Scotland), High Steward of Windsor, K.G., G.M.C.G., C.M.B.E., M.C., Col.-in-Chief, Cadet Corps of U.K., a Lieut., R.N., and Major, Grenadier Guards, *born June 23, 1894.*
2. H.R.H. **ALBERT** Frederick Arthur George, a Lieut., R.N., and Capt., R.A.F., *born Dec. 14, 1895.*
3. H.R.H. **Victoria** Alice MARY, Col.-in-Chief, Royal Scots Regt., *born April 25, 1897.*
4. H.R.H. **HENRY** William Frederick Albert, *born March 31, 1900.*
5. H.R.H. **GEORGE** Edward Alexander Edmund, a Naval Cadet, *born Dec. 20, 1902.*
6. H.R.H. **JOHN** Charles Francis, *born July 12, 1905.*

Clerks, T. G. Watson; R. H. Short.

HOUSEHOLD OF H.M. THE QUEEN OF NORWAY

(Princess Maud of Great Britain and Ireland).

Comptroller and Private Secretary, Col. Sir Henry
Knollys, K.C.V.O.

In a broad sense this heading is commonly taken as identical with the one that follows; but there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But, as further explained below, there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

THE HOUSE OF LORDS,

The *Magnam Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and of Representative Peers of Scotland and Ireland, together with such Scottish and Irish Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The full Assembly would consist of 2 Princes of the Blood Royal, 2 Archbishops, 20 Dukes, 29 Marquesses, 128 Earls, 60 Viscounts, 24 Bishops, 384 Barons, and 16 Scottish and 27 Irish Representative Peers: total 692. (Earl Curzon of Kedleston, one of the Irish Representative Peers, is included among the Earls.) See WHITAKER'S PEERAGE for complete table, showing numbers of Life Peers, Minors, &c. There are also 25 Ladies who are Peeresses in their own right, whose titles and names, along with those of Scotland, are given below at page 134. Female succession may occur in the Imperial Peerage in any Barony of England which was conferred by writ of summons; but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special remainders" have been granted to female relatives in the absence of males. We use the term "Imperial" as including the three series of Peers of "England" (up to June 20, 1707), "Great Britain" (thence till close of 1800), and "United Kingdom" (1801 onward).

SCOTTISH AND IRISH PEERS.

There are in all 86 Scottish Peers and 167 Irish, but of the total 253 there are 133 possessing Imperial titles and 121 without them. Of the 86 Scottish, 51 have Imperial titles and 16 are elected or re-elected every Parliament to sit in the Lords; and similarly of the 163 Irish 83 hold Imperial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are 77 which are inferior to the native ones, 29 are superior, 14 are identical in rank but differing in designation, and 13 are absolutely the same. Of the 5 Scottish Peeresses cited on page 134, that of Melfort is subject to a degree of doubt, so that the lady does not assume it. There are other lines in the Scottish Peerage which are open to female succession, and this is not subject to *abeyance* as in England. In the Irish Peerage, on the other hand, the only titles open to female succession are the Massereene Viscounty and the La Poer Barony, the latter now held by the Marquess of Waterford. It will be observed that Ireland possesses a great advantage over Scotland in the Lords as it does in the Commons, its native Peers who hold Imperial titles numbering, as just stated, 83 as against 51 of Scotland, and its elected Representative Peers 28 as against 16. An Irish Peer who holds no Imperial title has also the special privilege of being able to seek election to the Commons for any constituency not in Ireland itself.

Contractions.—S. or I. appended to the date of creation denotes a *Scottish* or *Irish* title: the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to S. or I. implies that the Peer is an elected Representative to the House of Lords. For the mark see heading to Marquesses; b. signifies born; s., succeeded; m., married; w., widower or widow; div., divorced; M., minor.

COMPLETE LIST OF THE PEERS.

PRINCES OF THE BLOOD ROYAL (2).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness. *Eldest Son or Heir*.

1910 Edward Albert Christian George Andrew Patrick David, Prince of Wales, Duke of Cornwall (1337) (*Scott. Duke, Rothesay*), K.G., b. 1894, s. 1910. (None)

Sir Charles Wyndham Murray, K.C.B.; Chamberlain, The Lord Chamberlain's Office.—G.C.B., Knight Grand Cross; K.C.B., Knight Commander; C.B., Companion—each marked (m) or (c) for Mil. or Civ. Division.

ORDER OF MERIT (1902)—O.M. Ribbon, Blue and Crimson.

This Order confers no precedence, but authorises the holders to place its designating initials next after those denoting membership of Grand Cross of the Order of the Bath. It is designed as a special distinction for men eminent in any department whatever—war, science, literature, or art—without in itself conferring a knighthood, though it happens that of the twelve originally appointed, all but one were either a Peer, Knight, or Privy Counsellor. The Order is limited in numbers to 24, with the addition of foreign honorary members. *Secretary and Registrar, Col. Sir Henry Charles Legge, K.C.V.O.*

THE MOST EXALTED ORDER OF THE STAR OF INDIA (1861).

Ribbon, Light Blue. Heaven's Light our Guide.

Sovereign, THE KING-EMPEROR; Grand Master and First and Principal Knight Grand Commander, Viceroy and Gov.-Gen. of India; Secretary (in India), John B. Wood, C.S.I., C.I.E.; Registrar, The Comptroller of the Lord Chamberlain's Department, St. James's Palace, S.W.—for the time being, Col. Sir Douglas Dawson, G.C.V.O., C.M.G.—G.C.S.I., Knight Grand Commander; K.C.S.I., Knight Commander; C.S.I., Companion.

THE MOST DISTINGUISHED ORDER OF ST. MICHAEL AND ST. GEORGE (1818),

Ribbon, Saxon Blue. Auspiciis melioris aevi.

THE SOVEREIGN; Grand Master, H.R.H. the Prince of Wales, K.G., G.M.B.E., M.C.; Prefect, Rt. Rev. Henry Hutchinson Montagu, D.D., Chancellor, The Most Hon. Marquess of Latham, K.G., G.C.S.I., G.C.M.G., C.I.E.; Secretary, Sir George Fildes, G.C.M.G., C.B.; King of Arms, Sir M. J. Glynne, G.C.M.G., K.C.B., L.S.O.; Registrar, H. C. M. Lambert, C.B.; Graduated Usher of the Privy Rod, Sir W. A. Alexander, Bt. Lieut.-Col. Hamilton, K.C.M.G., C.B.; Chamberlain, Colonial Office, S.W.—G.C.M.G., Knight Grand Cross; K.C.M.G., Knight Commander; C.M.G., Companion.

THE MOST EMINENT ORDER OF THE INDIAN EMPIRE (1878).

(Since enlarged five times.) Ribbon, Purple. Imperatrici auspiciis.

Sovereign, THE KING-EMPEROR; Grand Master, The Viceroy and Governor-General of India, for the time being; Secretary (in India), John B. Wood, C.I.E.; Registrar, The Comptroller of the Lord Chamberlain's Department.—G.C.I.E., Knight Grand Commander; K.C.I.E., Knight Commander; C.I.E., Companion.

THE ROYAL VICTORIAN ORDER (1896).

THE SOVEREIGN; Chancellor, The Lord Chamberlain; Secretary, The Keeper of His Majesty's Privy Purse; Registrar, Francis M. Bryant, C.B.E., M.V.O., L.S.O.—G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Member.

THE MOST EXCELLENT ORDER OF THE BRITISH EMPIRE (1917).

THE SOVEREIGN; Grand Master, H.R.H. the Prince of Wales; Prefect, Rt. Rev. the Bishop of London, King of Arms, Gen. Rt. Hon. Sir Arthur H. E. Pigot, C.B., K.C.V.O.; Registrar, The Comptroller of the Lord Chamberlain's Dept. (or officer); Secretary, The Permanent Under-Sec. of State for Home Affairs, or other; Graduated Usher of the Privy Rod, Sir Frederick G. Kenyon, K.C.B. For services rendered to the Empire, whether at home or abroad, open to both men and women. G.C.B.E., Knights Grand Cross or Dames Grand Cross; K.C.B.E., Knights Commanders; K.B.E., Dames Commanders; C.B.E., Commanders; O.B.E., Officers; M.B.E., Members.

ORDER OF THE COMPANIONS OF HONOUR (1917)—C.H.

This Order consists of one Class only and carries with it no title or precedence, but its initials are placed relatively after G.B.E., i.e., after Kts. Grand Cross. The number of awards is limited and is open to both sexes.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Bestowed in recognition of especial services in action of commissioned officers in the Navy and Army. The members are Companions only and rank immediately after the 4th Class of the Royal Victorian Order. A Bar is awarded for any additional act of service. The sequence of Companions, etc., is thus—C.B., C.S.I., C.M.G., C.I.E., C.V.O., C.B.E., D.S.O., M.V.O. 4th Class, O.B.E., L.S.O., M.V.O. 5th Class, M.B.E.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the SOVEREIGN, the Prince of Wales, and Companions (not exclusively made to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (200 European and 100 Native) and 250 to the services of Dominions, Colonies and Protectorates.

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Instituted in 1862, and enlarged in 1864, 1866, and 1880, but no fresh conferments are now made.

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1878.

THE ORDER OF ST. JOHN OF JERUSALEM.

The Order had its origin in Jerusalem and Acre, as an international lay confraternity for the relief of crusaders, and was later sovereign in Rhodes and in Malta, where its Knights kept galleys and galleons to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 till 1798. The work of the British Order is the control of the St. John's Ambulance and Brigade, and of the British Ophthalmic Hospital, Jerusalem. *Sovereign, King and Patron, H.M. King George V.; Grand Prior, H.R.H. Duke of Connaught, and a Chapter of about 350 knights of two degrees "Knights of Justice" and "Knights of Grace." There are also "Ladies of Justice," "Ladies of Grace," and Esquires. These distinctions are notified in the London Gazette, but do not confer any rank or title.*

THE VICTORIA CROSS (V.C.). Ribbon, Crimson for all Services.

Instituted in 1856, on the close of the Crimean War. It was designed primarily for the rank and file and non-commissioned officers, but is held also by all grades up to Field-Marshal and Admirals of the Fleet, and was extended to civilians who had borne arms against the Indian mutineers. In 1911 the decoration was extended to native officers and men of the Indian Army. Conjoined with the decoration is a pension, for non-commissioned officers and men, of £20 a year, with an additional £5 for each bar.

THE DISTINGUISHED SERVICE CROSS—D.S.C.—Instituted in 1914, in substitution for the Conspicuous Service Cross, 1901; is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander.

THE MILITARY CROSS, 1915—M.C.—This decoration is awarded to Captains, Lieutenants, and Warrant Officers in the Army and Indian and Colonial Forces. A Bar is added for any additional act of service.

THE DISTINGUISHED FLYING CROSS. 1918—D.F.C.—Designed for bestowal upon officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

THE AIR FORCE CROSS. 1918—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

THE MILITARY MEDAL.—1916: is worn immediately before all war medals, and is awarded to non-commissioned officers and men for individual or associated acts of bravery in the Field. In exceptional circumstances the Medal may be awarded to women, including foreign persons.

THE DISTINGUISHED SERVICE MEDAL.—Established 1914: is designated for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A., and to all other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war.

THE DISTINGUISHED FLYING MEDAL. 1918—D.F.M.—and the **MERITORIOUS SERVICE MEDAL**, for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

THE CONSPICUOUS GALLANTRY MEDAL.—Is bestowed upon warrant officers and men of the R.N.

THE DISTINGUISHED CONDUCT MEDAL.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

THE VOLUNTEER OFFICERS' DECORATION.—V.D.—Was an honour for rewarding the meritorious services of

officers of the force in question, who must have been in commission and have served twenty years.

THE TERRITORIAL DECORATION.—T.D.—Established in 1908; is restricted to commissioned officers of twenty years' good service in the Territorial Force, and not holders of the Volunteer Decoration. Similarly, a Territorial Long Service Medal has been substituted for that formerly awarded to Volunteers.

THE ROYAL RED CROSS.—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank, even foreigners, who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

THE ORDER OF MERCY.—Both sexes; was established in 1899 in connection with the LEAGUE OF MERCY, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

THE INDIAN ORDER OF MERIT.—Instituted in 1937, as a reward for personal bravery, to native Indian officers and men.

THE KAISER-I-HIND MEDAL.—Was founded 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

THE NAVAL GENERAL SERVICE MEDAL. (1915).—For officers and men of the R.N.; awarded for minor naval warlike operations where no other medal would be appropriate.

THE ALBERT MEDAL.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on Land."

Knights of the Bath, Star of India, &c.

(EXCLUSIVE OF THOSE HOLDING HIGHER RANK AS PEERS, BARONETS, OR KNIGHTS OF THE

GARTER, THISTLE, AND ST. PATRICK, &c.) *For Knights Bachelor, see pp. 153-157.*

Knights Bachelor.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are: *President*, Sir Henry Pelham, Kt., C.B.; *Hon. Registrar*, Sir William Bull, Kt., M.P.; *Secretary*, Willoughby Bullcock; *Registry and Liaison*, Clifford's Inn, E.C. 4.

A LIST OF THE GENTLEMEN WHO HAVE RECEIVED THE HONOUR OF KNIGHTHOOD. (Exclusive of such as have afterwards received the higher honour of K.C.B., etc., &c.)

-------------------------------------------------------------------------------------------------------------------------------

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Governments throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (b) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1916 the second Imperial Conference of Teachers' Associations should have been held in Toronto by invitation of the Government of Ontario, but had to be postponed owing to the war. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr. Louis Spitzel, has published a graded series of text-books on the Empire, under the editorship of Professor A. F. Pollard: (1) "The British Empire—Its Past, Its Present, and Its Future"

(a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. Cordial acknowledgment of the services of the League have been made by the Colonial Office, by His Excellency the Governor, and by the workers. A number of teachers from all parts of the Empire have been accredited to the League for courses of lectures and study in the schools. The School Affiliation and Comrades' Correspondence Sections were established in 1901-2. The latter numbers now over 37,000 members. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day. In 1913, through the generosity of Sir Robert Lucas Toth, the League established a Club for home and overseas members.

During the war the League has distributed from its depot over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and a shield to the several overseas contingents now fighting for the Empire. To all totally disabled soldiers also souvenir volumes of Shakespeare (in memory of Lord Kitchener) are being presented.

Amongst those who are Vice-Presidents and Councillors are many Overseas Governors and high officials.

Chairman, Executive Committee. The Headmaster, Winchester. M. J. Rendall, M.A.
Hon. Treasurer. Sir Philip Hutchins, K.C.S.I.
Hon. Secretary. Mrs. Ord Marshall, C.B.E.
Organ of the League. "The Federal Magazine."
Address. 48 Catherine St. Buckingham Gate, London, S.W. 1.

THE third Parliament of King George V. was elected in December, 1918, and met in February, 1919. The General Election had returned 478 supporters of the Coalition (334 Unionists; 133 Liberals; 11 Labour) and 229 Non-Coalition (63 Labour; 43 Unionists; 28 Liberals; 73 Sinn Feiners; 7 Nationalists; and 10 Independents), distributed as shown in the following table:—

	DISTRIBUTION OF MEMBERS.				PARTY STRENGTH (Jan., 1919).		
	Counties.	Boroughs.	Universities.	Total Members.	Coalition.	Non Coalition.	Majority.
England	230	255	7	492	401	91	310 Coalition.
Wales	24	11	1	36	21	15	6 Coalition.
Scotland	38	33	3	74	56	18	38 Coalition.
Ireland	80	21	4	105	—	105	105 Non-Co.
United Kingdom ...	372	320	15	707	478	229	249 Coalition.

Only successful candidates who received the recognition of the Prime Minister and Mr. Bonar Law are included among the supporters of the Coalition. Thus, the Irish Unionists are omitted from the Ministerialists, although, like many other Non-Coalition members, they are in general agreement with the Government.

POLITICAL PARTIES AND ORGANISATIONS.

LIBERAL. The *Liberal Central Association*, 21, Abingdon Street, Westminster, S.W. 1, is the official organisation and headquarters of the Liberal Party. *Liberal Whips' Dept.*, 21 Abingdon Street, S.W. 1. *Political Sec.*, R. H. Davies, C.B. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W. 1. The *Liberal Publication Department*, 42, Parliament Street, S.W. *Home Counties Liberal Federation*, 42, Parliament Street, S.W.; the *London Liberal Federation*, 41, Parliament Street, S.W.; *Devon and Cornwall Liberal Federation*, Clarence Chambers, Tavistock Road, Plymouth; *Eastern Counties Liberal Federation*, Cumbergate, Peterborough; *Lancashire, Cheshire, and North-Western Liberal Federation*, 37, Cross Street, Manchester; *Midland Liberal Federation*, Newton Chambers, Cannon Street, Birmingham; *Northern Liberal Federation*, Pilgrim House, Pilgrim Street, Newcastle-on-Tyne; *Western Counties Liberal Federation*, 2, Bristol Bridge, Bristol; *Yorkshire Liberal Federation*, 38, Boar Lane, Leeds; the *National Reform Union*, 50, Haworth's Buildings, Cross Street, Manchester; the *Eighty Club*, 3, Hare Court, Temple, E.C. 4; *League of Young Liberals*, Dacre House, Victoria Street, S.W. 1; *Liberal Social Council*, 92, Victoria Street, S.W. 1; the *Women's Liberal Federation*, 120, Victoria Street, S.W.; and the *Women's National Liberal Association*, 41, Parliament Street, Westminster, S.W. 1. The *Scottish Liberal Federation* is at 7, West George Street, Glasgow, and at 95, Princes Street, Edinburgh; the *Scottish Women's Liberal Association* is at the Glasgow office. The *Welsh National Liberal Council* is at 82, Queen Street, Cardiff.

UNIONIST.—The chief Unionist organisation is the *National Unionist Association of Conservative and Liberal Unionist Organisations*, 1, Sanctuary Buildings, Gt. Smith Street, Westminster, S.W. 1.

The *National Unionist Association* is a federation of Conservative and Liberal Unionist Associations and Clubs in England and Wales. The *Scottish Unionist Association* is at 2, Frederick Street, Edinburgh. The *Primrose League*, 64, Victoria Street, S.W. 1, founded in 1883, is an educating body, and aims at the Maintenance of Religion, of the Constitution, and of the Unity of the British Empire: *Grand Master*, Earl Curzon of Kedleston, K.G., G.C.S.I., G.C.I.E.; *Chancellor*,

The Earl of Crawford and Balcarres; *President Ladies' Council*, Miss Balfour; *Registrar*, F. Willis; *Clerk of the Council*, R. Bennett; *Organising Sec.*, H. Crowe. *Junior Imperial League*, 1, Sanctuary Buildings, Gt. Smith Street, S.W. 1; *Sec.*, H. H. Cannell. The *United Club*, Mitre Court Chambers, Temple, E.C. *Union Defence League*, 25, Victoria Street, S.W. 1. *Sec.*, P. G. Cambray.

LABOUR.—The Labour Party in Parliament is composed of 57 members. *Chairman*, Rt. Hon. W. Adamson; *Secretary*, H. S. Lindsay; *Whips*, W. T. Wilson, F. Hall, A. Smith, N. Maclean and T. Griffiths. The Party Organisation has its Head Office at 33, Eccleston Square, S.W. 1. *Women's Section*, *Chief Officer*, Dr. Marion Phillips.

SOCIALISTS.—*British Socialist Party*, Chandos Hall, 21A, Maiden Lane, Charing Cross, W.C. *Secretary*, Albert Inkpin. *Independent Labour Party*, 8 & 9, Johnson's Court, Fleet Street, E.C. 4. The *Fabian Society*, 25, Tot Hill Street, Westminster, S.W. 1. The *Reconstruction Society*, 58, Victoria Street, S.W. 1.

IRISH PARTIES.—The *United Irish League*. The *All for Ireland League*, founded by W. O'Brien, M.P. The Irish Unionist Party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin, and by the *Irish Unionist Council*, Old Town Hall, Belfast (*Sec.*, R. Dawson Bates).

FREE TRADE.—The *Free Trade Union*, 69, Victoria Street, S.W. 1.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W. 1. *Sec. (acting)*, G. Graham Anderson.

ELECTORAL REFORM.—*Proportional Representation Society*, 28 Victoria Street, S.W. 1.

NATIONAL PARTY.—Headquarters, 22, King Street, St. James', S.W. 1.

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poyning, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

SESSION 1917-18.

THE REFORM ACT.—When the consideration of the Representation of the People Act was resumed in Committee on Oct. 17, the day following that on which Parliament reassembled, the question of Irish redistribution was raised, and eventually a conference of Nationalist and Ulster representatives was set up to consider the matter, the decisions being subsequently embodied in a separate Bill. No changes of importance were made in the original redistribution schedule, and on Nov. 8 the Committee stage was concluded. During the Report stage the House decided, by a free vote, on Nov. 20 to give the Local Government vote to the wife of a Local Government voter in respect of premises in which they both resided, provided she was thirty years old. Fighting men were enfranchised at the age of nineteen; and on the following day, by 209 to 171, conscientious objectors were disfranchised until five years after the end of the war. Proportional representation in constituencies with seven or more members was again rejected on Nov. 23, but the principle of the alternative vote in three-cornered contests was confirmed. On Nov. 26 the Government clause giving a postal vote to absent Service men who could readily be reached, and a proxy vote to those in distant parts—which had been accepted in Committee—was agreed to for all time, instead of being limited to the duration of the war and a further twelve months. The Report stage was completed on Nov. 29, and on Dec. 7 the third reading was agreed to without a division, tributes being paid to Sir George Cave for his conduct of the measure. The House of Lords gave a first reading on Dec. 11, and a second reading on Dec. 19, after a good deal of criticism in a three days' debate. On the Committee stage, on Jan. 8, an amendment designed to disfranchise naturalised aliens for fifteen years was defeated by 84 to 69. The next two days were devoted to the question of women's suffrage on a hostile amendment introduced by Lord Loreburn, which was finally rejected by 134 to 71. A proposal to submit the matter to a referendum was next negatived by 90 to 62. A serious struggle between the two Chambers was initiated on Jan. 27, when the Peers considered an amendment introduced by Lord Selborne to apply "P.R." to any constituency returning not less than three or more than five members, the House adopting this suggestion on the following day by 132 to 42, and by 66 to 9 deleting the alternative vote in three-cornered contests. On the Report stage a new clause providing for the appointment of Boundary Commissioners to deal with the new system was agreed to, and the Bill was read a third time on Jan. 29. The Commons on the following day threw out "P.R." by 223 to 113, and subsequently restored the alternative vote by a majority of 8; but the Lords on Feb. 4 inserted an amendment, by 86 to 35, applying "P.R." as an experiment to all boroughs returning seven or more members, and again struck out the alternative voting scheme. The Commons disagreed with these two alterations; and finally the Upper House, at Lord Lansdowne's suggestion, adopted a section under which a Commission was to be appointed to prepare a scheme for the election of 100 members on the principle of "P.R.," the scheme, if adopted by both Houses, to come into operation with the whole measure. The Commons eventually

accepted this by 224 to 114, while by 184 to 166 they rejected a proposal to extend the idea to the alternative vote, which the Peers had again thrown out. The Bill received the Royal Assent on Feb. 6, at the same time as an agreed Bill redistributing seats in Ireland, based on the decisions of the Committee set up. The life of Parliament had previously been extended for a further period of eight months, by which time it was anticipated that the new register would be available; and the Session closed on Feb. 6.

MAN-POWER.—The Christmas recess was marked by a series of conferences between Sir Auckland Geddes, the Minister of National Service, and trade union leaders on the subject of releasing protected young men for the Army, and on the resumption of the Commons, on Jan. 14, the Bill to effect this object was read a first time. The measure abolished the two months' exemption given to certain men, and gave the authorities power to withdraw any certificates of exemption granted on occupational grounds. Sir Auckland explained that the Government would thus be able to proceed with recruiting on a system of "clean cuts" by age and occupation. He said it was necessary to raise immediately 420,000 to 450,000 men from among those now in civil life, and it had been decided to make available for military service the very large number of young men employed in essential industries. The secession of Russia from the Allies he estimated to have added to the potential enemy strength on the Western Front possibly 1,600,000 men, but the resources of the Allies and America were sufficient to ensure victory, and only a psychological catastrophe could save the Central Empires. The British Army had on its roll over four million men, and the effort which the British nations had made in providing men amounted to 7½ millions. The Government had decided neither to raise nor to lower the military age nor to introduce compulsion in Ireland, but the Bill provided the machinery for the "comb-out." The second reading was carried without a division on Jan. 17, after a discussion in secret session. Replying to criticism in Committee, on Jan. 21, Sir Auckland gave an assurance that what was sought was not a great despotic power, and agreed to amend the Bill to secure that any order applicable to certificates granted to any body of men should be laid upon the table of both Houses and might be annulled by an address to the King. The third reading was obtained on Jan. 24, and, the other Chamber passing the measure, the Royal Assent was given on Feb. 6, as well as to a Bill to bring on the National Register lads who had attained the age of 15 after Aug., 1915, and men discharged from the Forces.

THE AIR COUNCIL.—By the Air Force Bill, which, on the motion of Mr. Long, received its first reading on Nov. 8, a third Service was instituted, and an Air Council with a President established in place of the Air Board. Moving the second reading on Nov. 12, Major Baird said the Government had endeavoured to create an authority responsible in air matters by using the existing machinery, with a view to the least possible dislocation. The Air Council would be constituted very much on the lines of the Army Council, the Ministry of Munitions being represented on the Board. Supremacy in the air was, he said, as essential to our national existence as supremacy at sea. Both the Army and the Navy Air Service would be transferred to the new

organisation. The Bill passed through Committee two days later, Major Baird explaining that the Council would consist of a Secretary of State, a Parliamentary Under Secretary, a Permanent Secretary, a Chief of Staff, probably a Deputy Chief of Staff, and officers to control separately personnel and material. Mr. Bonar Law said both the Navy and the Army had accepted the Government's decision to treat the whole of the Air Service as one body under the new Department as soon as it was set up. The measure quickly passed its remaining stages, and received the Royal Assent on Nov. 29.

THE NAVY.—In an excellent maiden speech, the First Lord of the Admiralty, Sir Eric Geddes, on Nov. 1, described the changes in the constitution and organisation of the Board, and said that since the beginning of the war between 40 and 50 per cent. of the German submarines operating in the North Sea, the Atlantic, and the Arctic Ocean had been sunk. During the past quarter the enemy had lost as many submarines as during the whole of 1916, while the net reduction in tonnage in the past four months was 30 per cent. less than had been expected in July. The total net reduction since the beginning of the war, from all causes, in British tonnage on the official register in ships over 1,600 tons was under 2,500,000 tons gross, or 14 per cent. The output of merchant tonnage for the first nine months of 1917 was 123 per cent. higher than in the corresponding period of 1916, and very considerably higher than the total output for the whole of 1915. During a recent month, he added, the mileage steamed by battleships, cruisers, and destroyers alone amounted to 1,000,000 miles in home waters.

VOTES OF CREDIT.—Votes of Credit were introduced by Mr. Bonar Law and agreed to by the Commons of £400,000,000 on Oct. 30, and of £550,000,000 on Dec. 12, bringing the aggregate for the year to £2,450,000,000. Mr. Bonar Law said the average daily expenditure up to Dec. 1 for 63 days was £6,794,000, or an excess over the Budget estimate of £2,383,000. He added that if the war were going on when the next financial year began it would be the duty of the Chancellor of the Exchequer to put on additional taxation.

SESSION 1918.

THE KING'S SPEECH.—After a very brief respite, the last Session of the King's first Parliament was opened by His Majesty in person on Feb. 12, the Queen and the Prince of Wales attending the ceremony. Reference was made in the Speech from the Throne to the Allies' statement of their war aims, and to the fact that Germany had ignored these just demands; and the King expressed his full confidence that the Forces would continue to display the same heroic courage, and the people at home the same unselfish devotion, that had already frustrated so many of the enemy's designs, and that would ensure the ultimate triumph of a righteous cause. In the Lords, the Address in reply was moved by the Duke of Atholl and seconded by Lord Treowen, and was agreed to. Major-General Lowther moved and the Hon. Alexander Shaw seconded the Address in the Commons, and Mr. Asquith asked for information concerning the functions of the Supreme War Council at Versailles. This the Prime Minister declined to give, on the ground that it would furnish information to the enemy—an insinuation

which Mr. Asquith repudiated. On the following day Mr. Bonar Law summarised the Government's record, saying that in 1917 they put into the Army 820,645 men, and placed in civil employment at home 731,000 men and 804,000 women; while one million additional acres were brought under the plough, and 850,000 tons of cereals and 5,000,000 tons of potatoes additional were produced. The number of guns available in France increased by 30 per cent., and the supply of aeroplanes was two and a half times as great as in 1916. An amendment on the Versailles decision was defeated by 153 to 28, and on Feb. 14 the Address was agreed to.

RAISING THE MILITARY AGE.—The German attack in the spring necessitated new man-power proposals to meet the emergency, and on Apr. 9 the Prime Minister submitted the Government's measure. He prefaced his speech by a review of the battle, and warmly welcomed General Foch's appointment to control the strategy of all the Allied Armies on the Western Front. Mr. Lloyd George said a very strict comb-out was being made from munition works, mines, transport, and the Civil Service, while occupational exemptions in selected industries were being cancelled by age blocks, and the period of calling-up notices was to be shortened to seven days. With regard to the new legislation, the military age was to be raised to fifty (meaning men under fifty-one), and in certain specified cases, such as medical men, to fifty-five. He estimated that 7 per cent. of the men between forty-two and fifty would be available for fighting. Power would be given to direct by proclamation that any certificate of exemption should cease to have effect. The tribunals would be reconstituted, their areas of work regulated, the grounds of exemption standardised, and the rights of appeal limited. Ministers of religion were brought in for non-combatant service. Amidst constant interruptions from the Nationalists, the Premier said the Military Service Acts were to be extended to Ireland under the same conditions as in Great Britain. As the Convention upon Irish Government had not reached "substantial agreement," the Government must accept the responsibility of submitting proposals on the question, and this would be done at an early date. Mr. Asquith emphasised the gravity of the situation, and appealed to the Government and the House to secure the greatest measure of agreement. Mr. Devlin promptly moved the adjournment of the debate on the ground that a subcommittee of the Irish Convention had reported against compulsory service in Ireland unless with the assent of the Irish Parliament. This was defeated by 323 to 80, and leave to bring in the Bill was eventually given by 299 against 80, the measure being read a first time. The second reading was carried on the following day by 323 to 102, after the defeat of an amendment for the rejection, moved by Sir Charles Hobhouse, by 321 to 106. Mr. Asquith was critical of certain provisions, and urged a lower age-limit, while he declared that compulsion could not be introduced in Ireland. Mr. Bonar Law said the Government would not go back on the inclusion of Ireland, but would give loyal support to any other Government in carrying on the war if the House thought they were wrong. After the adoption of a time table, the Commons on Apr. 11 discussed the age-limit in Committee, and by 362 to 152 affirmed the Government's

proposal, and defeated an amendment moved by Sir John Spear reducing the limit to forty-eight. Sir Auckland Geddes said the Government only proposed to take 7 per cent. of the men between the new age periods, leaving the remainder in civil life. He explained the procedure to be adopted, saying the liability to serve would begin from the day on which the Royal Assent was given, after which men would be called up in classes for medical examination. Those who were required would have power to apply to tribunals. The extension of compulsion to Ireland was adopted on the following day by 281 to 116, after the defeat by 260 to 108 of an amendment moved by Mr. Lardner deferring the matter until an Irish Parliament had approved it. Mr. Asquith, in view of the perils of the time, said he could not oppose the clause; and Mr. Duke assured the Nationalists that the suggested Home Rule Bill would be presented, and prosecuted with all despatch—a pledge which Mr. Bonar Law repeated after Mr. Devlin had promised to join as a private if an Irish Parliament were set up. The Committee stage was concluded on Apr. 15, when it was announced that the Government would not proceed with the proposal to include ministers of religion in the Bill, and that the tribunal system would not be “scrapped,” but merely amended in order to accelerate decisions. On the following day the third reading was carried by 301 to 103, an amendment moved by Mr. Dillon to omit the power to extend the Bill to Ireland by Order in Council being defeated by 296 to 123, after Mr. Barnes and the Premier had pledged the Government to pass a Home Rule Bill, and indicated that they would resign in the event of failure. The House of Lords gave two days to the Bill, which received the Royal Assent on Apr. 18, a provision being added giving tribunals the power to make exempted men join the Volunteer Force.

THE IRISH PROBLEM.—The Home Rule situation became no clearer before the adjournment. Following the discovery of a Sinn Féin conspiracy with the enemy and the change in the Irish Administration—the appointment of Viscount French as Lord Lieutenant, and of Mr. Edward Shortt as Chief Secretary—the situation was reconsidered by the War Cabinet. On June 20 Lord Curzon said the Government had come to the conclusion that to proceed with the preparation of a Home Rule Bill and its introduction into Parliament would be a folly, and would almost amount to a crime. It was necessary in these circumstances to recognise the facts and adjust their policy both in respect to conscription and Home Rule. A few days later Mr. Shortt attributed to the German plot the fact that the dual policy of Home Rule and conscription was in abeyance; and the Prime Minister declared that in view of the attitude of the Church towards Home Rule it would have been an act of folly to have attempted to enforce their Bill. It would, he said, be a greater folly still to abandon every attempt at a settlement. Mr. Asquith repeated his suggestion that the Imperial War Cabinet should be asked to advise on an acceptable settlement.

THE NAVY.—Introducing his first Navy Estimates, Sir Eric Geddes, on Mar. 5, dealt with the submarine losses and the drop in the ship-building output, declaring that neither employers nor employed were in all cases doing their best, and that if improvement were not

speedily made the point where production balanced losses would be postponed to a dangerous extent. He repeated that the submarine menace was held, though not mastered. In recent months the chances were that only one in five submarines returned to German ports. The First Lord gave the actual tonnage of losses during the war on Mar. 30. He said the world's tonnage, exclusive of enemy-owned tonnage, had fallen by 2½ million tons gross from the beginning of the war until Dec. 31, 1917, while British tonnage alone had lost 3½ millions net on a total of 18 millions. One year of unrestricted submarine warfare had cost the world six million tons of shipping. Forty-seven large shipyards, containing 209 berths, were then engaged on ocean-going merchant vessels, and in the fourth quarter of 1917 the merchant tonnage produced in the United Kingdom was 420,000 tons. By an increase in output and a decrease in sinkings we reached in the last quarter of 1917 the position that the Allies were within 100,000 tons a month of making good the world's losses; while so far as Britain was concerned we lost an average of 260,000 tons a month during the last quarter of 1917 and built 140,000 tons a month, the average weekly output of repaired merchant shipping having largely increased. Just before the adjournment Mr. Lloyd George stated that the British Navy had destroyed “at least 150 submarines,” more than half during 1917, and that the tonnage of the Navy had increased from 2,500,000 at the beginning of the war to 8,000,000, including the Auxiliary Fleet.

THE ARMY.—Speaking on the Army Estimates on Feb. 19, Mr. Lloyd George explained the extension of the functions of the Versailles Council, the general principle of which, he said, was agreed to whole-heartedly by everybody. There was unanimity that there must be a central authority to exercise supreme direction for that policy, he declared, and that it should have executive powers. The first proposal for a Council of the Chiefs of Staff was rejected, and eventually a plan was adopted which met criticism by Sir Douglas Haig, who was prepared to work under the arrangement. The permanent British Military Adviser at Versailles was to become a member of the Army Council, be in constant communication with the Chief of the Imperial General Staff, and be absolutely free and unfettered in the advice he gave. The Chief of the Imperial General Staff would have the same powers as all holders of that office before Sir William Robertson, and would accompany Ministers to meetings of the Supreme War Council as their adviser. Mr. Lloyd George voiced the Government's regret at Sir William Robertson's resignation, and appealed to the House to close its ranks in face of the terrible realities of the time. On the following day Mr. Macpherson said that during 1917 nearly 7,000,000 men, 500,000 animals, over 200,000 vehicles, and 9,500,000 tons of stores had been taken to the Front. The captures included 168 heavy howitzers, 68 heavy guns, 437 field guns, 1,055 trench mortars, and 2,843 machine-guns. Arising out of a letter from Major-General Sir Frederick Maurice questioning the accuracy of statements made by the Prime Minister and Mr. Bonar Law upon the military position, Mr. Asquith, refusing a proposal that the matter should be referred to a Court of Honour of two Judges, moved the appointment of a Select Committee to inquire into the allegations, on May 9. The

Government regarded the motion as a direct vote of censure—an intention which Mr. Asquith repudiated—and it was defeated by 293 to 206, after Mr. Lloyd George had appealed to all sections to “end these distracting controversies which threatened the unity of the Army and the nation.” On the day before the adjournment the Prime Minister said that since Aug., 1914, Great Britain had raised for the Army and Navy 6,250,000 men, including those already with the Forces. The Dominions had contributed 1,000,000 men, and India had raised 1,250,000 men. The Army in France, he said, had more guns and machine-guns than ever before. The danger was not over, but he would be a sanguine man on the German General Staff who would then predict that Ludendorff's plan of campaign would succeed and enable Germany to obtain a military decision that year.

THE AIR FORCE.—The first Estimates of the Air Force were introduced on Feb. 21 by Major Baird, who gave some interesting details of the work of the new Service. In the preceding September, he said, 7,886 bombs were dropped in short-range operations on the Western Front, excluding Italy, and in the following month the number was 5,113. In December 123,000 rounds were expended in attacking troops from the air, and in January 209,000 rounds. In a period during which we had carried out eleven raids into Germany, the enemy had made only eight raids into Great Britain.

THE BUDGET.—In a two hours' speech, Mr. Bonar Law, on Apr. 22, submitted a record Budget in respect of the enormous amounts involved. Remarking that the help was timely and necessary, the Chancellor said that the United States had during the previous year advanced £950,000,000 to the Allies, £500,000,000 coming to us. He estimated the coming year's expenditure at £2,972,197,000, and the revenue on the existing basis of taxation at £774,250,000, together with new taxation of £67,800,000, the deficit of £2,130,147,000 being met by loans. He was convinced that it was his duty to levy sufficient taxation to make the nation bear as much of the current expenses of the war as it could without being weakened in the conduct of the war. His proposals are outlined below, the figures in parentheses being the estimated revenue in a full year. The income tax raised from 5s. to 6s. in the pound upon high incomes, with smaller advances on smaller sums, there being no change up to £500 a year (£41,400,000); the limit of super-tax exemption lowered from £3,000 to £2,500, and the rates payable under the graduated scale increased up to a maximum of 4s. 6d. in the pound (£14,150,000); a rebate of £25 in respect of incomes under £800 for a wife or any dependent relative maintained by the taxpayer, in addition to that for his children; farmers (who only pay income tax on rent) would have their liability doubled (£5,300,000); no change in the excess profits duty; spirit duty increased from 14s. 9d. a gallon to 30s. (£11,150,000); beer duty advanced from 25s. a standard barrel to 50s. (£15,700,000); tobacco duty raised from 6s. 5d. a lb. to 8s. 2d., the effect being to increase the price by 2d. an ounce (£8,000,000); additional duty on matches, raising the ¼d. boxes to 1d. (£600,000); additional duty on sugar of 11s. 8d. a cwt., sugar costing 5½d. a lb., rising to 7d. (£13,200,000); extra penny on all bills of exchange, including cheques and promissory notes (£1,000,000); and increase in postage

rates, bringing lowest rate to 1½d. for letters and 1d. for postcards (£4,000,000). In addition, there was to be a tax at the rate of 2d. in the shilling on all luxuries in a schedule to be prepared by a Select Committee, the tax being collected by means of stamps and to apply to establishments such as hotels and restaurants. The proposals were generally welcomed, the necessary resolutions were agreed to, and on May 1 the Report stage was secured and the Finance Bill read a first time. On the second reading debate, on May 14, Mr. Bonar Law pointed out that the present system of long-term borrowing had been going on for nearly eight months, and had produced £719,000,000. When the Committee stage opened on June 3, the Luxury Tax clauses were deleted, on the understanding that they would be introduced in a separate measure. The Bill passed through Committee on the following day, and on the Report stage, on June 13, the Chancellor refused to give way on the increased cheque tax, but made a number of concessions to income tax payers. The relief of £25 in respect of a wife in the case of incomes up to £800 was extended to a widower in respect of a relative resident with him and having charge of his young children; and a person with an income of between £800 and £1,000 was given a rebate of £25 in respect of two children. The third reading was agreed to without a division on June 21. The Bill was passed by the Lords, as was a separate measure embodying the postal changes, the only concession made being to retain the old rates for letters and postcards to soldiers abroad. The Committee which had been dealing with the tax on luxuries did not produce their schedule until Parliament had adjourned, and the Bill was consequently left over for the autumn sitting.

VOTES OF CREDIT.—Votes of Credit were presented for £600,000,000 on March 7, £500,000,000 on June 18, and £700,000,000 on Aug. 1, all being agreed to. In introducing the last, the Chancellor of the Exchequer gave particulars of our loans to our Allies, the total being £1,402,000,000. Of this, Russia received £568,000,000, France £402,000,000, Italy £313,000,000, and the smaller States—including Belgium, Serbia, Rumania, and Greece—£119,000,000. The debt due from the Dominions, he added, amounted to £208,500,000.

THE ENEMY ALIEN.—As a result of a widespread feeling, not only in Parliament but throughout the country, that the enemy alien danger had not been adequately dealt with, the Prime Minister appointed a small committee of M.P.'s to investigate the question. Following upon their report, Sir George Cave on July 11 outlined the Government's policy, accepting most of their proposals. He said they proposed that the lists of men exempted from internment and women from repatriation should be revised, and that all certificates of naturalisation granted to enemy aliens during the war should be reviewed, and, if thought desirable, revoked. No persons who were not natural-born British subjects should be allowed to change their names without licences, or be employed in Government offices during the war except for urgent reasons. At the same time it was proposed to wind up enemy businesses and banks. On the following day a second reading was given to the British Nationality and Status of Aliens Bill, which had been approved in principle at the Imperial Conference in 1917, and the main

purpose of which was to introduce wider powers of revoking naturalisation certificates. In Committee on *July 17* the Home Secretary accepted an amendment providing for revocation where there had been concealment of material circumstances, and moved a fresh section embodying the new proposals. An amendment agreed to permitted revocation in the case of persons who during the war had unlawfully traded or communicated with the enemy, or who had been engaged in businesses carried on in such a way as to assist the enemy. Another added reason for revocation was the case of persons belonging to enemy States which did not regard naturalisation within the British Empire as extinguishing the original status. During the Report stage a provision was inserted that no certificate of naturalisation should be granted to any subject of an enemy country for five years after the end of the war, unless they had served in the British or Allied Army, belonged to a race or community known to be opposed to the German Government, or were at birth British subjects. The Bill was read a third time on *July 19*. The Lords, in Committee, carried against the Government an amendment making it obligatory on the Home Secretary to cancel certificates obtained by fraud. The Minister was also empowered to revoke certificates granted to persons who according to the law of an enemy State remained subjects of that State. The House further extended to ten years after the war the period during which no naturalisation certificates should be granted to subjects of an enemy country. The Commons agreed to these changes, and the Royal Assent was given on *Aug. 8*, as also to a measure to amend the Trading with the Enemy Act, designed to prevent an enemy bank or undertaking being established in this country for five years after the end of the war.

THE EDUCATION BILL.—General approval was expressed of Mr. Fisher's Education Bill, based upon the measure of the preceding Session, which was given a second reading on *Mar. 18*. County and borough councils were charged with the provision of the progressive development and comprehensive organisation of education, all exemptions from school attendance between the ages of five and fourteen being abolished, and attendance at continuation schools being made compulsory on young persons who had not received a full-time education up to the age of sixteen. Mr. Fisher said that the object was to provide the greatest possible number of outlets for talent of all descriptions, and to give the children of poorer parents the opportunities that were universally claimed for the children of richer parents. During the Committee stage considerable attention was paid to the question of the school age. On Clause 10, which established the system of compulsory education, a proposal to make attendance at continuation schools voluntary, and to give parents the right of deciding whether their children should attend or not, was negatived by 106 to 29 on *May 29*. In declining to accept a Lancashire amendment on the point on *June 5*, Mr. Fisher agreed to a modification of his original plan, so that the obligation to attend continuation schools should not, within a period of seven years from the coming into operation of the provisions, apply to young persons between sixteen and eighteen, nor after that period to young persons who were sixteen before that period expired; and that during those seven years, if a local authority so

desired, the number of hours during which young persons might be required to attend continuation schools should be 250 instead of 320. The third reading of the Bill was secured on *July 16* without a division, and the Lords generally approved its proposals, making but few alterations, which the other House accepted. The measure was added to the Statute Book on *Aug. 8*, when both Houses adjourned until *Oct. 15*, the life of Parliament having previously been extended to a full term of eight years.

THE ARMISTICE.—When the two Houses resumed a great change in the war situation had taken place, and within a few weeks interest was transferred from Westminster to Versailles. The terms of the armistice, signed by the German plenipotentiaries, were read on *Nov. 11* in both Houses amid great enthusiasm. In the Commons the Prime Minister added his hope that thus had come to an end all wars, and moved the adjournment of the House in order that members might proceed to St. Margaret's to give humble and reverent thanks for the great deliverance of the world from its great peril. Mr. Asquith joined in the aspiration that we had entered upon a new chapter in international history in which war would be recognised as a obsolete anachronism, never to be revived. The members of the two Chambers then went to St. Margaret's. A week later Mr. Bonar Law and Earl Curzon moved and Mr. Asquith and Lord Crewe seconded motions, which were unanimously agreed to in both Houses, that addresses should be presented to the King congratulating him on the conclusion of the armistice and the prospect of a victorious peace. The addresses were presented to His Majesty in the Royal Gallery on *Nov. 19*, when the King, in the presence of a large gathering of peers, members, and overseas representatives, made an inspiring speech in which he paid a noble tribute to the magnificent work of the Services and their leaders, to the sacrifices of the Dominions, and to the fortitude of those at home, expressed sympathy with the bereaved, and asked that goodwill should prevail for the solution of the many tasks of peace.

THE PROROGATION.—The prospects of a dissolution became more assured with the cessation of hostilities, and before the conclusion of the armistice negotiations, a Bill making women eligible as members of Parliament was passed as a logical outcome of the grant of votes to women. On *Nov. 12* the Commons agreed to a vote of credit for £700,000,000, Mr. Bonar Law remarking that the Government were beginning to diminish expenditure on materials of war, and that at the end of the war the burden of our external debt would probably not at the outset reach one thousand millions. Among the Bills quickly passed through Parliament was one which fixed as the date of the termination of the war the date "as near as may be" of the exchange or deposit of peace ratifications. After a record life of eight years Parliament was prorogued on *Nov. 21*, the King's Speech referring to the triumphant issue of the war, and the promise at no distant date of an honourable and enduring peace; and expressing the hope that the spirit of unity would not be wanting in the arduous task of establishing on the sure foundation of ordered liberty the common welfare of the people. The dissolution followed on *Nov. 25*, so that nominations for the new House of Commons might take place on *Dec. 4* and polling on *Dec. 14*, the votes being counted on *Dec. 28*.

(Elected December 14, 1918; Met February, 1919.)

Co. U. = Coalition Unionist; Co. L. = Coalition Liberal; Co. Lab. = Coalition Labour; U. = Unionist; L. = Liberal; Lab. = Labour; Ind. = Independent; N.P. = National Party; N. = Nationalist; S.F. = Sinn Fein.

Figures following name of constituency denote total number of electors; W. and subsequent figures being number of women electors included in larger total.

ADMIRALTY, Whitehall, S.W. 1.

The management of all maritime affairs, the government of the Royal Navy, jurisdiction in maritime cases, and the appointment and commissioning of Naval Officers, was in early times the province of the "Lord High Admiral," the ninth Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" since 1708 except for a short time in 1827, when the Duke of Clarence was Lord High Admiral, the duties being performed by "Commissioners for executing the Office of Lord High Admiral of the United Kingdom."

Board of Admiralty—Whitehall.

LORDS COMMISSIONERS:—First Lord, The Rt. Hon. Sir Eric Geddes, G.B.E., K.C.B., M.P. (with house allowance) £5,000
Naval Secretary to the First Lord, Rear-Admiral Allan F. Everett, C.B. £1,000

Assistant Principals, S. T. Blackwell (act.), J. A. C. Champion, O.B.E. (act.), E. C. Cleary (act.), G. Dinn (act.), T. Fry (act.), R. M. Y. Gleadowe (act.), R. G. Hayes, E. Lee, N. MacLeod (act.), C. G. Madin (act.), P. E. Marraek, J. E. Masterton Smith, C.B., C. Perham (act.), A. H. M. Robertson (act.), E. Sawers (act.), G. A. Steel (act.), R. Walton (act.) £600 to £800

Clerk, C. B. Coxwell.

Staff Clerks, H. Akhurst, G. F. Cotton, M.B.E., J. T. Cotton, M.B.E., H. Crombie (act.), F. W. Dauter, V.D. (Lieut.-Col., R.E.), J. F. Haynes (act.), A. P. Hegarty (act.), A. W. Houston (act.), A. Mann, G. J. Main, E. J. Miller (act.), J. Northam, M.B.E., A. Pegrum (act.), H. O. Simmons, V. T. Simpson, W. E. Varnals (act.), A. Wotton (act.)

Superintendent of Circulation, W. J. Connor.

Librarian, W. G. Perrin, O.B.E. £400 to £600
Deputy Librarian, J. F. Phillips, M.B.E. £300 to £400

Naval Staff.

Chief of Naval Staff, Adm. (act.) Sir Rosslyn E. Wemyss, G.C.B., C.M.G., M.V.O.
Deputy Chief of Naval Staff, Vice Adm. (act.) Sydney R. Fremantle, C.B., M.V.O.
Assistant Chief of Naval Staff, Vice-Adm. Sir Alexander L. Duff, K.C.B.

OPERATIONS DIVISION: Naval and Marine Staff. Captains R. P. Clutton, Guy M. Marston (act.), G. T. C. P. Swaby, D.S.O.; H. A. le F. Hurt (act.) (ret.), Commanders G. F. B. Edward-Collins, H. T. England, F. A. Somerville, D.S.O., H. F. H. Wakefield, Leonard Robinson (act.).

Civil Staff, Staff Clerk, F. R. Bailey (act.).

These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a Political "First Lord" (who, by virtue of the importance of his office, is a Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord," "Fourth Sea Lord," now always selected from officers of the Service, a Political "Civil Lord" and an additional "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The net amount provided in the Navy Estimates 1916-17, for administration, is not stated.

NAVAL INTELLIGENCE DIVISION: Director, Rear-Adm. Sir William R. Hall, K.C.M.G., C.B.
Deputy do., Capt. Raymond A. Nye, C.B.

MOBILISATION DIVISION: Director, Rear-Adm. Edmund Hyde Parker, C.B.

TRADE DIVISION: Director, Capt. Alan G. Hotham.
Asst. Director, Capt. Charles F. Hardy.

Hydrographic Department.

Hydrographer of the Navy, Rear-Adm. John F. Parry, C.B. £1,500
Asst. ditto, Capt. Ernest C. Hardy £950
Chief Civil Asst. W. D. Barber, D.S.O. £550 to £650
Director of Navigation, Capt. John A. Webster, M.V.O. £950
Naval Assistants, Captains Cecil F. Othman, C. H. C. Laingdon, Arthur W. Torlesse, E. H. Fitchew, R.A.; Commanders Bishop O. Day, W. T. P. Wilson (ret.), E. B. Cloete, D. B. Le Moine (temp.), S. V. S. C. Messum (ret.), Francis M. Holroyd, Charles M. Gibson (act.); Lieutenant Commanders John S. Harris, Alan F. S. Grant, Archibald C. Bell, Hugh L. Haslewood (ret.); Lieutenants Rupert T. Gould (ret.), J. F. H. Pollen £530 to £600
Superintendent of Charts, Com. John A. Beuch £700 to £800

Supt. of Sailing Directions, Capt. (act.) Chas. V. Smith (ret.).

Supt. of Chart Issues, W. E. Lowther, M.B.E.
Chief Cartographer, As. A. W. Cold, F. H. Shurham

AGRICULTURE AND FISHERIES, Board of,

4-7 Whitehall Place; 3 St. James's Square; 17 and 19 Newington Causeway, S.E.; 43 and 54 Parliament Street, S.W.; 14 Victoria Street, S.W.; 4 The Sanctuary, S.W.; and 80 Pall Mall, S.W. 1.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connexion with Diseases of Animals, and the functions of the Land Commissioners for England. Technically, the membership of the Board is analogous

to that of the Local Government "Board," and "Board" of Education, but in effect the establishment consists of a President, a Parliamentary Secretary, a Permanent Secretary, Assistant Secretaries, &c., and its main functions are to prevent the introduction or spread of certain diseases among animals, to control the transit of animals and the exportation of horses in Great Britain, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry, to administer Grants for Agricultural Education and Research, including Forestry, and for the improvement of the breeding of live stock including horses, to collect and publish agricultural statistics and disseminate information with regard to food production, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in England and Wales so far as the latter relate to agricultural produce, to control the redemption and the apportionment of tithe rent charge and the regulation of enclosure of common land, to enforce the Cattle and Horse Dealers' Acts, including the Small Holdings and Allotments Acts, including the acquisition of land for colonies for discharged soldiers, and to administer Acts relating to the improvement of land by private owners, to administer the Acts relating to Sea, Salmon and Freshwater Fisheries. The Board administers the provisions of the Corn Production Act, 1917 and have appointed an Agricultural Wages Board. A new Department has been formed to deal entirely with food production during the war. Separate branches have also been formed to deal with flax production and to assist the Dairy Industry. The Board also publish a monthly "Journal," price 4d. By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time altered. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate Vote. By an Order in Council of 28 March, 1903, the supervision of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1918-19 was estimated at £452,205.

President, Rt. Hon. Rowland K. Prothero, M.V.O., M.P. £2,000

Private Secs., A. W. Munro, £250; A. Balfour £200

ARMS, COLLEGE OF, or HERALDS' COLLEGE, Queen Victoria Street, E.C. 4.

(See also Scottish and Irish Sections.)

The Herald's College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Putney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

CHARITY COMMISSIONERS.

Ryder Street, St. James's, S.W. 1.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899. The salaries, &c., amounted in 1917 to £28,404.

 Assist. Sec., G. G. Mennell £700 to £750
 Senior Clerks, J. H. Brackenberry; T. L. Hedley £500 to £750

COLONIAL OFFICE, Downing Street, S.W. 1.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies to relieve the War Secretary of Colonial business. The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Dominions, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £58,626 for 1918-1919.

Principal Secretary of State for the Colonies, Rt. Hon. Walter H. Long, M.P. £5,000

Junior Clerks, W. H. Smith; P. L. Collisson (act.) £200 to £400

Emigrants' Information Office,

34 Broadway, S.W. 1.—(to 5. Sat. 10 to 1.30.)

Pres., Committee of Management, The Secretary of State for the Colonies.

Chairman, do., T. C. Macnaughten, C.B.E.

Chief Clerk, Malcolm Jones.

Editor of Publications (vacant).

Imperial Institute.

South Kensington, S.W. 7.

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (see page 489), and by the Imperial Institute (Management) Act of 1906 is under the management of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members. The principal work of the Imperial Institute is the promotion of inter-imperial trade in raw materials, by investigations with a view to utilisation, by supplying information as to sources, quality and uses, and by exhibitions illustrative of the resources of the Empire.

Executive Council, Rt. Hon. Lord Islington, C.M.G., D.S.O. (Chairman); Rt. Hon. Lord Burnham; Rt. Hon. Lord Emmott, C.M.G., C.B.E.; Rt. Hon. the Earl of Scarborough, K.C.B.; Prof. Wyndham R. Dunstan, C.M.G., F.R.S.; Sir Algernon Firth, Bt.; G. E. A. Grindle, C.M.G.; Sir Robert Kindersley, K.B.E.; T. C. Macnaughten, C.B.E.; D. O. Malcolm; Sir Owen Phillips, C.M.G., M.P.; Sir Marshall Reid, C.B.E.; Sir William Taylor, K.C.M.G.; Sir Richard Threlfall, K.B.E., F.R.S.; Sir W. H. Clark, K.C.S.I., C.M.G.; H. Fountain, C.B., C.M.G.; Sir J. P. Hewett, C.B.S.I., K.B.E., C.B.E.; L. J. Kershaw, C.S.I., C.B.E.; Sir A. D. Hall, K.B.E., F.R.S.; Sir R. W. Carlyle, K.C.S.I., C.B.E.; Hon. Sir George H. Perley, K.C.M.G.; Rt. Hon. Andrew Fisher; Rt. Hon. W. P. Schreiner, K.C., C.M.G.; Hon. Sir Thomas Mackenzie, K.C.M.G.

The following are the principal Committees of the Institute:—

Committee for Canada.

Hon. Sir George Perley, K.C.M.G. (Chairman); J. G. Colner, C.M.G.; Sir Robert Kindersley, K.B.E.; J. H. Plummer; Sir Keith Price.

Committee for Australia.

Rt. Hon. Andrew Fisher (Chairman); E. A. Box; Capt. R. Muirhead Collins, R.N., C.M.G.; Gordon Campbell; E. V. Reid; W. Robinson.

Committee for New Zealand.

Hon. Sir Thomas Mackenzie, K.C.M.G. (Chairman); J. Coates; J. C. N. Grigg; R. D. D. McLean; R. H. Nolan, C.B.E.

Committee for South Africa (including Rhodesia).

Rt. Hon. W. P. Schreiner, K.C., M.C. (Chairman); A. Canham; F. Dyer; Prof. J. G. Lawa; D. O. Malcolm; C. W. S. Maude; W. Soper.

Committee for India.

Sir Charles McLeod (Chairman); A. Yusuf Ali, C.B.E.; Sir Charles Armstrong; Sir Ernest Cable; Sir Robert Carlyle, K.C.S.I., C.B.E.; Lord Carmichael, G.C.S.I., G.C.L.E., K.C.M.G.; D. T. Chadwick; Sir John Hewett, G.C.S.I., K.B.E., C.B.E.; L. J. Kershaw, C.S.I., C.B.E.; Sir Marshall Reid, C.B.E.; Sir James Dunlop Smith, K.C.S.I., K.C.V.O., C.B.E.; Sir George Sutherland.

In addition there are numerous Advisory Technical Committees, including Mineral Resources, Timbers, Silk, Rubber, &c., and a Committee on Raw Materials, with representatives of the Chambers of Commerce. Director, Wyndham R. Dunstan, C.M.G., L.D., F.R.S. Secy. to the Director, A. J. Hedgeland, M.A. (Oxon.).

Head of Appointments Dept., "H. Martin, £550 to £700

Head of Shipping Dept., T. H. Holt, O.B.E. (and £300 personal allowance) £550 to £700

CUSTOMS AND EXCISE, BOARD OF,

Lower Thames Street, E.C.3.

Commissioners of Customs were first appointed in 1671 and housed by the King in London, the present "Long Room" replacing that built by Charles II. and rebuilt after destruction by fire in 1728 and 1824. In 1830 the Customs business of Ireland was transferred to London. The Excise Department was formerly under the Inland Revenue Department, and was amalgamated with the Customs Department on 1 April, 1909. Salaries and expenses of the Department amounted to £2,597,918 in 1918-19.

Chairman, Sir Laurence N. Guillemard, K.C.B. £2,000
Private Sec., C. E. I. Fletcher.

Dep. Chairman, F. Sydney Parry, C.B. £1,500
Commissioners, Sir Richard F. Crawford, K.C.M.G., K.N.E.; Noel E. Behrens; Sir William Gallagher, K.C.B. £1,200

Private Sec. to Deputy Chairman and Commissioners, O. Mundy.

SECRETARIES' OFFICE.

Secretaries, James P. Byrne, C.B., I.R.O.; E. C. Cunningham, C.B. £1,200

Secretary (act.), R. T. Warner	

DURHAM, COUNTY PALATINE OF.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Chancellor, Edward Tindal Atkinson, K.C.	
Attorney-General, Herbert F. Manisty, K.C.	
Solicitor-General, Henry Arthur Colclax, K.C.	
Registrar of Chancery Court, A. O. Smith

EDUCATION. BOARD OF,

Personal Office of President, Parliamentary Secretary, and Permanent Secretary—Whitehall, London, S.W. 1.
Temporary Main Offices—Victoria and Albert Museum, South Kensington, S.W. 7.
Medical Department (temporary premises)—Cleveland House, 19 St. James's Square, S.W. 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1890 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £416,103 in 1918-19.

THE BOARD.

* This list does not include those officers who have been lent to other Departments or who are on active service.

The Right Hon. Herbert A. L. Fisher, M.P., President.
The Lord President of the Council: the Principal Secretaries of State; the First Lord of the Treasury; and the Chancellor of the Exchequer.

EXCHEQUER AND AUDIT DEPARTMENT, Victoria Embankment E.C. 4.

The Comptroller and Auditor General was appointed by Letters Patent under 20 & 30 Vict. c. 39, § 1866, in place of the Comptroller General of the Exchequer and the Commissioners for Auditing the Public Accounts whose duties were handed over to him. The main functions of the office are: (1) Exchequer:—To authorise issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parlia-

ment was intended to provide; that the expenditure is supported by proof of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £69,356 in 1918-19.

Compt. and Aud.-Gen., Sir Hy. Jas. Gibson, K.C.B. £2,000

FOREIGN OFFICE, Downing Street, S.W. 1.

(Office hours 11 to 6.)

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1588). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), three Assistant Under-Secretaries, Controller of Commercial and Consular Affairs, a Chief Clerk, a Legal Adviser, a Librarian, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £65,547 in 1918-19.

Principal Secretary of State for Foreign Affairs, Rt. Hon. Arthur J. Balfour, O.B.E., M.P. £5,000

FRIENDLY SOCIETIES' REGISTRY,

Central Office, British Museum (North Entrance),
Montague Place, W.C. 2.

A Barrister was appointed in 1882 to certify the Rules of Savings Banks, and in 1889 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scaffolding Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, the National Insurance Act, and a great number of local and personal Acts. The Chief Registrar is also a member of the National Health Insurance Commissions for England, Scotland, Ireland, and Wales, and of the National Health Insurance Joint Committee. Establishment expenses, 1918-19, £23,642.

Chief Registrar, G. Stuart Robertson £1,200 to £1,500
Private Sec., G. H. Cooper.

<i>Asst. Registrars, T. Hall Hall; G. D. Barlow; John Fox</i>	£600 to £800
<i>Legal Assist., D. L. F. Koe</i>	£500
<i>Law Clerk, W. J. Day</i>	£200 to £400
<i>Supt. of Rules and Accountant, G. T. Knecht</i>	£400 to £500

<i>Supt. of Registers, T. Jordan</i>	£400 to £500
<i>Supt. of Returns and Statistics, H. C. Souter</i>	£400 to £500

<i>Staff Clerks, E. Bennett; G. H. Cooper; R. R. Martin; F. H. Minett</i>	£300 to £400
<i>Minor Staff Clerks, J. P. Cluc, £200 to £300; T. F. Dunning (and allowance of £75)</i>	£120 to £200
<i>Office Keeper, G. H. Taylor</i>	£120 to £150

GENERAL REGISTER OFFICE,

Somerset House, W.C. 2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1532, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1918-19 were estimated at £93,805 (Registry of Business Names, £4,150).

Registrar-General, Sir Bernard Mallet, K.C.B. £1,200

Private Sec., G. H. Tregear, B.Sc.

Secretary and Supt. of Records, A. R. Bellingham £900

Supt. of Statistics, T. H. C. Stevenson, M.D., C.B.E.

Principal Clerks, T. T. S. de Jastrzebski; C. W. Danby

£700

Senior Clerks, A. Bellingham; F. Finch; F. Bendle

£500 to £600

Inspectors of Registration, F. Page, £400 to £600; J. W. Reaching, M.P.E. (and a vacancy)

£400 to £500

Staff Clerks, W. J. McDonnell, M.B.E. £350 to £450;

C. E. Hampson; C. H. Martin; W. O. D. Jones;

R. A. Mott; W. F. Cook; T. A. Saunders, M.B.E.;

D. L. Evans; H. C. Eason; E. C. Dodge; A. B. Garrard

£300 to £400

Registry of Business Names, 39 Russell Square,

W.C. 1.

Registrar, Sir Bernard Mallet, K.C.B.

Asst. do., T. T. S. de Jastrzebski.

HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of

* Serving with the Forces or in other Departments.

his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy. The administrative expenses of the Home Office were estimated at £253,651 in 1918-19.

(This Ministry is now in process of winding-up, and will not exist as a Ministry after 1918.)

INLAND REVENUE, BOARD OF,
Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1604 and of Commissioners of Taxes from 1729. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 12 and 13 Vict. c. 2 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII. c. 16 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps, Taxes, and Land Value Duties. Salaries and Expenses of the Board amounted in 1918-19 to £2,975,350.

Chairman, N. F. Warren Fisher, C.B.

LEE CONSERVANCY BOARD, Surrey House, Victoria Embankment, W.C. 2. And Enfield Lock, Middlesex.

The authority responsible for the control of the River Lee and its tributaries, its functions including the management of the Lee and Stort Navigations and the prevention of pollution of the water. The River Lee and its tributaries extend over an area of about 600 sq. miles, and the total length of navigable waterway is about 50 miles. The Board consists of 25 members, of whom 14 are elected by local authorities and one by the large owners on the river.
Chairman, E. B. Barnard, M.A., D.L.
Clerk of the Board, S. R. Hobday (Barrister-at-Law).
Engineer and Manager, C. N. Tween, M.Inst.C.E.

LOCAL GOVERNMENT BOARD, Whitehall, S.W. 2.

The Local Government Board was created by the Local Government Board Act 1872, and consists of the Lord President of the Council, the Secretaries of State, the Lord Privy Seal, the Chancellor of the Exchequer, and a Political President. The administrative expenses of the Board were estimated at £793,980 in 1918-19.

METROPOLIS WATER ACTS.

Water Examiner, C. Perrin, M.I.S.T.C.E.	£850
-----------------------------------------	------

LORD GREAT CHAMBERLAIN'S OFFICE.

Royal Court, House of Lords, S.W. 1.

The Lord Great Chamberlain is the Sixth Great Officer of State, the office being hereditary since the grant of Henry I. to the family of De Vere, Earls of Oxford.

Lord Great Chamberlain, The Marquess of Lincolnshire, K.G., M.C., M.D.

Secretary, Capt. Sir Thomas Butler, K.C.V.O. £200

Clerk, W. B. Paley £100

Resident Supt. House of Lords, T. Whitehead £300

METEOROLOGICAL OFFICE,

Exhibition Road, South Kensington, S.W. 7.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all oceans, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and gale warnings are based, and other work incidental thereto. The Kew Observatory at Richmond and the Observatory at Eskdalemuir are administered by this Office. The administrative expenses are met by Government grants, which amounted to £22,900 in 1917-18.

Adviser in Meteorology and Chairman of Committee, Sir Napier Shaw, LL.D., Sc.D., F.R.S.

Director, Col. H. G. Lyons, F.R.S.

Marine Superintendent, Capt. M. W. Campbell

Hepworth, C.B., R.D., M.B.C.

Supt. of Forecast Division, R. G. K. Lempfert, C.B.E., M.A.

Supt. of Statistics, F. J. W. Whipple, M.A.

Supt. of Instruments, R. Corless, M.A.

Chief Clerk, T. Duncan Bell.

1st Class Clerks, W. Allingham; F. J. Brodie; H. Harries; R. Sergeant; J. Sheerman; H. L. B. Tarrant; R. F. Wallace.

Superintendents of Observatories—Kew, C. Chree, Sc.D., F.R.S.; Eskdale, A. Crichton Mitchell, D.Sc., F.R.S.E.; Valencia, L. H. G. Dines, M.A.

Dir. of Experiments in Upper Air, W. H. Dines, F.R.S.

In charge of Branch Office at Farnborough, R. A. W. Watt, B.Sc.

METROPOLITAN ASYLUMS BOARD.

Office: Victoria Embankment, E.C. 4.

Constituted under Orders of the Local Government Board to provide, for the Metropolis, hospital accommodation for infectious disease, both acute and convalescent, hospital accommodation for certain classes of

sick children, and institutions for mental defectives. Also to provide training ships, an ambulance service, land and river, sanatoria for consumptives (National Insurance Act), accommodation for sane epileptics, and casual wards. Particulars of fever hospitals are given on p. 295, of imbecile asylums on p. 297, and of training ships on p. 265.

The Board consists of 73 members, 55 being elected by the several metropolitan boards of guardians and 18 nominated by the Local Government Board.

Chairman of the Board, R. Woolley Walden.

Vice-Chairman, The Very Rev. Canon Sprankling.

Clerk to the Board, Sir Duncombe Mann.

Deputy Clerk, G. A. Powell.

Treasurer and Accountant, Morris Heyes, A.C.A.

Deputy ditto, Ernest Walter, A.C.A.

Principal Medical Officer, H. E. Gull, M.D., F.R.C.S.

Controller of Supplies, G. J. Cooke.

Engineer-in-Chief, T. Cooper, M.I.C.E., Sheffield House, Sheffield Street, W.C. 2.

METROPOLITAN WATER BOARD,

South Place, Finsbury, E.C. 2.

Chairman of the Board, E. R. Barnard.

Vice-Chairman, Sir George S. Ellett.

Clerk, A. B. Pilling, F.I.C.E.

Supervisor, F. W. Drake.

Surveyor, Harold Oxley, F.S.I.

Statistical Officer, G. B. Warner Terry.

Chief Engineer, Sir James Restler, M.I.C.E.

Accountant and Registrar of Debentures, Arthur Newton.

Solicitor, Walter Moon.

Director of Water Examination, Sir Alexander Houston, A.R.E., M.B., D.Sc.

Sen. Bacteriological Assistant, D. G. Sutherland, M.A., B.Sc., M.B.C.

Senior Chemical Assistant, R. B. Florin, F.C.S., F.I.C.

MINT, THE ROYAL, Tower Hill, E. 1.

The Royal Mint, as now constituted, may be said to date from 1877, and the buildings from 1880, the latter being completed in that year at the cost of over £500,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I. and the last Warden was Lord Maryborough (1814-23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £131,040 for 1918-19. Appropriations in aid, £132,000, leaving a net cost of £400.

Master and Worker, The Chancellor of the Exchequer.

Deputy Master and Engraver of H.M. Seals, John Westerman Cawston, C.B.

Chief Clerk, F. L. D. Matthews £500 to £700

Sen. Clerk & Reg., D. J. Scourfield £300 to £400

COMMERCIAL FINANCE.

Controller, Herbert Guedala.
Principal Advisers, J. D. Watson; O. T. Barrow, C.S.I., C.B.E.

DEPARTMENTAL FINANCE.

Controller, A. E. Watson, O.B.E.
Assistant Controllers, F. J. Howard, O.B.E.; W. Hayden; J. S. Williams; F. L. Petre; J. M. Atkinson; C. J. Anderson, M.B.E.
Section Directors, F. H. Blöre; H. A. Dent, M.B.E.; Lieut. G. R. Rudolf; H. Porter, O.B.E.; S. H. Clinch.

EXPLOSIVES FINANCE AND CONTRACTS.

Controller, F. G. Bowers, O.B.E.
Assistant Controller, S. H. Bersey, M.B.E.
Section Directors, L. D'Elboux; F. W. Osborne; C. M. Skinner; S. A. Stallebrass; W. A. Hunt.

LABOUR FINANCE.

Controller, G. H. Duckworth.
Assistant Controller, S. C. Turner.
Section Director, W. C. Osmond.

AIRCRAFT FINANCE.

Controller, W. E. Mortimer.
Section Directors, Capt. R. H. Stainforth; J. H. Jones.

MUNITIONS ACCOUNTS DEPARTMENT.

Controller, Sir Gilbert F. Garnsey, K.B.E.
Joint Deputy Controllers, Maj. T. Dudley Cocke, O.B.E.; T. L. Judd, O.B.E.
Assistant Controllers, W. F. King; E. L. Mackillop, M.B.E.; Capt. R. B. Gray; E. G. Marlow; H. M. Barton.

Section Directors, W. L. Addyman; H. W. Naish, M.B.E.; A. W. Gow; K. H. Izard; F. W. Shelley; Lieut. J. W. Alabaster; Capt. J. F. Leacroft; J. Cruickshank; C. H. Howard; Lieut. N. H. Brandon; Capt. D. I. Tod; G. W. C. Davis; H. Clarton; J. Tait; C. V. Barker; B. M. Graham; T. W. Daffern; Lieut. A. P. Barber; H. Button; J. S. Bird; Lieut. Willett; A. A. Henley; H. G. Beazley.

DEPARTMENT OF FACTORY AUDIT AND COSTS.

Controller, M. Webster Jenkinson, C.B.E.
Assistant Controllers, C. H. McLintock, O.B.E.; A. Cathles, O.B.E.; G. W. Currie, M.P.; C. M. Housston; Capt. C. F. Cape (*actg.*).
Section Directors, S. H. L. Greaves; A. E. Gibson; Capt. J. Loudon; H. E. Chiosso; H. G. Dalman; R. Finlay Harvey; G. H. Bullimore; H. G. Howell;

H. C. O'Brien; C. Catley, M.B.E.; J. A. Falconer; A. D. Wykes; A. W. Brodie, M.B.E.; W. R. Macgregor; F. W. Phillips.

CONTRACTS.

Controller, Sir John Mann, K.B.E.
Deputy Controller, H. G. Judd, O.B.E.
Assistant Controllers, Lt.-Col. E. O'Brien, D.S.O.; T. D. Nicol; B. Wahnsley; C. J. Maslin, O.B.E.; G. K. Peto; K. MacLennan; Maj. C. G. C. Hamilton.
Section Directors, J. B. Turnbull; E. Batty; G. L. Burton; G. L. B. Loch, O.B.E.; T. Clive Davis; J. N. Derbyshire; J. Urie; J. Hamilton; H. C. Wynne Edwards, O.B.E.; J. W. Milne; C. N. Knight, O.B.E.; Capt. E. C. Blight; A. Jackson, M.B.E.; M. H. Jackson; D. A. F. Vesey, O.B.E.; F. R. Stapley, O.B.E.; W. A. James, M.B.E.; J. Kelly, M.B.E.; T. H. Clarke, M.B.E.; H. J. MacLure.

SALVAGE AND STORES DEPARTMENT.

Controller, Alexander Walker.
Technical Adviser, Lt.-Col. W. Bridges, R.A.
Salvage.
Deputy Controller, Capt. A. U. Greer, O.B.E.
Liaison Officer with War Office Salvage Board, Brig.-Gen. J. H. Lloyd, D.S.O.
Section Director, H. F. V. Cooke.

Central Stores.

Deputy Controllers, Major the Hon. L. H. Cripps, O.B.E.; F. Gill.
Assistant Controllers, D. B. Fulton, O.B.E.; M. Dalton; H. D. F. Burke, O.B.E.; G. Stoker, O.B.E.
Section Directors, A. M. Pooley, M.B.E.; A. T. Lawrence, M.B.E.; D. Cockerell, M.B.E.; D. R. Roberts, M.B.E.; W. Mahon; W. R. Clemens; M. Dixon; Capt. S. F. Corby, M.C.; H. Woodroffe; J. H. H. Boyd; A. Taylor.

Ferrous Scrap.

Section Director, A. J. Spencer.

SCRAP STORES DEPARTMENT.

Controller, Alexander Walker.
Deputy Controller, W. H. Webbe.

MUNITIONS WORKS BOARD.

Chairman, J. Carmichael.
Vice-Chairman, G. W. Humphreys.

LANDS (JOINTLY MINISTRY OF MUNITIONS AND WAR OFFICE).

Director-General, Sir Howard Frank, K.C.B., F.S.I.
Controller, E. H. Coles.

CONTROLLED ESTABLISHMENTS.
 Owen H. Smith.

Munitions Council, Group D.

Member of Council, Maj.-Gen. the Hon. Sir F. R. Bingham, K.C.M.G., O.B.E.
Secretarial Officer, Capt. G. Head, O.B.E.

DESIGN.

Controller, Brig.-Gen. A. C. Currie, C.B., C.M.G.
Assistant Controllers, Col. H. de B. Miller, D.S.O.; Col. G. H. S. Browne, C.B.
Section Directors, Lt.-Col. E. F. Creaswell, D.S.O.; Lt.-Col. N. Elliot; Lt.-Col. H. W. Todhunter, C.M.O.; Maj. the Hon. H. R. Atkinson.

INSPECTION.

Controller, A. H. Collinson, O.B.E.
Assistant Controllers, Lt.-Col. J. H. M. Greenly; Col. J. R. Stansfeld, C.B.; A. E. Hadley, O.B.E.; Col. G. H. S. Browne, C.B.
Section Directors, Lt.-Col. R. H. R. Benson; Lt.-Col. W. H. Webley Hope, C.M.G.

MILITARY ESTABLISHMENT.

Section Director, Lt.-Col. C. M. Knight, D.S.O.

Munitions Council, Group S.

Member of Council, Sir John Hunter, K.B.E.
Secretarial Officer, D. A. Macnaughton.

IRON AND STEEL PRODUCTION.

Controller, Col. W. Charles Wright, C.B.
Deputy Controllers, W. T. MacLellan, O.B.E.; W. J. Jones, O.B.E.

FACTORY CONSTRUCTION

Director, W. B. Shaw.
Assistant Director, J. F. Syme.

BUILDING BRICKS.

Controller, H. Carter Pegg.

FORGINGS, CASTINGS, AND STAMPINGS.

Controller, D. M. Anderson.
Assistant Controllers, A. E. Smithson; G. E. Wells; A. Stubbs.

MUNITIONS COAL SUPPLY.

Director, P. G. Lewis.

Munitions Council, Group M.

Member of Council, Sir Ernest Moir, Bart.
Secretarial Officer, H. T. Holmes.

RAW MATERIALS (NON-FERROUS) DEPARTMENT.

Controller, Sir L. W. Llewellyn, K.B.E.
Assistant Controllers, Sir J. Eaglesome, K.C.M.G.; Lt.-Col. A. J. Foster, C.M.G.; C. Budd, O.B.E.; R. W. Rucker.
Technical Advisers, F. W. Harbord, O.B.E.; W. R. Lysaght, O.B.E.
Section Directors, Capt. W. Battison; W. A. Torrington; H. A. Fortington, O.B.E.; G. Pritchard; A. R. Rivet; B. E. Wenham, O.B.E.; G. Horn; Lieut. A. Hutt, M.B.E.

RAILWAY MATERIALS DEPARTMENT.

Director, E. J. Allen, C.B.E.
Assistant Director, W. H. Palmer, O.B.E.
Section Directors, E. J. Frewen, M.B.E.; R. F. Cook, M.B.E.; C. M. Hunter; J. S. Ferguson; Lieut.-Col. M. F. Kittod.

OPTICAL MUNITIONS, GLASSWARE AND POTASH PRODUCTION DEPARTMENT.

Controller, H. A. Colefax, K.O.
Assistant Controller, F. Batty.
Scientific Advisers, Sir H. S. Jackson, K.B.E., F.R.S.; Prof. P. G. H. Boswell, D.Sc., F.R.S.; Prof. J. W. Cobb, B.Sc., F.R.C.; Prof. F. J. Cheshire, O.B.E.; Kenneth Chance, F.R.C.; Prof. E. Wilson.
Section Directors, R. S. Biram; T. Knowles; S. W. Morrison, O.B.E.; R. B. Ransford; F. C. Dannatt; J. D. Mills.

OVERSEAS TRANSPORT DEPARTMENT.

Director, R. Burton Chadwick.
Assistant Director, R. W. Sharples, O.B.E.
Section Directors, C. W. Murray; G. A. Tyson.

FORWARDING DEPARTMENT.

Director, W. T. Potts.

INLAND TRANSPORT DEPARTMENT.

Director (Vacant).
Section Director, F. C. A. Coventry, O.B.E.

MINERAL RESOURCES DEVELOPMENT DEPARTMENT.

Director, Capt. L. Cockerell.

Munitions Council, Group X.

Member of Council, Sir Keith Price.
Secretarial Officer, G. C. Smallwood, O.B.E.

EXPLOSIVES SUPPLY.

Director-General, Rt. Hon. Lord Moulton, O.B.E., K.C.B., F.R.S.
Controller, Maj. A. Corbett.
Deputy Controller, Lt.-Col. H. W. Kempster, C.M.G.
Chief Adviser, with rank of Controller, K. B. Quinan, C.B.

Section Directors, R. A. Alston; H. T. Dickinson; R. R. Enfield; F. L. Halford; C. F. Heathcote; Prof. J. G. Lawnd; Col. Sir F. L. Nathan, K.B.E.; A. S. Parsons; Lt.-Col. C. E. Phipps, C.B.; Maj. G. M. Thompson; R. Unwin; Brig.-Gen. W. Clare Savile, C.B., D.S.O.

MINERAL OIL.

Controller, Lt.-Col. Sir A. C. Churchman, Bart.
Assistant Controllers, Engr.-Comdr. J. F. Shaw, R.N.; E. Houghton Fry.
Section Directors, T. F. Winmill; J. Collie.

CHEMICAL WARFARE DEPARTMENT.

Controller (Vacant).
Deputy Controller, Lt.-Col. E. F. Harrison, C.M.G., R.E.
Assistant Controllers, Col. W. J. Bythell, R.E.; Bt. Maj. B. T. Wilson, D.S.O., R.E.

Munitions Council, Group O.

Member of Council, Sir James Stevenson, Bart.
Secretarial Officer, F. G. L. Bertram, O.B.E.

GUN AMMUNITION MANUFACTURE.

Controller, C. H. Stevens, C.B.E.
Deputy Controller, G. Humphreys, O.B.E.
Assistant Controllers, O. B. Binns, O.B.E.; J. Good;
Maj. P. A. Cooper.
Section Directors, E. B. Matland, O.B.E.; S. Simons;
Maj. J. S. A. Walker; Lord Torphichen; J. Mackintosh, O.B.E.

GUN AMMUNITION FILLING.

Controller, Br.-Gen. L. C. P. Milham, C.M.G.
Deputy Controller, J. B. Strain.
Section Directors, Lt.-Col. J. V. Ramsden, D.S.O.; C. R. Duggan;
Lt.-Col. H. Luhrs, C.M.G.; Col. Sir H. W. Barlow, Bart., C.B., C.M.G.; Lt.-Col. E. R. Pratt; Dr. T. Martin Lowry, O.B.E., F.R.S.; R. H. Pitts.

MUNITIONS TIMBER SUPPLIES.

Controller, D. Bain, C.B.E.
Deputy Controller, J. M. Llewellyn, O.B.E.
Section Directors, F. E. Brown; J. Heeps; T. W. Macdonald; A. McDougall; G. W. Wooliscroft.

AREA ORGANISATION.

Director, Hon. H. D. McLaren, C.B.E., M.P.
Deputy Director, F. F. Lyall, C.B.E., I.C.S.
Section Directors, A. S. Durnett; H. G. Eadie, M.B.E.;
Lt.-Col. C. MacNaghten, C.M.G.; A. Newlands, O.B.E.

SMALL ARMS AMMUNITION.

Controller, L. Gordon, C.B.E.
Section Directors, Lieut. T. Twist, O.B.E.; Lt.-Col. J. E. Dixon.

Gauges.

Director, M. F. Ryan, C.B.E.
Deputy Director, E. W. Smith, O.B.E.
Section Directors, Lieut. F. C. Bown; R. Hudson;
W. Ferns, M.B.E.; A. M. Sillar, M.B.E.

DEPARTMENT OF ENGINEERING.

Controller, E. V. Haigh, C.B.E.
Deputy Controller, Capt. R. C. Kelly.
Assistant Controllers, M. Leonard Ward, O.B.E.; H. L. Critchley, M.B.E.
Section Directors, Capt. R. Amberton; G. D. Farwell;
E. W. Park; T. H. Clouston.

ROYAL ORDNANCE FACTORIES, WOOLWICH.

Chief Superintendent, Col. C. P. Martel, C.B.

DEPARTMENT OF GUN MANUFACTURE.

Controller, V. B. Stewart, O.B.E.
Deputy Controller, A. Hall Brown, O.B.E.
Section Directors, Lieut. W. M. Carver; Capt. C. H. Fowler, M.B.E.; Capt. D. E. Grant; Maj. E. C. Niven;
E. Jervoise; Lt.-Col. H. Ramsden, C.M.G.; Maj. A. E. King.

SMALL ARMS AND MACHINE GUNS.

Controller, Lt.-Col. S. C. Halse, C.M.G.
Assistant Controller, M. T. Denne, O.B.E.
Section Directors, Maj. G. Westover; R. Wake;
Lt.-Col. G. P. Mills, D.S.O.; F. W. Bennett.

MACHINE TOOLS.

Controller, E. M. Hiffe, C.B.E.
Assistant Controllers, F. E. Bagnall, O.B.E.; P. V. Vernon, O.B.E.
Section Directors, W. A. Ashworth, M.B.E.; J. W. Milne;
J. Varley, M.B.E.; T. E. Davies, O.B.E.

Munitions Council, Group W.

Member of Council, Maj.-Gen. the Rt. Hon. J. E. B. Seely, C.B., C.M.G., D.S.O., M.P.
Secretarial Officer, Capt. L. D. Grewar.

MECHANICAL WARFARE DEPARTMENT.

Controller, J. B. Maclean, C.B.E.
Deputy Controller, Comand. F. Bloomfield.
Assistant Controllers, Lieut. F. B. Shaw, R.N.V.R.; Capt. A. E. Gelder, M.B.E.; Lieut. R. D. Spinney, R.N.V.R.

LABOUR INTELLIGENCE AND STATISTICS SECTION.

Section Directors, J. Chartres; H. O. Meredith.

Demobilisation Board.

Chairman, Sir James Stevenson, Bart.

Secretariat, H. H. Piggott, C.B.E.

MUSEUM, THE BRITISH,

Bloomsbury, W.C. 1.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1857, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £126,142 (including Natural History Museum) in 1918-19, and were met by a vote under "Education, Science, and Art." Class IV. of the Civil Service Estimates.

Director and Principal Librarian, Sir Frederic George Kenyon, K.C.B., F.R.S., Litt.D. £1,500

MUSEUM, THE LONDON.

Lancaster House, St. James's, S.W. 1.

The London Museum was instituted, on the lines of the Carapavet at Paris, for the conservation of the antiquities, &c., of London. The Collection was originally housed in Kensington Palace, and was reopened in 1914 at Lancaster House. The cost of administration in 1917-18 was estimated at £2,300.

Keeper and Secretary, Sir G. F. Laking, Bart., C.B.

M.A., F.S.A.

Asst. Secretary, F. A. Harman Oates, F.S.A.

Inspector of Excavations, G. F. Lawrence.

MUSEUM, THE NATURAL HISTORY,

Cromwell Road, S.W. 7.

The Natural History Collections in the British Museum were removed to South Kensington and re-arranged there in 1881-85, the new museum being opened to the public in 1881. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £44,045 in 1918-19.

Director (Vacant) £1,200

Assistant Secretary, Charles E. Fagan, I.S.O. £700

Assistant, 1st Class, Basil H. Soulsby, B.A. £500

Clerks, W. H. R. Holl; W. J. Anderson £250 to £350
 Assistant, 1st Class (Library), B. B. Woodward... £500
 Keeper of Zoology, Dr. Sidney F. Harner, M.A., F.R.S.

£800

Assistants, 1st Class, George A. Boulenger, F.R.S.; Old-
 field Thomas, F.R.S.; Frs. Jeffrey Bell, M.A.; Ran-
 dolph Kirkpatrick; Dr. W. T. Calman; C. T. Regan,
 M.A., F.R.S.; W. P. Pycraft; A. S. Hurst; J. G. Dol-
 lman, B.A. £300 to £500
 Assistants, 2nd Class, G. C. Robson, B.A.; C. Court
 Trent; H. A. Baylis, B.A.; A. K. Totton £150 to £300
 Keeper of Entomology, Dr. C. J. Gahan, M.A. £800

Assistants, 1st Class, Sir George F. Hampson, Bart.;
 Ernest E. Austen; J. Hartley Durrant; G. J.
 Arrow £300 to £500
 Assistant's, 2nd Class, F. W. Edwards, B.A.; K. G.
 Blair, B.Sc.; N. D. Riley; F. Laing, M.A., B.Sc.

£150 to £300

Keeper of Geology, Dr. A. S. Woodward, F.R.S. £800
 Assistant do, Dr. F. A. Bather, F.R.S. £650
 Assistants, 1st Class, R. B. Newton; Dr. C. W. An-
 drews, F.R.S.; W. D. Laing, M.A. £300 to £500
 Assistant, 2nd Class, W. N. Edwards, B.A. £150 to £300
 Keeper of Mineralogy, Dr. George T. Prior, M.A., F.R.S.

£800

Assistants, 1st Class, L. J. Spencer, M.A.; Dr. G. F. H.
 Smith, F.R.S. £300 to £500
 Assistant, 2nd Class, W. Campbell Smith, M.A.

£150 to £300

Keeper of Botany, Dr. A. B. Rendle, F.R.S. £800
 Assistants, 1st Class, A. Gepp, M.A.; E. G. Baker

£300 to £500

Assistants, 2nd Class, H. F. Wernham, B.A., B.Sc.; J.
 Ramsbottom, M.A.; A. J. Wilhoit, B.A. £150 to £300

MUSEUM, THE VICTORIA AND ALBERT, South Kensington, S.W. 7.

The history of the Museum may be said to begin in
 1852, when the Museum of Ornamental Art was founded
 at Marlborough House. The collection consisted of
 certain objects which had been purchased at the 1851
 Exhibition, "on account of the excellence of their art
 and workmanship," at a cost of £5,300, together with
 other specimens purchased for the use of the various
 Schools of Design since 1839, and dispersed among them.
 Additions have since been made by gift and bequest.
 The other parts of the building were erected between
 1860 and 1884; the new buildings were completed in 1909.
 The administrative expenses were estimated at £62,153
 in 1908-19, and were met by a vote under Education,
 Science, and Art. The branch museum at Bethnal
 Green was opened in 1872. The buildings were removed
 from South Kensington, and re-erected on land purchased
 for the purpose locally. The administrative expenses
 were estimated at £2,382 in 1918-19.

£1,200 to £1,500

Director and Secretary, Sir Cecil H. Smith, C.V.O., LL.D.

SECRETARIAT.

Secretary to the Advisory Council, H.A. Kennedy

£400 to £600

NATIONAL LIBRARY OF WALES, Aberystwyth.

Founded by Royal Charter, 1707, and maintained by
 annual grant from the Treasury. Contains valuable
 MSS. and rare printed books in Welsh and other Celtic
 languages. One of the six libraries entitled to certain
 privileges under Copyright Act. Open daily 10 to 5, Sat.
 10 to 1.

Librarian, John Ballinger, M.A.

NATIONAL MUSEUM OF WALES, Cardiff.

President, Rt. Hon. Lord Treowen.

Director, W. Evans Hoyle, B.Sc.

NATIONAL DEBT OFFICE, 19 Old Jewry, E.C. 2.

The National Debt Commissioners were appointed
 under 26 Geo. III., c. 31 (1786), by which a permanent
 Sinking Fund was to be established, and a sum of
 £250,000 issued quarterly to be applied towards the
 reduction of the National Debt, being commonly spoken
 of as "Mr. Pitt's Sinking Fund." In 1829 this was super-
 seded by appropriating the surplus income of the year
 as the Sinking Fund, and this is commonly known as
 "The Old Sinking Fund." In 1875 "The New Sinking
 Fund" was set up by Sir Stafford Northcote, 30 St. Vic-
 c, c. 45, and this, with the Old Sinking Fund, now mainly
 operates in reducing the Debt. The Commissioners are
 at the present time the Speaker, the Chancellor of the
 Exchequer, the Master of the Rolls, the Lord Chief
 Justice, the Paymaster-General, and the Governor and
 Deputy-Governor of the Bank of England. The adminis-
 trative expenses of the Board were estimated at £13,471
 in 1918-19.

Comptroller-General, Sir W. G. Turpin, K.C.B. £1,500

Private Secretary, D. McKelhan £700

Assistant Comptroller, G. F. Ansell £800 to £1,000

OVERSEAS TRADE (DEVELOPMENT AND INTELLIGENCE), DEPARTMENT OF

(Joint Department of the Foreign Office and the Board of Trade).

73, Basinghall Street, London, E.C. 2.

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and Board of Trade, and is represented in Parliament by a Parliamentary Secretary, who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and also of Additional Parliamentary Secretary at the Board of Trade. The Department is concerned mainly with the promotion and development of overseas trade, and comprises the former Department of Commercial Intelligence of the Board of Trade and the section of the Foreign Trade Department of the Foreign Office dealing with Form "K" and with other matters relating to the promotion of trade abroad. It also controls the War Trade Intelligence Department, and has, in addition, taken over certain functions hitherto performed by the Foreign Office in connexion with commercial intelligence and with the Commercial Counsellor and Consular Services. The temporary headquarters of the Department are at 73, Basinghall Street, London, E.C. 2.

Parliamentary Secretary, Sir Arthur D. Steel-Maitland, Bart., M.P.

Private Secretaries, R. L. Nosworthy, W. M. Hill.

Comptroller-General, Sir William Clark, K.C.S.I., C.M.G.

Private Secretary, H. W. Wisawould.

Director of Overseas Division, F. G. A. Butler, C.B., C.M.G.

Director of United Kingdom Division, W. J. Glenny, O.B.E.

Director of Empire Division, R. W. Matthew.

Director of British Industries Fair, W. R. K. Gandell, O.B.E.

PATENT OFFICE

(and Industrial Property Department, Board of Trade), 25 Southampton Buildings, W.C. 2.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties are performed by a Comptroller-General with a staff of officials. The administrative expenses were estimated at £150,077 in 1918-19.

Commercial Manager, J. H. Estill.
Chief Police Officer, E. C. S. Baker.
Comptroller, H. E. Upton.
Staff Manager, Sydney Bradgate.
Stores Manager, F. M. Thomas.
Land and Estate Manager, W. H. Ewell.
Chief Examiner, T. J. P. Hirst.
River Superintendent, F. J. Batty.
Harbour Masters, (*Upper District*) Capt. D. R. Buchtan, Old Swan Pier, E.C. 4; (*Lower District*) Capt. F. W. Kershaw, Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 1.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The administrative expenses of the Post Office were estimated at £26,121,304 in 1918-19.

<i>Postmaster-General</i> , Rt. Hon. A. H. Hingworth, M.P.	£2,500
<i>Asst. Postm.-Gen.</i> , Rt. Hon. H. Pike Povey, M.P.	£1,200
<i>Private Sec.</i> , L. W. A. Atkin-Berry	£200
<i>Sec. to the Post Office</i> , George E. P. Murray, C.B.	£1,750 to £2,000
<i>Private Sec.</i> , G. E. G. Forbes	£150
<i>Joint Second Secs.</i> , H. S. Carey, C.B., and Col. St.	

Andrew Ogilvie, R.R.E., C.B. £1,250 to £1,400

Victoria Street, S.W. 1.

District Postmaster, W. T. Wheeler£500 to £650
Assist. District Postmaster, F. W. F. Evans£400 to £500
1st Class Clerk, E. A. Martin£310 to £400
Assist. Superintendents (1st Class), J. J. Foster; W. B. D. Poulton; E. J. Morton; G. Finter; T. E. Woollard£300 to £405
P.M. House of Commons, W. J. Webb£300 to £405
* Also allowance of £50.

Battersea, 202 Lavender Hill, S.W. 11.

Assist. District Postmaster, P. Hale£400 to £500
Assist. Superintendent (1st Class), J. R. Woby£300 to £405

South-Eastern, 239 Borough High Street, S.E. 1

District Postmaster, H. Filmer£500 to £650
Assist. District Postmaster, C. E. Hamer £400 to £500
Assistant Superintendents (1st Class), T. Kildsey; F. P. Bailey; L. V. Cox£300 to £405
* Also allowance of £50.

Norwood, 35 Westow Street, S.E. 19.

Assist. District Postmaster, J. W. Aston £400 to £500
1st Class Clerk, L. T. Churley£310 to £400

Northern, 126 Upper Street, N. 1.

District Postmaster, J. A. Walker£500 to £650
Assist. District Postmaster, J. W. F. Relf £400 to £500
1st Class Clerk, J. Pryer£310 to £400
Assist. Supt. (1st Class), H. A. Tann£300 to £405

North-Western, Eversholt Street, N.W. 1.

District Postmaster, H. Norris£500 to £650
Assist. District Postmaster, H. G. Carter £400 to £500
1st Class Clerk, F. A. Gill£310 to £400
Assistant Superintendent (1st Class), J. Baily£300 to £405

London Telephone Service.

Controller, G. F. Preston£000 to £1,100
Deputy Controller, W. A. Valentine£650 to £700
Assist. Controller, J. F. Stirling£520 to £600
Superintendents, W. R. Bold; W. F. Taylor £400 to £500
Superintendents of Traffic, P. W. Coleman; F. J. Edmonds£400 to £500
1st Class Clerks, E. H. Barnes; R. Bryson; A. Gray; A. W. Kellond; M. Larkins; J. Leshie; J. McMillan; C. W. Muirhead; G. E. Nicholls; J. G. S. Rutter£310 to £400
Assist. Superintendents of Traffic (1st Class), C. F. Arrowsmith; W. B. Benham; H. G. Corner; H. Dive; P. J. Mantle; P. W. H. Maycock; M. C. Pink; E. A. Pounds; L. A. Prosser; W. J. White£310 to £400
Superintendent (Female Clerical Staff), Miss J. Liddiard£280 to £400
Assist. Superintendent, Miss A. I. Tufts £210 to £260
Superintendent (Exchange Staff), Miss A. A. Heap (personal to present holder)£350

Medical Department.

Chief Medical Officer, J. Sinclair, M.D., M.R.C.P.

£1,000 to £1,200
Second Medical Officer, H. E. Hewitt, M.D., B.S., D.P.H. £450 to £650
Assistants to Medical Officers, G. C. W. Wright, M.D.; H. H. Bashford, M.D., B.S.; B. G. H. Connolly, M.B., B.S. £200 to £400
Female Medical Officer, Miss M. L. C. Madghon, M.B. £350 to £500
Assist. do., Miss E. S. Cooke, M.B., B.S. £180 to £300

Money Order Department.

Controller, F. Wickham, *O.B.E.*.....£800 to £1,000
Assist. do., J. A. Griffin.....£600 to £700
Principal Clerks, W. J. Parker; F. R. Frost

£500 to £550
Assist. Principal Clerks, C. H. Browne; A. W. Cheffins; A. Boud; W. H. Codd.....£410 to £490
1st Class Clerks, E. J. McCormick; E. R. King; J. W. Jones; J. Anderson; A. B. Talbot; E. M. Walden; G. Ward.....£310 to £400

Female Staff.

Superintendent, Miss R. Loch, *O.B.E.*.....£350 to £450
Personal allowance £50.

Deputy Supts., Miss S. A. M. Hawkins; Miss A. Lacey.....£270 to £330

Assistant Superintendents.

(*Old Money Order Branch Establishment.*)
Miss M. H. Reuwick.....£210 to £260
 (*Combined Establishment.*)

Misses J. A. Duncan; C. M. Marwood; E. J. Cook; M. Smith; M. Muoro.....£210 to £260

Savings Bank Department.

Controller, Sir Henry Davies, *C.B., I.S.O.*.....£1,000 to £1,200
Assistant Controllers, H. E. Charlton; T. S. Hutchings; A. Hemstock; and H. Joy

(*allowance of £100 to one*) £700 to £800
Principal Clerks, A. L. Fieldson; H. S. Compton; C. R. Undrell; W. S. Bond; H. Rand; E. Bennett; L. A. Rambotham; A. W. Stoneham; C. F. Constant; J. M. Linsdell; D. H. McCabe; A. Horn; G. J. Huard; A. C. Edwards; C. R. Boyle; F. J. Brett; T. E. Olver; C. H. Foster; G. A. Willis (*allowance of £50 to one*).....£450 to £600

Superintendents, F. J. Venables; A. H. Bowie; T. Lyon; W. L. Moran, £440 to £490; A. Emmett; T. W. Williams; C. H. Drake; J. R. Smith; L. L. N. C. Runsey; J. Johnson; W. J. Orams; H. K. Bennett; C. E. Bate; C. E. Banks; W. S. Barrett; H. L. Drew; W. Fhinn; J. W. Askew; F. Middleton; F. W. Nunceley; F. V. Turpin; A. H. Taylor; T. M. Plucknett; C. W. M. Paterson; H. F. Cornwell; J. Adderley; B. J. Entwistle; J. W. Tasker; C. James; J. Oakesmith; F. K. Hirst; S. P. Mitchell; A. W. Blessley; G. H. West; J. Booth; J. N. Finch; F. W. Elliott; W. A. Tubb; J. Reynolds; J. Boggon; C. J. Capponi; F. W. Lacey; E. Smith; I. J. Hurns; A. D. Bell; S. W. Hodge; A. Neave; F. E. Green; H. Pentecost; W. M. Kelly; B. Leggett; W. L. Shand; W. J. P. Dargson; J. F. Geeson; A. E. Bland; J. A. George; G. A. Pulse; A. Wade; T. M. Wood; H. V. Geddes; W. R. Russell; E. Harris.....£375 to £450

Female Staff.

Superintendent, Miss J. Buchanan, *O.B.E.*.....£350 to £500
Deputy Supts., Misses A. E. Sharrock; M. F. Haynes; A. R. Paterson; H. G. Young

£270 to £330 (*allowance of £30 to one*)
Assist. do., Misses E. E. Wyndham; K. A. Bumpus; L. A. Sweet; F. S. MacRae; M. Phelan; E. A. Crowther; J. B. Lang; E. Mathews; E. E. Bowen; A. E. Hooke; A. M. Walker; F. S. M. West; B. J. Carson; H. W. Whiteman; A. Matthews

£210 to £260

Solicitor's Department.

Solicitor, Crompton Llewelyn Davies, *M.A.*.....£1,800
Assist. do., Robert Noyes.....£800 to £1,000
Additional Asst. Solicitor, V. Alsop.....£600 to £700

Prof. Assets (Solicitors), H. One Smith; J. Ockell; D. Aikenhead Stroud, *LL.B.*; H. E. Gallaher, *LL.B.*; * S. Johnson, *LL.B.*; J. Forbes Smith, *M.A., LL.B.*; W. N. Raymond; J. P. E. Falconer; R. R. Hanby; Holmes; C. T. Hallam; J. D. Bateman.

Other Assistants to Solicitor, W. McIntyre; E. J. Armstrong; E. Edwards; H. Beagley; J. Burch; L. Beagley; H. C. Pratt; H. S. Steele; G. W. Allan.

Stores Department.

Controller, G. Morgan, *I.S.O.*.....£900 to £1,100
Vice-Controller, W. H. Allen, *O.B.E.*.....£800 to £900
Asst. Controllers, H. Sparkes; G. F. Mansbridge

£700 to £800
Staff Officers, J. F. Aldridge; F. W. Fugeman; A. A. Parsons; C. E. Fenton, *M.B.E.*; H. A. Cheel; W. S. Austin; C. Ward; C. W. Wheeler.

London, £500 to £600; *Provincial*, £450 to £550

Director, Sir J. D. Rees, *K.C.I.E., C.V.O., M.P.*

Assistant Director, H. S. Hunter.

Registrar and Accounting Officer, C. H. W. O'Brien.

Lady Superintendent, Miss G. C. Westbrook, *M.B.E.*

PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was re-constituted in 1797. At present it consists of certain eminent persons whose names are given on p. 135. Members of the Cabinet must be Privy Counsellors, and they normally form the acting Privy Council. The Council is summoned as such to act with others upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, Rt Hon. Earl Curzon

of Kedleston, *K.C., O.C.S.I., G.C.I.E.*.....£2,000

Private Sec., G. Cunningham, *C.B.*.....£2,000

Clerk of the Council, Sir Almeric W. FitzRoy, *K.C.M.*

K.C.V.O......£1,500

Deputy do. (Chief Clerk), J. C. Ledlie, *O.B.E.*.....£800 to £900

Senior Clerk, Chas. J. Dalrymple Hay.....£600 to £800

Staff Clerk, A. W. Whittaker.....£300 to £400

PROPAGANDA IN ENEMY COUNTRIES. DEPARTMENT OF.

Principal Legal Officer, P. Archer £500 to £700

PUBLIC WORKS LOAN BOARD, Old Jewry, E. C. 2.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. The total amount thus advanced in 1917-18 amounted to £326,517.

Chairman, E. Norman *imp.*
Deputy Chairman, Hon. Herbert C. Gibbs *imp.*
Secretary, G. A. Calder £1,500
Assist. do. and Chief Clerk, H. G. H. Barnes £600 to £800
Solicitor, C. L. Nicholson £1,200 to £1,500
Chief Clerk to do., D. F. Buckley £400 to £700

QUEEN ANNE'S BOUNTY, 3 Dean's Yard, S. W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tithes" derived from the sees, dignitaries, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tithes" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £200 in net annual value. The total amount distributed in 1917 was about £11,639. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fann.

Chief Clerk, George Simpson.

1st Class Clerks (Senior Division), John F. Sapsford;

R. G. Rowland; E. Jump; M. Rogers; D. Smeaton;

Do. (Junior Division), W. Russell; W. Holford;

W. J. P. Smith; A. G. Spencer; S. D. Knight.

Solicitor, F. G. Hughes.

Asst. Solicitor, W. G. Hannah.

Architect, William Alfred Hughes.

Auditor, H. C. Garland, 33 Nicholas Lane, E. C.

RECONSTRUCTION, MINISTRY OF,

2 Queen Anne's Gate Buildings,

Westminster, S. W. 1.

The Ministry of Reconstruction was established by Act of Parliament in August 1917, to consider and advise upon the problems which may arise out of the present war, and may have to be dealt with upon its termination.

Minister of Reconstruction, Rt. Hon. C. Addison,
M.D., M.P.

Private Secretary, P. Barter.

Secretary, Vaughan Nash, C.V.O., C.B.

RECORD OFFICE, THE PUBLIC, Chancery Lane, W. C. 2.

The Public Record Office as it now stands was completed in 1900 for the safe custody of the Public Records, which were first ordered to be kept by Henry I. at the beginning of the twelfth century. The administrative expenses were estimated at £21,935 in 1917-18. (For hours see p. 492.)

Keeper of the Records, The Master of the Rolls.

Deputy, Sir H. C. Maxwell-Lyte, K.C.B. £1,400

Assistant Keeper and Secretary, H. Rodney £800

Assistant Keepers, E. Salisbury; R. H. Brodie; H.

Hall; J. G. Black; C. G. Crump; A. St. J. Story-

Maskelyne £500 to £700

Clerks, R. C. Fowler; J. V. Lyle; M. S. Gresham; C.

Johnson; A. E. Stamp; H. E. Headlam; J. B. W.

Chapman; C. T. Flower; S. C. Ratcliff; M. C. B.

Dawes; C. H. Jenkinson; J. J. O'Reilly; O. C. Chap-

man; J. G. Phillimore; W. R. Cunningham; R. L.

Atkinson £150 to £500

Land Revenue Records and Enrolments.

Keeper of the Records, Sir H. C. Maxwell-Lyte, K.C.B.

RESEARCH, DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL,

15 Great George Street, S. W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1915, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organisation and development of scientific and industrial research. The Committee of the Privy Council is now constituted as follows:—The Lord President, the Secretary of State for the Colonies, the Chancellor of the Exchequer, the Secretary for Scotland, the Chief Secretary for Ireland, the President of the Board of Trade, the President of the Board of Education, the Most Hon. the Marquess of Crewe, K.G., L.D., the Rt. Hon. Viscount Haldane of Clova, K.T., G.M., the Rt. Hon. Lord Gainford of Headlam, the Rt. Hon. A. H. Dyke Acland, L.D., the Rt. Hon. Arthur Henderson, M.P. The Order in Council also appointed an Advisory Council, to whom all proposals for researches stand referred. By Charter dated November 23, 1916, the official members of the Committee of the Privy Council were created a Body Corporate, under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research," to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1916, a separate Department, having its own Parliamentary Vote, was created for the service of the Committee.

The National Physical Laboratory—As from April 1, 1918, the Department of Scientific and Industrial Research became responsible for the maintenance of the National Physical Laboratory, which was founded in 1899 for standardising and verifying instruments, for testing materials, for the determination of physical constants, and for research into matters of technical and industrial importance. The Scientific control of the Laboratory is exercised by the President and Council of the Royal Society acting through a General Board, representing the Society and the great Technical Institutions, and an Executive Committee acting as a Committee of the Department.

The Laboratory comprises eight main departments:—(1) Physics, (2) Electricity, (3) Metrology, (4) Engineering, (5) Aerodynamics, (6) Metallurgy and Metallurgical Chemistry, (7) the William Froude National Tank, (8) Secretariat. The Physics Department includes Divisions for Heat and Thermometry, Optics, Sound, Radium and X-Ray Work, and Tide Prediction. The main Divisions of the Electricity Department deal respectively with Electrical Standards, General Electrical and Mag-

netic Measurements, Alternating Current Tests and Research, Direct Current Measurements, and Photography. The Metrology Department is responsible for the Laboratory standards of length, area, volume and mass, and among the various branches of work dealt with are the verification of standards of length, standard bars, surveying tapes, etc., the testing of Engineers' gauges, including screw gauges, measurements of area, volume and mass, the testing of barometers, hydrometers, taximeters, watches and chronometers, and the highest class of scientific glassware for volumetric measurements. The glassware testing has recently been reorganised on a greatly increased scale owing to the growth in the manufacture of such ware in this country during the war. When the Ministry of Munitions was formed the Laboratory was called upon to undertake the testing of the gauges; the work has assumed very large dimensions and a special building for its accommodation has been provided. The Engineering Department carries out research on engineering problems: it comprises a laboratory and experimental track for tests of road materials. The Aerodynamics Department conducts researches on aircraft models and parts as required by the Advisory Committee for Aeronautics; investigations on light alloys and other materials, engines and accessories, fabrics, etc., are carried out in other Departments, especially the Engineering, Metallurgy and Electro-technics Departments and the William Froude National Tank. The Department of Metallurgy and Metallurgical Chemistry, in addition to researches on steels, on aluminium and other alloys, is engaged on researches relating to optical glass and refractory materials. The equipment includes a rolling mill for the experimental working of alloys. The Metallurgical Building was provided through the generosity of Sir Julius Wernher in 1910. The William Froude National Tank, the gift of Sir A. F. Yarrow for the service of the nation, carries out tests and researches on ship and propeller models for the information of designers and naval architects. *Chairman of the General Board*, The President of the Royal Society; *Chairman of Executive Committee*, Lord Rayleigh, O.M., F.R.S.; *Director*, Sir Richard Glazebrook, C.B., D.Sc., F.R.S.; *Superintendent, Physics Department*, the Director; *Superintendent, Electrical Standards*, F. E. Smith, O.B.E., F.R.S., A.R.C.S.C.; *Superintendent, Metrology Department*, J. E. Sears, junior, M.A., A.M.I.M.S.C.E.; *Superintendent, Engineering Department*, T. E. Stanton, D.Sc., F.R.S., A.M.I.M.S.C.E.; *Superintendent, Aerodynamics Department*, T. E. Stanton, D.Sc., F.R.S., A.M.I.M.S.C.E.; *Superintendent, Department of Metallurgy and Metallurgical Chemistry*, W. Rosenham, B.A., D.Sc., F.R.S.; *Superintendent, William Froude National Tank*, G. S. B. R. O.N.E., late R.C.N.C., A.M.I.M.S.C.E.; *Secretary of the Laboratory and of the Advisory Committee for Aeronautics*, F. J. Selby, M.A., A.F.A.E.S.

The *Fuel Research Board*, appointed by the Committee of the Privy Council in February 1917, is entrusted with investigation of the nature, preparation and utilisation of fuel of all kinds, both in the laboratory and, where necessary, on an industrial scale. A scheme of research, described in the Board's Report published by the Stationery Office in September 1917, has been approved; and a Fuel Research Station, designed and equipped to give effect to this scheme, is in course of construction at East Greenwich. *Director of Fuel Research*, Sir George Beilby, F.R.S.; *Acting Secretary of the Fuel Research Board*, R. W. Stammers; *Chief Chemist to the Fuel Research Board*, Dr. Gray.

The *Food Investigation Board*, established early in 1918, is entrusted with the organisation and control of research into problems connected with the preservation of foodstuffs and with the conversion of natural products into food. Investigations are being conducted at various Universities, Colleges and Research Stations throughout the country. *Director of Food Investigation*, W. B. Hardy, Sec. R.S.; *Secretary of the Food Investigation Board*, Miss Freda Saxton.

Of other Research Boards and Committees appointed by the Committee of the Privy Council the most important are the Tin and Tungsten Research Board, the Industrial Fatigue Research Board (a Joint Committee of the Department and the Medical Research Committee), the Mine Rescue Apparatus Research Committee, and the Building Materials Research Committee.

President of the Committee of the Privy Council, The Lord President (the Rt. Hon. the Earl Curzon of Kedleston, K.C.).

Secretary of the Department, Sir H. Frank Heath, K.C.B.
Private Secretary to the Secretary, Miss J. E. Robertson.

Assistant Secretaries, A. Abbott; LL S. Lloyd.
Clerk-in-Charge, P. V. Haynes.

Junior Administrative Assistants, Miss M. Fass;

Miss H. M. Nichols.

Financial Officer, P. Wheelock.

Technical Officers, Dr. H. F. Coward; H. Davies; A. Richardson; R. W. Stammers; E. Tabor.

Advisory Council, Sir William McCormick, LL.D. (Administrative Chairman); Lord Rayleigh, O.M., LL.D., F.R.S.; Sir George Beilby, F.R.S.; Sir Maurice Fitzmaurice, C.M.G.; Professor J. A. McClelland, F.R.S.; the Hon. Sir Charles A. Parsons, K.C.B., F.R.S.; Professor J. F. Thorpe, C.B.E., F.R.S.; Sir Richard Threlfall, K.C.B., F.R.S.

Secretary of the Advisory Council, Sir H. Frank Heath, K.C.B.

ROAD BOARD, THE, 35 Cromwell Road, S.W. 7.

Chairman, Sir George S. Gibb £3,000
Other Members, Lord Pirrie, K.P.; Sir J. H. A. Macdonald, K.C.B.; Viscount St. Davids; Brig-Gen. Lord Montagu of Beaulieu *imp.*
Manager and Engineer, Brig-Gen. H. P. Maybury, C.B., A.M.I.M.S.C.E. £1,500
Acting Manager and Engineer, J. S. Killick, M.I.C.E.
Secretary, W. Rees Jeffreys £1,000
Assist. Sec., Maj. H. R. Watling £200

ROYAL COMMISSION FOR THE EXHIBITION OF 1881.

(Incorporated by Royal Charter as a Permanent Commission.)

Offices, 54 Victoria Street, S.W. 1.

President, H.R.H. Prince Arthur of Connaught, K.G., K.T.

Commissioners, H.R.H. the Duke of Connaught and Strathearn, K.G.; Marquis of Lansdowne, K.G.; Earl of Rosebery, K.G., K.T.; Earl Spencer, K.G.; Viscount Esher, C.B., C.V.O.; Lord Rayleigh, O.M., F.R.S.; Lord Revelstoke, C.V.O.; Viscount Harcourt; Lord Stanfordham, C.B., C.V.O., C.C.I.F., K.C.S.I., K.C.M.G., I.S.O.; Rt. Assistant, F. C. Ruddle £600 to £800
Clerk, W. T. Chard £200 to £400

TRINITY HOUSE, Tower Hill, E.C. 3.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren. The present duties of the Elder Brethren have reference to Lighthouses, Buoys, Beacons, Pilotage, &c., and attendance at the Admiralty Court to act as Assessors, also to advise the Board of Trade in nautical matters. There are ten Acting Elder Brethren, of whom one is a retired officer of the Royal Navy and nine retired Commanders of the Mercantile Marine; there is also one Elder Brother who has retired from the Active List and there are eleven Honorary Elder Brethren. The income of the Corporation is derived from light dues levied on shipping entering and leaving British ports, and is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

ELDER BROTHERS.

H.M. The King; *Master*, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, k.c.; *Deputy Master*, Capt. Sir H. Acton Blake, k.c.m.g., k.c.v.o.; Rt. Hon. HISTORICAL SECTION.

Secretary, Major E. Y. Daniel, c.b.e.

WAR OFFICE.

Whitehall, S.W. 1. Hours, 10 to 6.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army Annual Act of 1909 (9 Edw. VII. c. 31).

ARMY COUNCIL.

Secretary of State for War, The Right Hon. Viscount Milner, c.b., c.m.g., (Pres. of the Army Council).

Maximum daily allowance for children, Captain to 2nd-Lieutenant, 5s. 6d.; Lieut.-Colonel to Major, 27s.

* In addition to "Guard's pay": Lt.-Col., 24s.; Maj., 9s.; Capt., 6s.; Lt., 4s.; and Lt., 2s. 6d.

† In addition to "Guard's pay": Col., £250; Lt.-Col., £200; Maj., £170; Capt., £140; Lt. and Lt., £70 pr. ann.

(a) In addition Proficiency Pay (6d. and 3d. a day) to Artillery, Cavalry, and Infantry.

(b) In addition Armament Pay: Lt.-Col., 5s.; Maj., 3s. 6d.; Capt., 3s.; Lt. and Lt., 2s.

(c) In addition Corps Pay: Lt.-Col., 6s.; Maj., 5s. 4d.; Capt., 3s.; Lt. and Lt., 2s.

(d) In addition to Regimental Pay, according to rank.

SOLDIERS' PENSIONS.

On discharge as medically unfit and until pension is decided 27s. 6d. a week and children's allowances.

ALTERNATIVE PENSIONS.—(a) Where the pre-war earnings were not more than 50s. a week: A man now capable of earning 20s. a week and before the war earning 45s. a week would have up to 45s. less what he is capable of earning, 20s., which gives as his alternative pension 25s. a week. (b) Where the pre-war earnings were more than 50s. a week: A man now capable of earning 20s. a week and before the war earning 80s. a week would have up to 50s. and half the excess of 80s. over 50s., 15s., which makes 65s., less what he is capable of earning, 20s., leaving as alternative pension 45s. a week.

WIDOWS' PENSIONS. If a man has been killed in action during the war or has within seven years died from wounds or from injuries while on duty, or from disease contracted on active service or made worse by service, and through no fault of his own, his widow may get a pension equal to half the soldier's pension for the highest degree of disablement, according to his rank. The following are the weekly rates of pensions: Warrant Officer, Class I., 21s. 3d.; W.O., Class II. or N.C.O., Class I., 18s. 9d.; N.C.O., Class II., 17s. 6d.; N.C.O., Class III., 16s. 3d.; N.C.O.,

Class IV., 15s.; Private, &c., Class V., 13s. 9d. A widow will get allowances for the soldier's children maintained by her at the rates paid for children of a man totally disabled, i.e. 6s. 8d. for the first child under 16. 5s. for the second, and 4s. 2d. for each other child. In no case will the pension of a widow be reduced because she is herself earning.

The widow of a soldier whose death was not caused in any way by his military duty, but was not due to his own fault, may get 15s. a week during the war and 12 months after; she will also receive £5 for herself and £1 for each child on the death of her husband. The pension of a widow stops on re-marriage, but a gratuity equal to one year's pension will then be given. Allowances for children kept by her will be continued.

PARENTS' PENSIONS. Pensions are given to a parent or parents up to 15s. and not less than 3s. 6d., according to the weekly value of help received from the soldier. **SEPARATE WIVES.** Up to 13s. 9d. a week together with the usual allowances for any children kept by her. **UNMARRIED WIVES.**—10s. a week for the period of the war, and a year afterwards. The usual allowances for children. **OTHER DEPENDANTS.** Up to 13s. 9d. a week.

Special pensions are also granted for specific injuries.

ARMY AGENTS.

1. Cox & Co., 16 Charing Cross, S.W.

2. Holt & Co., 3 Whitehall Place, S.W.

3. Sir C. R. McGrigor, Bt., & Co., 39 Panton Street, S.W.

THE PRICE OF VICTORY.

BRITISH CASUALTIES IN THE WAR.

The figures at present available are necessarily incomplete. Up to November 10, 1918, however, the following are the figures, including Dominion and Indian troops, for the various theatres of operations.

Theatre of Operations.	Killed (including died of wounds and other causes)		Wounded.		Missing (including prisoners).		Totals.	
	Officers.	Men.	Officers.	Men.	Officers.	Men.	Officers.	Other Ranks.
France	32,769	520,843	83,142	1,750,203	12,846	315,849	126,757	2,592,895
Italy	86	941	334	4,612	38	727	458	6,180
Dardanelles	1,785	31,737	3,010	75,508	258	7,431	5,053	114,676
Salonika	285	7,330	818	16,058	114	2,713	1,217	25,101
Mesopotamia	1,340	29,769	2,429	48,686	566	14,789	4,335	93,244
Egypt	1,098	14,794	2,311	35,762	183	3,705	3,592	54,261
East Africa	380	8,724	478	7,276	38	929	896	15,929
Other Theatres	133	690	142	1,373	51	908	326	2,971
Totals	37,876	620,828	92,664	1,939,478	12,094	347,051	142,634	2,607,357

Grand Total—3,049,991.

The missing include 6,741 officers and 164,767 other ranks known to be prisoners of war, and also over 80,000 officers and other ranks whose deaths have been accepted for official purposes.

INDIA'S CONTRIBUTION.—The total Indian casualties in the same period were 101,439, more than half of which were incurred in Mesopotamia.

In addition to the above figures, there have been 19,000 deaths from various causes among troops not forming part of any of the Expeditionary Forces.

ROYAL AIR FORCE.—The casualties from 1 April, 1918, the date of the establishment of the Force, to 11 Nov., 1918, were: deaths, 2,680; wounded, 2,988; missing (including prisoners), 1,837; interned, 84; total, 7,589.

NAVAL LOSSES.—The losses in killed and wounded in the Royal Navy amounted to 39,766, and those of the Mercantile Marine to 17,956, bringing up the Grand Total to 3,107,713.

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income.

*Canterbury. £15,000.

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop. The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Birmingham; Chichester; Coventry; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwark;

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. L. A. Pooler, D.D.; Ven. I. K. Latham, D.D.; Capt. R. Wade Thompson; J. A. Maconchy.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maule, 52 St. Stephen's Green E., Dublin.

BY the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1917, was only £151,048, charged with annuities to 45 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,478,737, made up of Commutation £151,048, Parochial Sustentation £6,335,698, Episcopal Sustentation £563,085, Income-Sum Funds £575,638, and Miscellaneous purposes £1,851,668.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £8,274,599. The interest of the Parochial Sustentation Fund is approximately £320,000. The total amount of assessment for stipend paid by parishes, 1917, was £97,749, and the total amount paid for stipends under Diocesan Schemes was £340,835.

The number of members of the Church of Ireland, by the Census of 1911, was 524,375, or 12.0 per cent. of the entire population.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are over 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1917 was 722,246. The sum of £543,260 was raised in 1917

for church and missionary purposes. Within the last 50 years 490 chapels, at a cost of £1,815,200, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,473. There are in addition 232 churches and mission stations, in all of which worship is regularly conducted. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688 Presbyterianism regained the legal establishment, which it still preserves.

LORD HIGH COMMISSIONER, Duke of

Atholl, K.T., C.B.

MODERATOR, 1917, Rev. James Nicol Ogilvie, D.D., New Greyfriars, Edinburgh.

Principal Clerk, Rev. David Paul, D.D., Edinburgh.

Deputy Clerk, Rev. J. A. McClymont, D.D., Edinburgh.

Procurators, Sir C. N. Johnston, Hon. Wm.

Watson, K.C., M.P.

Agent, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Spens, London.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1917, there were 1,504 congregations and 34 preaching stations. The total membership was 522,028, and there were 2,131 Sunday Schools, with 208,559 scholars and 21,868 teachers. In 15 Foreign Mission Fields there are 358 European Mission Agents and 4,897 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,034,177.—*Moderator*, Rev. R. J. Drummond, D.D., Edinburgh.—*Offices*, 121 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 657 ministers, 562 congregations, with 104,194 communicants, 87,506 families, 7,415

Sabbath-school teachers, and 101,041 scholars. During the year 1917-1918 this branch contributed by congregational effort £249,058 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £333,642. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 13 professors and 2 lecturers, and has 36 ministerial with 3 medical missionaries in foreign parts.—*Moderator*, Rt. Rev. James McGranahan, D.D., Londonderry. *General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 354 congregations; 8 preaching stations, and 86,525 members. It has a Theological College (Westminster College, Cambridge), and supports 92 missionaries abroad, including 40 women. In 1917 the amount raised for all purposes was £271,090. *Moderator*, Rev. A. Ramsay, D.D.—*Church Offices*: 7 E. India Avenue, E.C. 3. *Financial Sec.*, John Leggat. *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C. 4.

(4) The less numerous divisions are: *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Welsh Calvinistic Church.

THE WELSH CALVINISTIC METHODIST CONNECTION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is Presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, *q.v.* In 1915 the body numbered—churches, 1,481; chapels and places of worship, 1,757; ministers and preachers, 1,230; deacons, 6,680; communicants, 185,278; on probation, 1,720; Sunday-school teachers, 26,269; scholars and teachers, 199,715; number belonging to the congregations (including communicants), 334,089.

A sum amounting to £295,079 10s. 6d. was collected for various religious purposes in 1915. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language generally used in these schools. There are 367 English chapels and preaching stations with 30,823 communicants; all the rest are Welsh.—*Moderator of General Assembly*, Rev. John Davies, F.S.A. *Secs.*, Revs. E. P. Jones, B.A., Cardiff, and John Thickens, London. *Statistical Secs.*, Rev. John Morgan, Aberdare; Rev. John Jones, Brynrodyn. (No return since 1916.)

IN *England and Wales* there are 4 Archiepiscopal and 13 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 111 Episcopal Sees, with 51 Vicariates and 10 Prefectures Apostolic, as follows:—

ENGLAND AND WALES. <i>Archbishops.</i>	
Westminster	Francis, Cardinal Cons. Clergy.

The Independents and the Baptists.

THE INDEPENDENTS, OR CONGREGATIONALISTS, are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902. There are 51 county and other Associations in England and Wales, with 4,701 churches and preaching stations containing 1,727,442 sittings; the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales, 1918-19, Rev. E. Griffith-Jones, D.D.; 1919-20, Sir John D. McClure, LL.D., D.Mus. Secretary, Rev. Richard J. Wells. Office and Publication Department, 16, Memorial Hall, Farringdon Street, E.C. 4.*

The *Connexion of Huntingdon's Connexion*, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference

of ministers and delegates. *Secretary, E. Dolby Shelton. Offices, 41, Holborn Hall, Gray's Inn Road, W.C.*

THE BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1916, 4,227 chapels and 2,070 pastors. The members numbered 408,029, Sunday-school teachers 56,603, and Sunday scholars 531,295. In the U.S. the "members" alone number 7,236,650. *President of the Baptist Union, 1918-19, Rev. J. E. Roberts, M.A., B.D. Secretary, Rev. J. H. Shakespeare, M.A. Office, Baptist Church House, Southampton Row, London, W.C. 1.*

The Methodist Churches.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. This figure, however, is probably an over-estimate, and is therefore open to correction. The latest statistics are: Ministers, 54,475; local preachers, 98,733; members and probationers, 10,110,677; Sunday schools, 95,566; officers and teachers, 961,728; scholars, 9,209,301; churches and other preaching places, 100,113. The Conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. The Wesleyan Conference will be held at Newcastle in 1919.—*Pres.*, Rev. Samuel Chadwick; *Sec.*, Rev. John E. Wakerley.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. W. A. Hammond.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the

Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. J. W. Walls; *Secretary*, T. Gill.

INDEPENDENT METHODISTS.

4. *Independent Methodists*.—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President*, R. Henshall.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*Secretary*, Rev. E. Bromage, Sheffield.

FINANCES.

Finances.—The Wesleyans raised in 1915-16 £283,577 to sustain their very extensive missionary operations. At the same time their Home missionary income was £39,383. The Primitive Methodists raised £11,261 for new chapels, and the United Methodist Church £20,577 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.	Ministers	Lay Preachers.	Members.	On Pro- bation.	Chapels.	Sunday Scholars.
Wesleyan Methodists	2,850	19,455	497,280	21,759	8,522	863,538
Primitive Methodists	1,165	14,832	205,695	...	4,529	427,013

SUFFRAGAN AND ASSISTANT BISHOPS OF THE CHURCH OF ENGLAND.

SUFFRAGAN AND ASSISTANT BISHOPS will be found under their respective dioceses:—
Barking (Chelmsford); *Barrow-in-F.* (Carlisle); *Beverley* (York); *Birmingham* (Birmingham); *Buckingham* (Oxford); *Burnley* (Manchester); *Colchester* (Chelmsford); *Crediton* (Exeter); *Crofton* (Canterbury); *Derby* (Southwell); *Dover* (Canterbury); *Europe, N. & C.* (London); *Grantham* (Lincoln); *Guilford* (Winchester); *Hull* (York); *Islington* (London); *Jarrow* (Durham); *Kensington* (London); *Kingston* (Southwark); *Knaresborough* (Ripon); *Leicester* (Peterborough); *Lewes* (Chichester); *Marlborough* (Exeter); *Newcastle* (Newcastle); *Peterborough* (Peterborough); *Richmond* (Ripon); *St. Albans* (St. Albans); *St. Germans* (Truro); *Southampton* (Winchester); *Stafford* (Lichfield); *Steynes* (London); *Swansea* (St. David's); *Taunton* (B. & Wells); *Thetford* (Norwich); *Warrington* (Liverpool); *Wells* (B. & Wells); *Whalley* (Manchester); *Willesden* (London); *Woolwich* (Southwark).

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels and other places of worship. The *Society of Friends*, which consists of 20,059 members and about 9,000 other adherents in Great Britain and Australasia, and 2,333 in Ireland, has 235 recorded ministers, including over 130 women; their places of worship, in 1917, numbered 441. *Central Offices for Great Britain*, 136 Bishopsgate, E.C. Ireland has a separate organisation, with *Office*, 6 Eustace Street, Dublin. The *Churches of Christ* have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The *Moravian Church* (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 43 congregations and preaching stations, with 3,680 communicants. The *Catholic Apostolic Church* has above 80 churches; the *New Church* (Swedenborgian), 75 societies, with about 6,700 registered members; the *Latter-Day*

Saints (Mormons) have 82 churches. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Reformed Episcopal Church: *Presiding Bp. in England*, Rt. Rev. P. Xenophon Eldridge, D.D., St. Jude's Ch., Balham, S.W. The Old Roman Catholic Church: *Presiding Bp.*, Rt. Rev. A. H. Mathew, Lees, Walmer, Kent. Among the inhabitants of the United Kingdom are about 258,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz, *Chief Rabbi's Office* (*pro tem.*), Mulberry Street, Commercial Road, E. The Jews support their own poor. Their number throughout the world is computed at thirteen millions. The Greeks have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and there is a mosque for Moslems.

THE SALVATION ARMY was founded by General William Booth (b. 1829, d. 1912), and is one of the most recent religious denominations, and one of the most successful. In Dec., 1916, the number of *Officers*, *Cadets* and *Employed* was 23,665, of *Corps* and *Outposts*, 9,859, *Local Officers*, 63,464. The number of countries occupied was 63, and of languages used 40. Connected with the Salvation Army are numerous philanthropic institutions, including 117 Industrial Homes for Fallen Women, 31 Maternity Homes and 53 Children's Homes, 159 Shum Posts, 20 Prison-Gate Homes, 282 Shelters and Cheap Food Depôts for the Homeless, 193 Workshops and Factories, 119 Labour Bureaux, 35 Farms, &c. 34,664 open-air meetings are held weekly, and a still larger number in the various

halls of the organisation. At a large number of police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. The total raised during "Self-Denial Week" in 1918 amounted to £117,503. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C. 4.—GENERAL Bramwell Booth (1912), Queen Victoria Street, London, E.C. 4.

THE BOYS' BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. Many of the Battalions and Companies are now recognised as Cadet Units under the Rules governing the Cadet Force. The total strength throughout the world is 2,300 Companies with 120,000 officers and boys. Over 400,000 ex-members enlisted voluntarily, and more than 800,000 are now serving in the Naval or Military forces. *Sec. (acting)*, Chas. E. Ranken, 34 Paternoster Row, E.C. 4.

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 500,000 lads have had the advantage of the Brigade's training, and to-day there are 1,316 Companies throughout the Empire, with upwards of 60,000 lads. *H. quarters*, Aldwych House, Catherine Street, W.C.2. *Secretary*, Rev. Edgar Rogers, M.A.

BOY SCOUTS.

A Movement, Incorporated by Royal Charter, initiated and organised by Lt.-General Sir Robert Baden-Powell, K.C.B., K.C.V.O., Chief Scout. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

During the War the utility of the Movement has been demonstrated by the employment of some 100,000 Boy Scouts on war work; many thousands have joined the Colours, and a continuous service of coast-watching under the Admiralty has been maintained since the outbreak of war, in which some 35,000 scouts have taken their share. The Movement has taken root in all parts of the British Empire, while all the Allies and neutral countries have adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, S.W. 1.

THE UNIVERSITY OF OXFORD.

UNIVERSITY OFFICERS, &c.

Chancellor, The Earl Curzon of Kedleston, D.C.L., <i>All Souls</i>	Elect. 1907
High Steward, The Earl of Halsbury, D.C.L., <i>Hertford</i>	1896
Vice-Chancellor, Rev. H. E. D. Blakiston, D.D., President of Trinity.....	1917
Proctors, Rev. F. H. Hall, M.A., <i>Oriel</i> ; R. R. Marett, M.A., D.Sc., <i>Exeter</i>	1918
Bursars, Lord Hugh R. H. Cecil, M.A., <i>Hertford</i> , 1910; R. E. Prothero, M.A., <i>All Souls</i>	1914

ORGANISATION OF TEACHING.

On January 1, 1907, University College was
transferred to the University, of which it now
forms an integral part in the Faculties of
Arts, Laws, Medicine, Science, Engineering,
and Economics. On January 1, 1910, King's
College was, in respect of all its Departments
except that of Theology, transferred to the
University, of which it now forms an integral
part, but is divided into two separate institu-
tions, viz.: (a) "King's College" (in the Faculties
of Arts, Laws, Medicine, Science, Engineering,
and Economics) and (b) "King's College for
Women" (in the Faculties of Arts and Science).
The Theological Department of the College

remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, the Francis Galton Laboratory for National Eugenics at University College, and the Ratan Tata Department of Social Science and Administration of the London School of Economics and Political Science.

TEACHING STAFF.

The numbers of the "Appointed" and "Recognised" Teachers in the several Faculties are as follows:—

Theology, 0 and 19; *Arts*, 45 and 167; *Laws*, 3 and 14; *Music*, 1 and 22; *Medicine*, 15 and 335; *Science*, 45 and 209; *Engineering*, 12 and 70; *Economics*, 13 and 12.

DEANS OF THE FACULTIES, 1916-18.

Theology, Rev. P. T. Forsyth, M.A., D.D.
Arts, Prof. Sir Sidney Lee, LL.D., Litt.D., F.B.A.
Laws, Prof. H. J. H. Mackay, LL.D.
Music, Prof. Sir Walter Parratt, O.V.O., Mus. Doc.
Medicine, Sir Bertrand E. Dawson, G.C.V.O., C.B., M.D., F.R.C.P.
Science, Prof. A. N. Whitehead, Sc.D., M.A., F.R.S.
Engineering, H. C. H. Carpenter, Ph.D., M.I.M.M.
Economics, Hon. W. Pember Reeves, Ph.D.

UNIVERSITY COLLEGE, Gower Street, W.C. 2.
Chairman of Committee, Lord Reay, K.T., G.C.S.I.
Provost, Sir Gregory Foster.

KING'S COLLEGE, Strand, W.C. 2.

Chairman of Delegacy, Viscount Hambleden.
Principal, R. M. Burrows, D.Litt.
Administrative Officer and Senior Tutor, Irene C. Major-Stevenson.

KING'S COLLEGE FOR WOMEN.

Household and Social Department,
 Campden Hill Road, W. 8.
Dean, Miss Lane-Claypon, M.D., D.Sc.

GOLDSMITHS' COLLEGE, New Cross, S.E. 14.
Warden (acting), T. Rayment, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—

New College, Hampstead (Congregational).
Principal, Rev. A. E. Garvie, D.D.
Hackney College, Hampstead (Congregational).
Principal, Rev. P. T. Forsyth, D.D.

Regent's Park College, N.W. (Baptist).
Principal, Rev. G. P. Gould, D.D.

King's College (Theological Department),
 Strand, W.C. (Church of England).
Dean, Rev. W. R. Matthews, M.A., B.D.

Wesleyan College, Richmond (Wesl. Methodist).
Principal, Rev. W. T. Davison, D.D.

St. John's Hall, Highbury (Church of England).
Principal, Rev. A. W. Greenup, D.D.

Arts, Science, Medical, and Engineering:—
East London College, Mile End Road, E.
Principal, John L. S. Hutton, M.A.

Arts and Science:—

Royal Holloway College, Englefield Green.
Principal, Miss Ellen C. Higgins, B.A.
Bedford College for Women, Regent's Park, N.W. 1.
Principal, Miss M. J. Tuke, M.A.

Arts:—

Westfield College, Hampstead, N.W.
Principal (acting), Miss A. W. Richardson.

Arts—in Pedagogy only:—

London Day Training College, Southampton Row, W.C.

Principal, Prof. J. Adams, M.A., B.Sc., LL.D.

Medicine:—

The Medical Schools of certain Hospitals, &c. (see p. 262).

Science and Engineering:—

Imperial College of Science and Technology.

(See p. 266.)

Science:—

Royal College of Science and Royal School of Mines.
Rector, Sir Alfred Keogh, G.C.B., G.C.V.O., C.H., LL.D.

Engineering:—

City and Guilds (Engineering) College.
Dean, Prof. W. E. Dalby, M.A., F.R.S., M.Inst.C.E.

Science—in Agriculture only:—

South-Eastern Agricultural College, Wye, Kent.
Principal, M. J. R. Dunstan, O.B.E., M.A.

Economics and Political Science:—

London School of Economics and Political Science,
 Clare Market, Kingsway, W.C. 2.
Director, Hon. W. P. Reeves, Ph.D.

THE UNIVERSITY OF DURHAM. 1831.

Chancellor, The Earl of Durham, K.G.
Vice-Chancellor, J. S. G. Pemberton, M.A., D.C.L.
Proctors, A. Robinson, D.C.L.; J. A. Menzies, M.A., M.D.
Registrar, H. G. Theodosius, M.A.
Librarian, E. V. Stocks, M.A.
Hon. Director of Observatory, Col. E. H. Hills, O.M.G., D.Sc., F.R.S.
Observer, F. C. H. Carpenter, M.A., F.R.A.S.

UNIVERSITY COLLEGE, Durham.

Master, John S. G. Pemberton, D.C.L. (acting).

HATFIELD HALL, Durham.

Principal, F. B. Jevons, M.A., D.Litt.

ST. CHAD'S HALL, Durham.

Principal, Rev. S. R. P. Moultsdale, M.A., B.D.

ST. JOHN'S HALL, Durham.

Principal, Rev. D. Walker, D.D.

WOMEN'S HOSTEL, Durham.

Principal, Miss R. E. D. Donaldson.

NON-COLLEGIATE STUDENTS.

Censor, Rev. J. H. How.

HOME STUDENTS (Women).

Censor, Mrs. E. M. Ellershaw, B.A.

COLLEGE OF MEDICINE, Newcastle.

President, Prof. D. Drummond, M.A., M.D., D.C.L.

ARMSTRONG COLLEGE, Newcastle.

Principal, Sir W. H. Hadow, D.Mus.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£2,000.)

Founded 1850; re-organised 1880 and 1903.

Chancellor, Viscount Morley of Blackburn, O.M.
Vice-Chancellor, Prof. Sir Henry A. Miers, D.Sc., F.R.S.

Treasurer, A. E. Steinthal, M.A., B.Sc.

Registrar, and Senior Tutor (Men), Edward Fiddes, M.A.

Bursar, Sydney Chaffers, M.A.

Senior Tutor (Women), Phoebe Sheavyn, D.Lit.

Clerk of Convocation, W. Fletcher Shaw, M.D.

TRAINING DEPARTMENT (for Men and Women).

Professors, J. J. Findlay, Ph.D.; H. Bompas Smith, M.A.

HALLS OF RESIDENCE.

- Men**—Dalton Hall, *Princ.*, J. W. Graham, M.A.
 —Hulme Hall, Warden, Rev. T. Nicklin, M.A.
 —Lister House, Warden (vacant).

Any unqualified person practising as an Apothecary is liable to a penalty under the Apothecaries Act, 1815. The use by unregistered persons of any title implying registration, or that they are recognised by law, is made an offence by the Medical Act, 1858.

There is a similar penalty in regard to Dentistry.

CENTRAL MIDWIVES BOARD, Queen Anne's Gate Buildings, S.W.—*Chairman*, Sir F. H. Champneys, Bart., M.D.; *Secretary*, G. W. Duncan.

MEDICAL SCHOOLS OF THE UNIVERSITY OF LONDON.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—Clinical practice comprises a service of 687 beds, besides 70 beds for convalescent patients at Swanley, in Kent. 34 resident appointments, and all clinical clerkships, dresserships, &c., are chosen from the students without fee; scholarships and prizes of nearly £900 awarded annually; a college attached where students may reside. *Dean of the Medical School*, T. W. Shore, M.D.

LONDON HOSPITAL MEDICAL COLLEGE AND DENTAL SCHOOL.—The largest general hospital in England; 933 beds; in-patients 1917, 16,053; out-patients, 102,130; 141 qualified appointments annually, and numerous clinical clerkships, dresserships, &c. Resident appointments carry board and residence. 34 prizes and scholarships awarded annually.—*Dean*, Prof. William Wright, D.Sc.; *Sec.*, E. J. Burdon.

GUY'S HOSPITAL.—Number of beds in constant occupation, 644. The various appointments and offices are filled by students, selected according

to merit. Scholarships and Prizes amounting in all to nearly £1,000 are awarded annually.—*Hon. Dean*, Sir Cooper Perry, M.D.; *Sub-Dean*, M. S. Pembrey, M.D.

ST. THOMAS'S HOSPITAL (Founded 1228).—460 civilian, 530 military beds; numerous prizes and scholarships; over 30 house appointments open to qualified students; clinical clerkships and dresserships are held without extra fees. The School Buildings are among the most complete in London.—*Medical Secretary*, G. Q. Roberts, M.A.

ST. GEORGE'S HOSPITAL MEDICAL SCH.—Beds, 436, including 100 convalescent beds at Wimbleton. Numerous scholarships, &c., and 2 registrarships value £200 per annum.—*Dean (acting)*, R. R. James, F.R.C.S.

MIDDLESEX HOSPITAL.—Number of beds, 450. Three entrance scholarships, value £100, £50, and £25, also one of £50 for University students, awarded annually.—*Dean*, H. Campbell Thomson, M.D.

ST. MARY'S HOSPITAL.—Number of beds, 305. In-patients 1917, 2,861. Out-patients 1917, 30,306. Five entrance scholarships, value £100 to £25, awarded annually in Sept.—*Dean*, Sir John Broadbent, Bart.; *Sec.*, B. E. Matthews, B.A.

CHARING CROSS HOSPITAL MEDICAL SCHOOL.—Number of beds, 300.—*Dean*, W. J. Fenton, M.D.

WESTMINSTER HOSPITAL.—Number of beds, 213.—*Dean*, S. A. Kinnier Wilson, M.D.

UNIVERSITY COLLEGE HOSPITAL, Gower St., W.C. 1.—Number of beds, 507.—*Dean*, G. F. Blacker, M.D., F.R.C.P., F.R.C.S.; *Sec.*, J. Gerald T. Buckle, B.A.

KING'S COLLEGE HOSPITAL, Denmark Hill, S.E. 5.—Number of beds, 350.—Four Entrance Scholarships, each £50; also two Burney Yeo Scholarships, each £80, for Oxford and Cambridge students, awarded annually.—*Dean*, H. Willoughby Lyle, M.D.; *Sec.*, S. C. Ranner, M.A.

LISTER INST. OF PREVENTIVE MEDICINE, Chelsea Bridge Rd., S.W. 1.—*Director*, Dr. C. J. Martin, F.R.S.

LONDON (ROYAL FREE HOSPITAL) SCHOOL OF MEDICINE FOR WOMEN, 8 Hunter St., Brunswick Sq., W.C.—Scholarships of £20, £25, £30, £50, £60, and £75 awarded. Clinical work is carried out at the Royal Free and St. Mary's Hospitals. Many appointments open to qualified students. Students' chambers are provided in connexion with Medical School. Courses and bursaries for dental students.—*Dean*, Miss Aldrich Blake, M.D., M.S.; *Warden and Sec.*, Miss L. M. Brooks.

LONDON SCHOOL OF TROPICAL MEDICINE, Seamen's Hospital, Albert Dock, E.—Three sessions annually, commencing 15 January, 1 May, and 1 October. Fee, £16 16s.—*Dean*, Sir R. H. Charles, G.O.V.O.; *Sec.*, P. J. Michelli, C.M.G.

ROYAL ARMY MEDICAL COLLEGE, Grosvenor Road, S.W. 1.—*Commandt.*, Maj.-Gen. Sir David Bruce, K.C.B., F.R.S., A.M.S.

ROYAL DENTAL HOSPITAL of London School of Dental Surgery, 32 Leicester Square, W.C.

NAVAL MEDICAL SCHOOL of the Royal Naval College, Greenwich.

OTHER METROPOLITAN SCHOOLS.

WEST LONDON POST-GRADUATE COLLEGE, West London Hospital, Hammersmith, W.—For qualified men only. Three months' Hospital Practice (including Lectures and Demonstrations), 6 guineas; one month, 3 guineas; or £30 perpetual.—*Dean*, Donald Armour.

LONDON SCHOOL OF CLINICAL MEDICINE, Drenthout Hospital, Greenwich, S.E. (for Post Graduates only).—250 beds.—Dean, C. C. Choyce, M.D., F.R.C.S.

UNIVERSITY COLLEGE HOSPITAL DENTAL SCHOOL, National Dental Hospital, Gt. Portland St., W.—Dean, Sidney Spokes, M.R.C.S.

Headmaster, Capt. A. J. H. McCleesh.

QUEEN VICTORIA SCHOOL, Dunblane,

Scotland.

Commandant, Lt.-Col. P. Milford.

Gr.-Mr. & Adjt., Maj. J. J. Scott.

Headmaster, Capt. R. Reid.

MISCELLANEOUS.

COLLEGE OF PRECEPTORS, Bloomsbury

Square, W.C. 1.

All persons engaged in education who have passed an examination satisfactory to the Council are admissible as members. Diplomas granted are F.C.P., L.C.P., and A.C.P.

President, Sir Philip Magnus, M.P.

Dean, W. G. Rushbrooke, LL.M.

Treasurer, G. Armitage Smith, D.Lit.

Secretary, G. Chalmers.

GILCHRIST EDUCATIONAL TRUST,

1 Plowden Buildings, Temple, E.C. 4.

Founded by the late Dr. Gilchrist (died 1841), for "the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the maintenance of Scholarships, to the carrying on of lectures on scientific and other subjects for artisans, and to the assistance of approved educational objects.

Trustees, Rt. Hon. Lord Shuttleworth, LL.D., *Chairman*; Walter Leaf, Litt.D.; Michael E. Sadler, C.B.; Mrs. Sophie Bryant, D.Sc.; Rt. Hon. Lord Richard Cavendish, C.M.G.
Secretary, A. H. Fison, D.Sc.

LONDON PAROCHIAL CHARITIES

(Trustees of the), 3 Temple Gardens, E.C. 4.

[The income (£108,990) is applied mainly in support of Polytechnics, in furtherance of Technical Education, in grants of pensions, and for the maintenance of City Churches.]

Chairman of Governors, Sir J. Savory, Bart.
Vice-Chairman, L. B. Sebastian.
Clerk, Ernald E. Warre.

MUSIC.**ROYAL ACADEMY OF MUSIC (1822),**

York Gate, Marylebone Road, N.W. 1.

[The R.A.M. was founded in 1822 by Lord Burghersh (afterwards Earl of Westmorland) for the cultivation of the science of music. The average number of students attending in 1917 was 445. There are 96 Fellows (F.R.A.M.), 541 Associates (A.R.A.M.), and 7,223 Licentiates (L.R.A.M.), of whom 6 Associates and 389 Licentiates were elected in 1917.]

President, H.R.H. the Duke of Connaught, K.G.
Chairman of Committee, Sir Edward E. Cooper.
Principal, Sir A. C. Mackenzie, Mus.D., F.R.A.M.
Lady Superintendent, Mrs. Russell, A.R.A.M.
Secretary, J. A. Creighton.

ROYAL COLLEGE OF MUSIC (1883),

Prince Consort Road, South Kensington, S.W. 7.

Patron, H.M. The King.
Director, Sir Hubert Parry, Bt., C.V.O., D.C.L., M.A., Mus.Doc.
Hon. Secretary, M. Muir Mackenzie.
Registrar, Claude Aveling, B.A.

ROYAL IRISH ACADEMY OF MUSIC,

Westland Row, Dublin.

Secretary, C. E. Grahame-Harvey.**GUILDHALL SCHOOL OF MUSIC.**

[The School grants a diploma of Licentiatehip (L.G.S.M.) and of Associateship (A.G.S.M.), open to students of eight terms' standing and over.]

Principal, Landon Ronald.
Secretary, H. Saxe-Wyndham.
Lady Superintendent, Mrs. Hemming.
Professors, 130 in number.

LONDON COLLEGE OF MUSIC,

Gt. Marlborough Street, W. 1.

Principal, Frederick J. Karn, Mus.B.
Director of Exams., G. Augustus Holmes.
Secretary, A. Gambier Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury

Square, W.C. (1875).

President, Sir Walter Parratt, C.V.O., Mus.D.
Secretary, Walter Harrison, M.A., Mus.Bac.

TRINITY COLLEGE OF MUSIC (1872),

Mandeville Place, Manchester Square, W.

Chairman of Board, Sir Fredk. Bridge, C.V.O., Mus.D.
Secretary, C. N. H. Rodwell.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants. For boys of good character only. *Hon. Director*, *C. B. Fry*, Commr. R.N.R.

OCEAN TRAINING SHIPS.—This scheme for training officers for the Merchant Service and R.N.R. has now been developed by the acquisition of the Nautical College, Pangbourne, where Cadets R.N.R. are received between the ages of 13½ and 15 for a two years' course on shore, followed by two years' training at sea, in sailing vessels and with the Fleet. Particulars may be obtained from the Managers, 12 Fenchurch Buildings, E.C. 3.

SCHOOL OF ORIENTAL STUDIES

(Incorporated).

London Institution, Finsbury Circus, E.C.

Chairman of Governing Body, *Sir John P. Hewett*, G.C.S.I., C.I.E.

Director, *Prof. Sir E. Denison Ross*, C.I.E., Ph.D.

TECHNICAL EDUCATION.

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of Birmingham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester, and Sheffield; Wales; St. Andrews, Glasgow, and Edinburgh; Dublin, National University of Ireland, and the Queen's University of Belfast.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the London County Council are the following:—

Institutes entirely maintained by the L.C.C.

BEAUFORT INSTITUTE, Prince's Road, Vauxhall Street, S.E. 11.—*Principal (acting)*, *A. E. Bailey*.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, *W. B. Dalton*.

CAMPDEN SCHOOL OF ART, Dalmeny Avenue, N.—*Principal (acting)*, *W. G. Thomas*.

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, *Fred V. Burridge*.

CLAPHAM SCHOOL OF ART, Edgely Road, High St., Clapham, S.W.—*Principal*, *T. McKeeggie*, A.R.C.A. (hon.).

HACKNEY INSTITUTE.—*Principal*, *Percy R. Kirk*, M.A., A.M.I.C.E.

(a) *Hackney Institute*, Dalston Lane, N.E.

(b) *Hackney Institute*, *Sir John Cass's branch*, Cassland Road, N.E.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W. 12.—*Principal*, *John Williams*.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, *W. Huntington*, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, *A. G. Cooke*, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, *J. Bowyer*.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, *H. W. Richards*.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, *H. A. Garratt*, M.I.N.A. *Sec.*, *E. H. Pratt*.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.—*Principal*, *A. J. Bull*, M.Sc.

SHOREDITCH TECHNICAL INSTITUTE, Pittfield Street, Hoxton, N.—*Principal*, *Shadrach Hicks*.

TRADE SCHOOL FOR GIRLS (L.C.C. Hammermith), Lime Grove, Shepherd's Bush, W.—*Lady Superintendent*, *Miss M. A. J. Boon*.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.—*Headmistress*, *Miss F. E. I. Smythe*.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, *J. Stuart Ker*, B.Sc. *Headmaster*, *School of Art*, *A. H. Christie (acting)*.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, *F. H. Newman*, Ph.D.

BIRKBECK COLLEGE, Breams Buildings, Chancery Lane.—*Principal*, *George Senter*, D.Sc.

BOROUGH POLYTECHNIC, Borough Road, S.E. 1.—*Principal*, *C. T. Millis*, M.I.Mech.E.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, *Sidney Humphries*, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, Clerkenwell, E.C.—*Principal*, *R. M. Walmsley*, D.Sc.

NORTHERN POLYTECHNIC, Holloway Rd., N. 7.—*Principal*, *R. S. Clay*, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W. 1.—*Director of Education*, *Major Robert Mitchell*.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, *C. A. Keane*, D.Sc.

SOUTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, *S. Skinner*, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, *A. F. Hogg*, M.A. *Technical Institutes, &c., aided by the L.C.C.*

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Albury Street, Deptford.—*Lady Superintendent*, *Miss R. Mason*.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, *Rev. J. Scott Lidgett*, D.D.

CHURCH INSTITUTE, Wiseton Rd., Upper Tooting.—*Hon. Secretary*, *C. H. Baker*.

COLLEGE FOR WORKING WOMEN, Fitzroy Street, W.—*Hon. Secretary*, Miss F. Martin.

DEVAS INSTITUTE, New Road, Battersea, S.W.—*Secretary*, W. F. Holmes.

GOLDSMITHS' COLLEGE, New Cross, S.E.—*Warden (actg.)*, T. Raymond, M.A.

HEROLD'S INSTITUTE, Drummond Road, Brompton (Branch of the Borough Polytechnic).—*Principal*, C. T. Millis, M.I.Mech.E.

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker, F.I.C.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss C. I. Brennan.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss E. Bradshaw.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Loder, R.N.R.

ST. BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Principal*, J. R. Riddell.

SCHOOL OF ART WOOD-CARVING, 39 Thurloe Place, S.W.—*Secretary*, J. Bailey.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W. 18.—*Hon. Principal*, A. R. Gridley, M.A.

WORKING MEN'S COLLEGE, Crowndale Road, N.W. 1.—*Superintendent*, E. C. Duchesne.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, Lee Terrace, Blackheath.—*Principal*, J. H. Hale.

ST. MARTIN'S, 107 Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122-124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

Imperial College of Science and Technology, South Kensington, S.W.

Visitor: H. M. THE KING.

Chairman of Governing Body, The Marquess of Crewe, K.G.

Chairman of Executive Committee, Right Hon. Arthur H. D. Acland.

Chairman of Delegacy, Sir Dugald Clerk, K.B.E., D.Sc., F.R.S.

An Institution for the most advanced training and research in Science, especially in its application to industry. The Departments and Professors are:—

Royal College of Science.

Mathematics: A. R. Forsyth, F.R.S., A. N. Whitehead, F.R.S. (*Applied*); **Physics**: H. L. Callender, F.R.S., R. J. Strutt, F.R.S., W. Watson, F.R.S., A. Fowler, F.R.S. (*Astro-Physics*); **Technical Optics**, F. J. Cheshire; **A. E. Conrady**, *Optical design*; **Chemistry**: H. B. Baker, F.R.S., J. F. Thorpe, F.R.S. (*Organic*), J. C. Philip (*Physical*); **Chemical Technology—Fuel and Refractory Materials**: W. A. Bone, F.R.S.; **Biology**: J. B. Farmer, F.R.S. (*Botany*), E. W. McBride, F.R.S.

(**Zoology**), V. H. Blackman, F.R.S. (*Plant Physiology*) (vacant) (*Comparative Pathology*), P. Groom (*Woods and Fibres Technology*), H. M. Lefroy (*Entomology*); **Geology**: W. W. Watts, F.R.S., C. G. Cullis (*Economic Mineralogy*).

Royal School of Mines.

Mining: W. Frecheville; **Metallurgy**: H. C. H. Carpenter, F.R.S.; **Oil Technology**: W. W. Watts, F.R.S.

City and Guilds (Engineering) College.
Mechanical Engineering and Motive Power: W. E. Dalby, F.R.S.; **Civil Engineering**: S. M. Dixon; **Electrical Engineering**: T. Mather, F.R.S.

Rector, Sir Alfred Keogh, G.C.B.
Secretary, A. Gow, M.A.

City and Guilds of London Institute, Gresham College, E.C. 2.

- (1). *City Guilds Engineering College* (see Imperial College of Science and Technology).
- (2). *Technical College*, Leonard Street, Finsbury, E.C.—*Professors*: A. J. Margetson, M.Sc., M.I.M.E., *Civil and Mech. Engineering*; G. T. Morgan, D.Sc., F.R.S., *Applied Chemistry*; W. H. Eccles, D.Sc., *Applied Physics and Electr. Engineering*.

 VETERINARY COLLEGE, Buccleuch St., Glasgow.
 ROYAL VETERINARY COLLEGE OF IRELAND, Shelbourne Road, Ballsbridge, Dublin.

Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Bulkeley-Evans, M.A., 12 King's Bench Walk, Temple, E.C. 4).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town. In considering applications for admission to the Conference, the committee has regard to the scheme or other instrument under which the school is administered and the numbers in the school. As a general rule, there should be 100 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school, but regard is also paid to the proportion of undergraduates to the total number of boys in the school.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy.*, H. Bendall, M.A., 37 Norfolk Street, Strand, W.C. 2).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control (e.g., Board of Education Scheme) by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

ASSOCIATION OF ASSISTANT MASTERS.—Founded 1892. Incorporated 1902. To further the interests of Assistant Masters in Secondary Schools. Annual meetings are held in London, in January. The Association has 55 branches in England and Ireland. *Secretary*, J. G. Lamb, M.A., 35 John Street, Bedford Row, W.C. 1.

The * denotes membership of the Head Masters' Conference; the †, of the Incorporated Association of Head Masters.

ROYAL SOCIETY MEDALS.

THE following is a list of those to whom the Royal Society has this year awarded medals. The awards of the Royal medals have received the King's approval.—The Copley medal to Prof. H. A. Lorentz, For. Mem. R.S., for his distinguished researches in mathematical physics. The Rumford medal to Prof. Charles Fabry and Dr. Alfred Pérot (jointly) for their contributions to optics. A Royal medal to Prof. Alfred Fowler, F.R.S., for his distinguished researches

on physical astronomy and spectroscopy. A Royal medal to Prof. F. G. Hopkins, F.R.S., for his researches in chemical physiology. The Davy medal to Prof. F. S. Kipping, F.R.S., for his studies in the camphor group and among the organic derivatives of nitrogen and silicon. The Darwin medal to Dr. H. F. Osborn for his valuable researches on vertebrate morphology and paleontology. The Hughes medal to Mr. Irving Langmuir for his researches in molecular physics.

ZOOLOGICAL SOCIETY, Zoological Gardens, Regent's Park, N.W. 8.—*Sec.*, P. Chalmers Mitchell, D.Sc., F.R.S.

The New Parliamentary Register.

THE four-year-old register, which was in process of compilation on the outbreak of war, was replaced in the autumn of 1918 by a new list of voters, based on the greatly extended franchise set up by the Representation of the People Act. The modern "Reform Act," it was estimated, more than doubled the electorate of the United Kingdom, increasing the number by approximately 8,000,000, of whom 6,000,000 were women, all women entitled to the municipal vote and all wives of male voters becoming Parliamentary electors on attaining the age of thirty years. In addition, Service men were enfranchised at the age of nineteen, being registered for the constituencies for which they would have had the necessary qualification but for the war, the vote being exercised by post or proxy, according to the distance of each man from home. The exceptions were conscientious objectors to military service, who were disfranchised until five years after the end of the war.

The great task of preparing the roll was commenced in the spring, the qualifying period of residence of six months ending on April 15, though subsequently the operating dates will be January 15 and July 15 of each year. Every householder or occupier was supplied with a form upon which particulars of persons entitled to the franchise were entered, in order to assist the registration officers. Every man over twenty-one had the right to a vote if he were, on the date mentioned, and had been during the whole of the preceding six months, residing in premises or occupying business premises in a constituency. He was also qualified if, though he had resided in or occupied premises in the constituency for a part only of the previous six months, he had throughout the remainder of the period resided in premises or occupied business premises in another constituency within the same Parliamentary borough or county or within a borough or county contiguous to it.

A woman not under thirty qualified for a vote if either she or her husband were occupying on April 15 and had occupied during the whole of the previous six months, as owner or tenant, land or premises (other than a dwelling-house) of a yearly value of not less than £5, or a dwelling-house. The lodger franchise disappeared for Parliamentary purposes, being superseded by the residence qualification. For the Local Government franchise, however,

lodgers were recognised as tenants where they occupied rooms let to them in an unfurnished state. The old disqualification arising from the receipt of Poor Law relief or other alms was removed.

The age at which naval and military voters were registered was nineteen instead of twenty-one, so that every sailor or soldier born before April 15, 1899, had a claim to be placed on the new roll of voters. An "Absent Voters' List" was compiled, and on this were placed the names of all Service voters, as well as those of electors who, by reason of the migratory nature of their occupations, such as seamen, would be unlikely to be in the constituency at the time of an election. To obtain this list, postcards were sent to sailors and soldiers upon which they could state their qualifications as to registration. These cards reached the Army in France at the very moment at which an important offensive was taking place, and they were held over for a time, steps being taken subsequently to prevent the delay interfering with the right to the vote. To soldiers serving in the British Isles or in France and Belgium, and to sailors in home waters, ballot papers are to be posted upon the dissolution in time for their votes to be recorded before the count takes place. In the case of men at sea or serving in the more distant theatres of war—Mesopotamia, Salonika, Palestine, Egypt, and Russia—a different plan has been adopted. Each of these voters is entitled to appoint a proxy to exercise the franchise on his behalf at a Parliamentary election. The person selected must be either wife, husband, parent, or brother or sister over twenty-one years, or a voter in the constituency. Forms have been sent to all who come under this heading, and on receipt of instructions from voters the registration officer issues to the persons nominated papers entitling him or her to vote.

Another important feature of the new Act is the provision under which polling in every constituency takes place upon the same day. The votes will not be immediately counted, owing to the impossibility of collecting all the postal votes upon the same day, but a date will be fixed upon which counting is to take place, time being allowed for the Service voters to forward their papers to the registration officers. Thus the results will be announced simultaneously after the necessary interval.

¶ * * For further particulars of Hospitals see Advertisement pages.

GENERAL.

ST. BARTHOLOMEW'S HOSPITAL, West Smithfield. Ordinary cases admitted from 9 to 10 daily; accidents at all times. Out-patients daily, surgical 10, medical 10; ear, M. and Th., at 1.30; throat, M. and Th., at 1.30; women, M., at 9, Th., at 1.30; dental, daily, at 9; orthopaedic, M. at 1.30; eye, M. and F. at 1.30; electrical, M., Tu., Th., and F., at 1.30; operations daily, at 1.30. THE list on the following two pages contains the names of all the more important British Life offices, of eight Colonial companies (marked C), and of three American offices (marked A), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are indicated by letters in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1917.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is

large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. Owing to the unprecedentedly high rate of income-tax now leviable, a reduction in the net yield may be anticipated in nearly every case in the immediate future.

VALUATIONS.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables H^m(5) and O^m(5) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and O^m(5) tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

ADVICE REGARDING LIFE ASSURANCE AND ANNUITIES.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Recent increases in income-tax have added to its attractions, for policyholders can claim relief from assessment to this duty in respect of life assurance premiums not exceeding in amount one-sixth of their income, in most cases.

The selection by an intending proposer for Life assurance of the office best suited to his requirements and likely to produce the best results should be carefully made under reliable expert advice. Whilst we have above indicated some points for consideration, the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits and attractions of the various companies. There are many good offices, but in the very best and most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers during the continuance of a policy, which may be life-long, through the precaution having been taken of obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed

with in the case of new proposals, but as policies in these instances are usually subject to certain restrictive conditions of a temporary character, this method is not to be generally recommended.

On receipt of an inquiry containing full particulars of requirements, accompanied by a remittance of a fee of 5s., addressed to the Publishers of WHITAKER'S ALMANACK, 12, Warwick Lane, E.C. 4, and marked "Insurance," the Insurance Editor will be prepared—

(x) To advise any intending assurant as to the system and descriptions of policies best adapted to suit the special circumstances as described, and to assist inquirer in the choice of the Life office which seems from its financial strength and earning capabilities best qualified to do justice to his requirements, and most likely to yield the most satisfactory and profitable results. Selection is of special importance from the investment point of view in case of endowment assurances.

(a) To similarly advise any person contemplating the purchase of an annuity. Some annuity rates as given hereafter may have been altered at date of an inquiry, as certain companies were reconsidering the same at date of publication.

C = Colonial Office.

A = American Office.

P = Transacts Fire Business also.

S = Transacts Accident Business also.

I = Transacts Industrial Business also.

c = Does not pay Commission.

m = Transacts Marine Business also.

* Alliance. Including funds of acquired businesses.

* Caledonian. Fire business commenced 1805.

* Century. Accident business commenced 1835.

* Clerical, Medical & General. Large additional valuation reserves.

* Commercial Union. Excluding figures of acquired businesses.

* Equitable. Additional reserves beyond valuation liability, £300,000.

* Equity and Law. Gross interest yield on funds excluding reversions and unproductive assets.

* General Accident. Life business commenced 1906.

* Guardian. Excluding figures of acquired businesses.

* Legal and General. Gross interest yield on funds excluding reversions.

* London and Lancashire Life and General. Includes figures of acquired Scottish Metropolitan business.

* Marine and General. Also insures Mariners', &c., transit risks, figures in regard to which are excluded in statement of premiums.

* National Mutual. Net interest yield excluding reversions.

* Norwich Union Life. Includes figures of acquired Scottish Imperial business.

* Phoenix. Fire business commenced 1782.

* Scottish Amicable. The premiums valued are the Om^m 3 per cent. net premiums, adjusted to increase to 10 per cent. the difference between the office premium and net premium in the case of without profit policies and of policies effected under the minimum premium system.

* Scottish Insurance. Accident business commenced 1877.

* Scottish Provident. 3 per cent. for all except a small and diminishing series of old policies. Additional reserves, £304,204. Specially low premiums.

* Scottish L. & N. Includes acquired City of Glasgow business.

* United Kingdom. Net Om premiums in combination with Om^m and Om^(s) mortality tables and special additional reserves.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses may usually be applied either to increase sum assured or to reduce premium, if not discounted for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price"

system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for assurance of £100 at death with participation in profits. Premium rates alone are not sufficient for judging the relative attractions of life offices. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually

high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

* Eagle, Star & British Dominions—Lower rates are quoted for "Sceptre Abstainers' Section."

† London Life—These rates are for "age not exceeding" that referred to, allowances being made for quarters of age, and are under the Society's full participation, reversionary bonus plan.

α Abstainers' Rates.

§ Mutual of New York—Rates are for nearest age.

§ Sun Life—Reductions granted to total abstainers.

** Century and Friends' Provident—These rates were under revision at time of going to press.

ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no

medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death. The annual premiums payable throughout the endowment period, or till death if previous, for the assurance of £100 at various ages of entry and maturity, participating in profits, are given in this table.

NAME OF OFFICE.	SUM ASSURED PAYABLE AT AGE 55 OR AT DEATH IF PREVIOUS.					SUM ASSURED PAYABLE AT AGE 60 OR AT DEATH IF PREVIOUS.

Immediate Annuities.

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

* Australian Mutual, Colonial Mutual, and Mutual and Citizens' Rates are for quarterly payments.

† London Life Rates are for exact ages stated, but are apportioned for actual age at time of purchase.

‡ These are P.O. annuity rates when average price of Consols is under £60 10s. Otherwise P.O. rates are lower.

§ North British & Mercantile.—These rates are allowed if the purchase money is paid in National War Bonds.

ABBREVIATIONS.—A=Accident or Employers' Liability; B=Boiler; Bu=Burglary; Ca=Horse and Cattle; F=Fire; G=Guarantee; H=Hail-storm; L=Life; Li=Licences; Ma=Machinery; M=Marine; Mo=Mortgage; P=Plate Glass; V=Various classes.

NOTE.—Most companies transacting fire also transact burglary insurance.

Fire Insurance Rates.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, 1s. 6d.

Household goods therein, usually 2s.

Policies are issued by some companies embracing all risks incidental to private houses in one amount.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from 2s.

Private Dwelling Houses, brick and timber built and tiled or slated, in no hazardous proximity, from 2s. 6d.

Aircraft and Bombardment Insurance.—The Government rates run from 1s. per cent. against

aircraft risks and 1s. 6d. per cent. against aircraft and bombardment risks in cases of private dwelling houses and contents, to larger amounts in other cases. All other buildings, and farming stock, 1s. 6d. and 2s. 3d. per cent. respectively; contents, 2s. 6d. and 3s. 6d. per cent. respectively. Merchandise at docks, &c., 3s. 6d. and 5s. per cent. respectively. These insurances can be arranged with most fire offices as Government agents. It should be noted that unless these policies are effected for the full amount of existing fire policies they are subject to average; so that a policyholder should insure for the full value of buildings and contents; otherwise, should a claim arise, it would be proportionately adjusted. Thus, if the amount of the fire policy is £1,000 and a policy for only £500 is effected, compensation would be obtainable only to the extent of half the value of the property destroyed; but if the aircraft policy were for £1,000 the compensation would cover the whole loss up to the sum assured. It was announced, however, in November, 1917, that compensation to extent of £500 would be given by the Government without premium if all property in excess of the amount was insured with them.

INLAND POSTAL SERVICES.

Within the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands.

Letters.

Not exceeding 4 oz.	1½d.
For every additional 2 oz., or fraction of 2 oz.	½d.
Limit: length 2 ft.; width 1 ft.; depth 1 ft.	
Weight unlimited.	

Printed Papers.

Not exceeding 1 oz.	1½d.
Exceeding 1 oz., but not exceeding 2 oz. ...	1d.
Exceeding 2 oz., at Letter Rate.	
Limits: 2 oz. in weight, 2 ft. in length, 1 ft. in width or depth.	

Newspaper Rate.

Not exceeding 6 oz.	½d.
For every additional 6 oz., or fraction of 6 oz.	½d.

*. If two or more copies are enclosed in a single packet, each copy will be liable to the same postage as if it had been posted separately.

Limits: 2 lb. in weight, 2 ft. in length, 1 ft. in width or depth.

Sample Rate.

Samples (Inland), only at Letter, and Parcel Rates.

Parcels.

Not exceeding 3 lb.	6d.
7 lb.	9d.
11 lb. (limit)	1s.
Limit: size: length, 3 ft. 6 in.; length and girth combined, 6 ft.	

GENERAL REGULATIONS.

UNPAID PACKETS (*letters, newspapers, post-cards*) are charged *double postage* on delivery; UNDERPAID PACKETS, *double the deficiency*.

RE-DIRECTION.—(x) By agent of addressee: *Letters, post-cards, printed papers, and newspapers* may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted), and must not have been opened or tampered with. *Parcels* may be re-directed free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area); otherwise they are charged on delivery at the ordinary prepaid rate. *Registered packets* must be taken to a Post Office. (a) By the Post Office (not undertaken during temporary absence, unless house be left empty, or to clubs, hotels, &c.). Notice of removal and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen, and signed by the person to whom the letters are to be addressed. Separate forms must be filled in for parcels, and for the re-direction and (postal) forwarding of telegrams. The notice holds good for twelve months, and may be extended by payment of 1s. for second, 1s. third, and 5s. each subsequent year.

REGISTRATION.—Registered letters and parcels must be handed to an officer of the Post Office, and a receipt taken. The registration fee is 2d. exclusive of postage. With a further 2d. the sender may obtain advice of delivery. The latest time for registering for the night mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest

time for posting ordinary parcels. Inland packets marked "Registered" or containing coin or jewellery, if found in a letter-box undergo compulsory registration (4d.), carrying no compensation. COMPENSATION for loss or damage.—The fees for compensation inclusive of registration are:—Fee 2d., compensation £5; 3d., £20; and 1d. for each additional £20 up to the maximum 1s. 10d. for £400. Compensation up to £2 is given on (a) *unregistered parcels* (for loss, only if certificate of posting is obtained at the time of posting), (b) *unregistered packets* conveyed by Express Delivery Service No. (x). Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, &c.) is only given when the money is enclosed in one of the Registered Letter envelopes sold by the Post Office and the packet is tendered for transmission by Registered Letter Post; the maximum compensation for coin is £5. Compensation for jewellery, watches, &c., is only given on registered packets; for glass, crockery, greases, colour-powders, fish, meat, fruit, and vegetables only when sent as parcels. Compensation is not given for damage to (x) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (a) registered letters, unless conspicuously marked "Fragile, with care."

CERTIFICATE OF POSTING *unregistered parcels*, free; other *unregistered postal packets*, ½d.

EXPRESS DELIVERY SERVICE.—There are three services:—(x) By special messenger all the way, from all offices which deliver telegrams (in London this service is suspended for the present). Charge, which must be prepaid, 3d. per mile, or part of a mile, inclusive of all charges, but with a special charge of 3d. on each packet over 1 lb. in weight, and 1d. on each packet after the first up to ten. Live animals, liquids, and loose money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (a) By special messenger after transmission by post (charge 3d. as before, exclusive of postage, with special charges as before except weight fee). (3) In advance of the ordinary deliveries at the request of addressee (8d. per mile for one packet, and 1d. for every ten or less additional packets). For (x), packets must be handed over the counter with "Express" clearly marked in left-hand top corner; for (a), may be handed in or posted, and must be marked "Express," with a broad vertical line back and front. Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2d. For Sundays and Holidays, see p. 338.

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2d. to a servant of any of the chief railways, in addition to postage at the ordinary rate, letters not exceeding 4 oz. will be forwarded, and passed on from one company to another at a junction, by the next available train or steamship, to be called for at the station to which the letter is addressed, or to be transferred thence to the nearest letter-box for postal delivery. The letter may be taken to a passenger station of the railway company or handed in at any express delivery post office (express fee of 3d. per mile). The letter may be forwarded after conveyance by train by express service (if clearly so marked, crossed front and back with a vertical line, and properly prepaid). Express messengers may be telegraphed for to meet it.

DISPOSAL OF UNDELIVERED letters, packets, post-cards, and parcels.—Inland letters and parcels, undelivered, bearing full name and address of sender, are returned

unopened; others are opened by the Returned Letter Office and returned to senders without charge, a registration fee of 2d. being charged should anything of value be inside. Letters containing neither sender's address nor any enclosure of importance are at once destroyed. Parcels containing no address, and not applied for, are generally disposed of after 3 months; or if perishable are dealt with as requisite. Undelivered foreign letters, &c., are returned, unopened, after a short detention, to the countries whence received; parcels are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. *Post-cards, newspapers, and printed papers* are redelivered to sender on payment of a second postage, if his name and address, with a request for return in case of non-delivery, appear on the outside; those without such request are disposed of. The Chief Returned Letter Office is at Mount Pleasant, E.C.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only).—Letters and parcels may be addressed as a rule to all Post Offices except Town Sub-Offices. Letters or parcels should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, or fictitious names, or Christian name only, they are not taken in, but are at once treated as undelivered; and all persons applying for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. *Poste Restante parcels* are kept three weeks before returning; letters, &c., from abroad, or at a seaport for an expected ship, are kept two months; from places in the United Kingdom, one fortnight; from one part of London to another, one fortnight. After these intervals they are sent up to the Returned Letter Office. *Poste Restante* correspondence, however, which bears a request for return within a less time, if not delivered, is dealt with accordingly.

Letter Post.

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, meat, fruit, and vegetables) (see p. 332).

Post Cards.

Postage, *rd.* The left-hand half of the address side may be used for correspondence, both inland and foreign. Plain cards (maximum size $5\frac{1}{2} \times 3\frac{1}{2}$, minimum $4 \times 2\frac{3}{4}$ in.), corresponding in thickness to official cards, may be used inland; also for abroad, provided they have "Post Card" printed or written on them. Reply halves are available for transmission to the country of origin, and to that country alone, and must bear the words "Post Card—Gt. Britain and Ireland," and "Reply."

Printed Papers Post.

This section takes the place of "Book Packet Post."

For printed or written matter not in the nature of a letter, and not exceeding 2 oz. in weight, $\frac{1}{2}$ d. for every oz. (see p. 332).

By this post may also be sent printed commercial forms, e.g., invoices, receipts, estimates, share transfer notices, applications for employment, deeds and agreements, circulars, Christmas cards; MS. proofs and examination papers with corrections, drawings or photographic prints when not on brittle or fragile substance; together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter; any writing must refer solely to subject-matter of the document, or consist of formulas of courtesy or of a conventional character not exceeding five words or initials.

Circulars wholly or partly printed in imitation type-writing are only admissible by this post if at least 20 identical copies are handed together explicitly as such over the counter.

Newspaper Post.

This post is available for newspapers registered at the G.P.O., including any supplements thereof. $\frac{1}{2}$ d. for every 6 oz. Packing as for "printed papers" (see p. 332). No writing or printing is

permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not registered as such at G.P.O., and Christmas or special issues of registered newspapers are treated as printed papers.

Magazine Post to Canada and Newfoundland. (British Newspapers, Magazines, and Trade Journals.)

6 oz., 1d.; $1\frac{1}{2}$ lb., $1\frac{1}{2}$ d.; and $\frac{1}{2}$ d. for each additional $\frac{1}{2}$ lb. to 5 lb., 5d.

Packets not exceeding 2 oz. in weight are transmissible for $\frac{1}{2}$ d. as ordinary printed papers.

Parcel Post.

For bulky and heavy matter (see p. 332). The parcel should be marked "Parcel Post" and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle, without notice on the previous day, and he may refuse parcels if already loaded. A mounted postman must accept what he can conveniently carry.

Parcels to or from the Channel Is. or I. of Man are liable to customs duty, which may not be evaded by Letter Post; the sender must, in the former case, declare contents when posting.

Literature for the Blind.

Papers not registered at G.P.O., periodicals and books, if printed in special type and subject to certain conditions of posting: 2 oz., $\frac{1}{2}$ d. up to 12 oz.; over 12 oz. but not over 6 lb. (limit), 5d. Maximum size, $2 \times 1 \times 1$ ft.

STAMPS, ENVELOPES, POST CARDS, &c.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2s. 6d.—for list of latter see p. 343) are sold of the respective values of $\frac{1}{2}$ d., 1d., $1\frac{1}{2}$ d., 2d., $2\frac{1}{2}$ d., 3d., 4d., 5d., 6d., 7d., 8d., 9d., 10d., 1s., 2s. 6d., 5s., and 10s. Books of 12 $\frac{1}{2}$ d., 12 1d., and 12 $\frac{1}{2}$ d. stamps, 3s. Rolls of 500 and 1,000 1d. and $\frac{1}{2}$ d. stamps are also sold, 1d. or 2d. extra. Stamps may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell $\frac{1}{2}$ d., 1d., and $1\frac{1}{2}$ d. stamps and registered letter envelopes.

Spoiled Stamps.

Embossed or impressed postage stamps cut out of envelopes, post-cards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials for identification. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Applications for the recovery of the value of spoiled or unused stamps, whether postage,

revenue, or insurance, can be made to the Postmaster at most large Post Offices (see also p. 349).

REGISTERED LETTER ENVELOPES, for foreign and inland letters, with a $3\frac{1}{2}$ d. embossed stamp for the payment of the registration 2d. and postage $1\frac{1}{2}$ d., are of four sizes: F, $5\frac{1}{2}$ in. \times $3\frac{3}{4}$ in., 4d. each; G, 6 in. \times $3\frac{3}{4}$ in., $4\frac{1}{2}$ d. each; H, 8 in. \times 5 in., $4\frac{3}{4}$ d. each; K, $11\frac{1}{2}$ in. \times 6 in., 5 $\frac{1}{2}$ d. each.

REGISTERED LETTER ENVELOPES with 3d. stamp, for the Fleet or Expeditionary Forces—L, $5\frac{1}{2}$ in. \times $3\frac{3}{4}$ in., $3\frac{3}{4}$ d. each; M, 6 in. \times $3\frac{3}{4}$ in., $3\frac{3}{4}$ d. each.

LETTER CARDS with $1\frac{1}{2}$ d. stamp, one 2d., 1s. 6d. for 10.

POST CARDS impressed with a penny stamp: Single, $1\frac{1}{2}$ d.; 11, 1s. Reply, $2\frac{1}{2}$ d.; 11, 2s.

LONDON POSTAL ARRANGEMENTS.

To facilitate collection and delivery, the Metropolis is divided into eleven districts, marked:—

Battersea	Norwood
East Central (E.C.)	Paddington
West Central (W.C.)	South Eastern (S.E.)
Eastern (E.)	South Western (S.W.)
Northern (N.)	Western (W.)
North Western (N.W.)	

Each has a head-district (p. 219) and numerous sub-district offices.

FOR THE COUNTRY AND ABROAD.—Letters and cards to go by Night Mail should be posted, throughout head-districts by 6 p.m.; elsewhere, up to three hours earlier; registered letters, half an hour earlier than ordinary. The most regular mails, with their days of departure and latest time of posting (without late fee), at King Edward Street are—Europe generally, daily 6 p.m.; Canada, Jamaica, Bahamas, Bermuda, and British Honduras, Wed. and Sat. 2 a.m.; Japan and China (via United States), also via Vancouver, Wed. and Sat. 2 a.m.; Australia, by Orient Packet, Sat. 2 a.m.; India, Egypt, Ceylon, Straits Settlements, China, Japan, Australia, New Zealand (via France), letters and postcards, Fri. 2 a.m.; printed papers, &c., Wed. 12 midnight; West Coast of Africa, via Liverpool (Express Service), irregular, 5 a.m.; non-Express Service, 6 a.m.; Canada, via Liverpool, Fri. 7 a.m.; Brazil, River Plate and Chile, by French Packet via Bordeaux, 7 a.m. at intervals, via Liverpool or by Dutch Packet, 8 p.m.; River Plate, by Nelson Line, Tues. 8 p.m.; United States, Cuba, Mexico, Central America, &c., Mon. and Thurs. 8 p.m.; United States, by American Packet, Thurs. 8 p.m. (It is not yet (Nov. 1918) possible to give the dates and times of the sailing of Foreign Mails, which have been irregular owing to the War.)

LATE FEE LETTERS.—Inland letters and postcards bearing an extra 1d. stamp are forwarded by the night mails if posted at Charing Cross and the City offices before 7 p.m., London Bridge (sga., Boro' High St.), and Bedford St. Post Office before 6.30 p.m., at Mount Pleasant before 7.45, or at King Edward St. before 7.30. At certain district offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters with an extra $\frac{1}{2}$ d. stamp, or registered letters with 1s. late fee, may also be posted at the various railway termini up to the time of the departure of the train bearing the mails, varying from 8.25 p.m. to 8.15 a.m.

POSTAGE, &c., ABROAD.

N.B.—In certain colonies and foreign countries the rates of postage to the United Kingdom are higher than those from the United Kingdom given below.

Letters.

The letter rate from the United Kingdom to the British Possessions generally, the United States of America, and the British Postal Agencies in Morocco* is $1\frac{1}{2}$ d. the first ounce and 1d. for each succeeding ounce or fraction. The charge to all other places is $2\frac{1}{2}$ d. the first ounce and $1\frac{1}{2}$ d. per ounce afterwards. Transmission of merchandise by letter post to Russia and N. Persia is strictly prohibited. Limits of size, $2 \times 1 \times 1\frac{1}{2}$ in.

* Casablanca, Fes, Larache, Marrakesh, Mazagan, Mogador, Rabat, Saffi, Tangier, Tetuan.

SPECIAL CORRESPONDENCE.—Letters to H.M. ships in Foreign Waters are 1d. per oz. Letters from persons serving with H.M. ships are delivered free. Letters to H.M. ships serving in Home Waters (except ships excepted), 1d. first ounce, not exceeding 4 oz. $1\frac{1}{2}$ d., exceeding 4 oz. ordinary Inland Rate.

To H.M. Forces serving abroad including women and personnel of Red Cross, Y.M.C.A., Church Army, &c., 1d. per ounce. From, free.

H.M. Forces stationed in British Islands, ordinary Inland Rate.

Newspapers to H.M. Forces abroad, $\frac{1}{2}$ d. for every 2 oz. Letters to H.M. ships cannot be insured.

NOTE.—Parcels for members of the British Expedn. Forces abroad are also subject to special conditions, ascertainable at any P.O.

Posting in Duplicate.

Firms sending documents abroad can now post in duplicate: the original and duplicate going by different ships. The original and duplicate must be put into covers addressed in the ordinary way, with stamps affixed to each cover sufficient for the postage and 2d. registration fee (or insurance fee if it is desired to insure the letter). The duplicate must be marked "Duplicate," and stamps to the value of 6d. affixed. Both letters must be put in an outer envelope stamped with 2d. registration, and also ordinary postage, and addressed:—(1) For any country in America, Liberia, or any British Colony on W. Coast of Africa: "Urgent—Duplicate Letters.—The Superintendent on Duty, Sorting Office, Post Office, Liverpool." (2) For any other country:—"Urgent—Duplicate Letters.—The Superintendent on Duty, Registered Letter Section, King Edward Building, G.P.O., London, E.C. 1." Certificates of posting will be forwarded to the sender, who should enclose an addressed envelope.

Urgent Letters.

Senders of letters for the United States, for Portugal, or for any neutral country in Europe or America may secure that it shall be treated as specially urgent by the P.O. and Military Censors by affixing stamps of the value of 2s. 6d. in addition to the ordinary postage and handing it over the counter at any district or branch P.O. in the London area.

Post Cards.

1d. single, 2d. reply. (See also previous page.)

Reply Coupons.

Coupons exchangeable for stamps of the value of 25 centimes ($2\frac{1}{2}$ d.) each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 3d. each for the purpose of prepaying replies to letters. The coupons can be exchanged by the addressee at the Post Office of the place of destination for local postage stamps.

Books, Newspapers, Samples, &c.

(a) NEWSPAPERS, BOOKS, CATALOGUES, PHOTOGRAPHS, ENGRAVINGS, MUSIC, and other wholly printed matter, $\frac{1}{2}$ d. per 2 oz.

(b) COMMERCIAL and LEGAL PAPERS, MSS., INVOICES, TYPEWRITTEN MATTER, &c., partly written, $\frac{1}{2}$ d. per 2 oz.; minimum charge of 2d.

(c) PATTERNS, SAMPLES, AND SCIENTIFIC SPECIMENS, $\frac{1}{2}$ d. per 2 oz.; minimum charge of 1d.

To the British Empire or non-Union countries* the limits are: Size, $2 \times 1 \times 1\frac{1}{2}$ in.; weight, generally 5 lb. (China, (a) and (b) 4 lb., (c) 12 oz.). To countries in the Postal Union: Size, (a) and (b) $11\frac{1}{2} \times 1 \times 1\frac{1}{2}$ in., (c) $12 \times 8 \times 4$ in.; weight, (a)

* Afghanistan, Bahrain, Friendly Is., Muscat, N. Nigeria, Nyasaland, N. Rhodesia; also China and Morocco, except at the Post Office Agencies of countries in the Union.

and (b) 4 lb., (c) 12 oz. (Egypt 5 lb.). If in the form of a roll, the limits of size in all cases are: (a) and (b) 30 x 4 in., (c) 12 x 6 in. Postage must be prepaid. Wholly unpaid packets are stopped. Double the deficit is the maximum charge on underpaid packets. Regulations as to packing, writing, &c., are similar to those for inland packets.

Parcels sent abroad.

Customs declaration respecting the contents must be made on a form obtainable at any Post Office. Some countries, e.g., Argentine, impose in addition a fiscal charge on parcels entering. The sender may arrange to prepay all charges to certain colonies and foreign countries (not Argentine) by paying a fee of 6d., depositing 1s. for each 5s. or fraction (minimum deposit 2s.), Australia, Canada, New Zealand, S. Rhodesia, S.W. Africa, Union of S. Africa, or U.S.A., 2s. or fraction (minimum deposit 5s.), of the value, and signing an undertaking to pay all Customs and other charges on demand; otherwise they are collected on delivery. Certain articles are prohibited; among them letters nearly everywhere. Parcels, insured boxes, sample packets for Denmark, Norway, Spain, Sweden, and Switzerland will be stopped by the military censor unless posted under a War Office Permit. Application for Permit to Chief Postal Censor, M.I.Gd., Strand House, Carey Street, London, W.C. 2.

* Paper or cardboard packing not sufficient.

* The parcel post with the United States is carried on by means of two distinct services, namely, an official service (United States Post Office) and a semi-official service (American Express Company). Customs charges cannot be prepaid by sender in the official service. A parcel forwarded by the semi-official service may, without extra charge, be sent through New York in bond for

To most countries the maximum length is 3 feet 6 inches, or length and girth combined 6 feet. Parcels for Canada, however, except umbrellas, &c., must not be longer than 2½ feet. To Italy and Greece and their Colonies, to Abyssinia, the Argentine, Brazil, most French Colonies, Mexico, and Paraguay, the maximum length is 2 feet, length and girth combined about 4 feet. In many cases, however, narrow parcels (umbrellas, sticks, &c.) may be longer.

INSURANCE.—Insurance may be effected on parcels to almost all countries up to £400, according to destination, at the following rates:—*4d.* for £12; and *2d.* for every additional £12 up to *6s.* 10*d.* for £400. Parcels sent to the U.S. by the *semi-official* service are insurable at *6d.* per £12 up to £120. Compensation up to £1 is also given on *uninsured* parcels to or from Egypt, India and the smaller colonies, with the larger foreign countries, including the semi-official U.S.A. service.

INSURED BOX POST.—Jewellery and similar articles (not money) may be sent in strong boxes by letter mails to Denmark, Egypt, France, Holland, Italy, Norway, Portugal, Rumania, Switzerland. Postage *1s.* to *3s.*; maximum weight 2 lb., size 12 × 4 × 4 in. Customs declarations must be filled in. Insurance rates as for parcels; limit £400 (see Note to Parcels Sent Abroad, p. 335).

CASH ON DELIVERY.—A service of "cash on delivery" of parcels has been established between the U.K. and the following: Bahamas (Nassau), Barbados, Bermuda, Brit. Guiana, Brit. Honduras, Cayman Is., Cyprus, Egypt, Fiji Is., Gambia, Gibraltar, Grenada, Hong Kong, Jamaica, Leeward Is., Malta, Morocco (Casablanca, Mazagan, Mogador, Tangier, Tetuan), Nyasaland, S. Rhodesia, St. Lucia, St. Vincent, Sarawak, Seychelles, Brit. Somaliland, Str. Settlements, Shanghai, Tobago, Trinidad. Maximum collected, £20. Charges for collecting: In U.K. £5, *4d.*; £10, *6d.*; £15, *9d.*; £20, *1s.*, exclusive of postage on P.O. or M.O. by which amount is remitted; in the above countries, according to a graduated scale—*e.g.*, £1, *3d.* to *1s.* 1*d.*; £5, *1s.* to *4s.* 4*d.*; £10, *1s.* 11*d.* to *8s.* 6*d.*; £20, *3s.* 5*d.* to *17s.*, inclusive of postage.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence to or from certain colonies and foreign countries, or certain towns in the same, has now been arranged. *5d.* extra is paid by the sender on parcels, *3d.* on other matter. The rest of the charge is collected from the addressee.

MONEY AND POSTAL ORDERS.

The Chief Money Order Office is at Manor Gardens, Holloway, N. y.

ADVICE OF PAYMENT: *2d.* for inland, *2½d.* for foreign and colonial orders.

Inland Ordinary Money Orders.

The poundage charged is for sums not exceeding £1, *2d.*; £3, *3d.*; £10, *4d.*; £20, *6d.*; £30, *8d.*; £40 (maximum), *10d.* No order may contain a fractional part of *1d.*

The rules and regulations are on the forms issued.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of

(Customs examination at any one of the "United States Ports of Entry," or Inland Custom Houses. The addressee must, however, make arrangements for the delivery of such parcels after they have been cleared at the Inland Port. Such parcels must be plainly marked by the sender, "In bond to _____," naming the Inland Port chosen; and the same words must also be written in the same handwriting on the Customs declaration and dispatch note.

2d., and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for portage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire; in Egypt, and at the British Agencies at Panama, China (p. 335, note*), and Morocco (p. 335, note†, except Alcazar and Mequinez). They are paid (but not issued) at chief Canadian offices, and paid in Australia only when issued to soldiers. They are issued, with a counterfoil to be retained by the sender, for every *6d.* up to *20s.* and for *21s.*; those of *6d.*, *1s.*, *1s.* 6*d.*, *2s.*, *2s.* 6*d.*, *3s.*, *3s.* 6*d.* &c., up to *15s.*, at a charge of *1d.*; those of *15s.* 6*d.* &c., up to *21s.*, *1½d.* They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Adhesive British Postage Stamps (not perforated and not exceeding 3 in number) to the amount of *5d.*, but not fractions of *1d.*, may be affixed to the face of an order.

Ordinary Money Orders Abroad.

Orders payable in British Dominions, Colonies, Protectorates, &c., at British Postal Agencies abroad, or in Allied countries or their colonies (not Serbia or America), *3d.* every £1 or fraction. Neutral countries or their colonies, also America, *4d.* Limits of amount, £20-£40.

Telegraph Money Orders Abroad.

Only to some colonies and foreign countries, *e.g.*, to Canada, but not Australia. Poundage at same rate as for Ordinary Money Orders abroad, plus supplementary fee of *6d.* for foreign countries, *1s.* for British Colonies and Dependencies (except Canada and Newfoundland); for Canada and Newfoundland *6d.* ordinary rate, *1s.* deferred rate: and cost of official Telegram of Advice. (Ordinary rate for foreign countries. Ordinary or deferred rate for a British Colony, &c.)

TELEGRAMS.

Inland.

Telegrams may be posted or handed in at a telegraph office, or to a rural postman. Rate throughout British Isles, 12 words or less *9d.*, each further word *½d.*; payment in stamps affixed to the form by the sender. Replies may be prepaid up to 48 words; the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges *1d.* Certified copy *3d.* The address of the receiver is charged for. The charge includes delivery within three miles of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is *3d.* per mile, calculated from the free delivery limit. Portage to be paid by sender. Telegram forms are issued gratis. Usual hours 9 a.m. to 7 p.m. Some Offices 8 a.m. to 8 p.m. In London and a few of the largest towns at the Head Offices and in many railway stations telegrams are dispatched at any hour of the day and night.

SUNDAY TELEGRAMS.—See p. 338 and below.

Note.—It is usually possible to get a telegram through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: *1s.* for the telegraphist, *1s.* for the messenger, and *6d.* an hour for the telegraphist if he has

to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster, 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

The following count one word: (1) All names of towns and villages in U.K. *but* of branch or sub-offices or districts in towns, unless in addition to street name; (2) all names of railway and coastguard stations (*not* in towns) with public telegraph; (3) words (*not* names) ordinarily written as one or with hyphen, including "condit," etc.; (4) Names with prefix "St." "De," "De la"; (5) each five figures; (6) each initial, except London Postal Districts (p. 334)—A.M.—P.M.—H.M.S. (in address), which are one word each group.

NIGHT TELEGRAPH LETTERS for delivery by first morning post may be sent before midnight between towns whose Head Telegraph Offices are open always, at 3d. for 36 words or less, and ½d. per 3 words beyond 36.

OFFICES ALWAYS OPEN: London—G.P.O. Central (Newgate St.) and West Strand P.O. and chief railway termini. The Provinces—Birmingham, Bradford (except between midnight Saturday and 8.30 a.m. Sunday), Brighton (except from midnight Saturday to 7 a.m. Sunday), Bristol, Derby, Devonport, Exeter, Holyhead, Hull, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Newport (Mon.), Norwich, Nottingham, Plymouth, Portland Flagship, Portsmouth, Sheffield, Southampton Docks, and Swansea no delivery to ships on dark nights. Scotland—Aberdeen, Dundee, Edinburgh, Glasgow. Ireland—Belfast, Cork, Dublin, Londonderry, Queenstown. All the Wireless Stations and Railway or Signal Stations at Middlesbrough, Bedford M.R., Blackburn, Bolton L.Y., Bradford M.R. (except from 11 p.m. Saturday to 7 a.m. Sunday), Burton M.R., Carlisle M.R., Chester, Chesham, Clifton Bank, Gwys, Darlington *ind.*, Doncaster, Ely, Folkestone Harbour and Central Gloucester M.R., Heysham Harbour, How Mill, Huddersfield M.R., Ipswich, Kettering, Kilmessock station, Kilmarnock, Dalrymple, Leicester M.R., Lizard, Leicester, Mallow, Marsh, Newton Abbot, *ind.*, Parkstone Quay (except from 10.2 p.m. Sunday), Peterborough G.W., G.N. Reading G.W., Bedford Rugby L. & N.W. Southampton *ind.*, Shirley Gate, Shrewsbury, Skipton M.R., Slough *ind.*, Stafford (N.W.), Stramington, Stoke-on-Trent, Swindon (G.W.R.), Wakefield (Kirkgate), and York.

N.B.—Railway Station offices are purely telegraphic, and unless marked *d* do not deliver outside the station; *nd* = no delivery at all, despatch only.

Rates for Telegraphing Abroad.

Under special regulations during the War all telegrams for places abroad are subject to censorship, and can only be accepted at "Sender's Risk." No inquiry can be made as to their disposal.

Full Rates per word (minimum 10d.) from any part of the U.K. are as follows:—Aden, *q* 2s.; Alaska, U.S.A., 2s. 7d.; Algeria, 2½d.; Andorra, 2d. *f* Angola, *q* 5s. 5d. and 5s. 6d.; Annam, *q* 3s. 6d. and 3s.; Antigua, *q* 2s. 6d.; Argentine Rep., *q* 2s. 9d.; Ascension, *q* 2s. 6d.; Australia, *q* 3s.; Azores, 9d.; Bahamas, *q* 2s. 5d.; Barbados, 2s. 6d.; Basutoland, *q* 2s. 6d.; Bathurst, *q* 3s.; Bechuanaland (Brit.), *q* 2s. 6d.; Bechuan. Deferred Telegrams.

Telegrams in plain English or French, for certain Extra-European places, are accepted at (unless otherwise mentioned) reduced rates on condition that they may, if necessary, be deferred during transmission in favour of Full-rate Telegrams.

Special (E.F.M.) from and to the Forces. Particulars obtained at any Telegraph Office.

Telegrams (W.S.M.) concerning sick or wounded members of Forces outside Europe and in the Mediterranean, addressed to the proper Government authority, can be sent free, subject to certain conditions, ascertainable at any Telegraph Office.

Cable Letters.

Plain-language (non-code) messages in English or French are telegraphed at reduced rates by certain cable companies, on certain conditions. WEEK-END CABLE LETTERS must reach the companies' British stations (by post or telegraph) by Saturday night, and will not be delivered before the following Monday. Night and Week-End Letter Telegram Service suspended, except E.F.M. Telegrams.

POST OFFICE TELEPHONES.

London Telephone Area.—The office of the Controller of the London Telephone Service is at 144A Queen Victoria St., E.C. 4. **Annual Subscription**, in the London area, for an unlimited number of calls (unlimited or flat rate), £20; £17 for second and subsequent connexions. Premises more than 2 miles from exchange charged £1 15s. every additional ¼ mile. Extension lines connecting parts of same premises, from £1 10s.; connecting separate premises, from £4. In the Provinces, tariff rates can be ascertained from the District Manager. For each call on an exchange within the Telephone District of London, 1d.; outside the Telephone District, 2d.; minimum payable yearly for calls, 30s. Private subscribers may use their lines for trunk messages, or for sending telegrams and express messages, on paying a deposit to cover the credit given; also for receiving telegrams addressed to

their exchange and number; and letters arriving at G.P.O., London, early Sunday Morning can be delivered on Sunday by telephone to subscribers (3d. every 30 words, exclusive of postage). **Call Office Fee**, for subscribers or others, 3d. each 3 (night, 6) minutes. The public may dictate telegrams from many call offices by paying usual fee besides telegram charges.

Telephone Trunk Lines.—These connect Exchanges in different towns. Rates in day-time:—4d. for every 25 miles up to 100, 8d. for every further 40 miles. Trunk fees formerly 1d. or 2d. are now increased to 2d. and 3d. respectively. Special rates are charged over submarine lines. 3 minutes are allowed; on their expiry the option of another 3 minutes is given, if double fee is previously deposited; or the line may be engaged outright for the maximum of 6 minutes. The charge for a 6 minutes' conversation during the night period from 7 p.m. to 7 a.m. will be the same as for a 3 minutes' conversation during the day. During the night period also a 3 minutes' conversation may be had for half the day fee when that amounts to 1s. 4d. or more. When the day fee is 1s. the night fee is 8d.

SUNDAY AND HOLIDAY ARRANGEMENTS.

On SUNDAY throughout the U.K. no Parcel Post, Money and Postal Order, Savings Bank, or Express Delivery (Service No. 1, p. 332) business is transacted. In London all but thirty-five offices are closed. These thirty-five open in the morning (twenty-six of them, including those on p. 299, except the N.W. District Office, also in the evening) to sell stamps and send telegrams. About ninety suburban stations, chiefly S.E. and S.W., send telegrams at train times (*see* also p. 336). There is no delivery of letters (except of telephone express letters, as well as, from G.P.O., of express letters fully prepaid, marked with one thick vertical line and the words "Express Delivery on Sunday"); nor any general collection till midnight. Letters, etc., with extra 4d. stamp, posted in special boxes at certain offices before times varying from 5 to 6 p.m. (some cases before 4 a.m.), or at any great railway terminus before 6 p.m. (later if at the appropriate terminus), leave by the usual night mails. Letters may be registered at these offices up to 5 min. of latest time of posting; or with 1s. fee at the Sorting Carriage on the mail train at the appropriate terminus, at times varying between 8.10 and 9.25 p.m. Parcels are neither delivered nor accepted on Sunday in any part of the U.K. In the Provinces all Head Offices and most Sub-offices open from 8.30–10 a.m. for stamps, telegrams, registering letters (Scotland 9–10 a.m.). Many railway stations send telegrams at train times. There is only one delivery of letters (in most Scottish towns, and the smaller English and Irish villages, none); any one may prevent even this so far as relates to himself, but letters can be obtained at most Head Offices. CHRISTMAS DAY and GOOD FRIDAY.—In London there is the usual morning delivery of letters and parcels. When Christmas Day falls on a Sunday, parcels and express letters only are distributed. The G.P.O. and Eversholt Street Offices open from 5–7 p.m. stamps, registered letters; also certain Telegraph Offices stamps, telegraph $\frac{1}{2}$ 337 telegrams, registered letters. Express letters are not accepted for delivery under Service 1, but may be posted in Pillar Boxes (p. 345), and parcels are not collected. **The Provinces:** In Scotland business is as on weekdays, in England and Ireland as Sundays, but with one morning delivery of letters and parcels, even if Christmas be a Sunday. **Other Public and Bank Holidays.**—**London:** One morning delivery of letters and parcels. Collection of letters, evening and midnight; of parcels, morning only. G.P.O. and Head District Offices (p. 299) open for all business except Savings Bank, Old Age Pensions, and ordinary Money Order business. **The Provinces:** In England and Ireland the chief town and country offices and sub-offices, if also telegraph delivery offices, generally open as usual, except for Savings Bank, Postal, and Money Order business. The smaller offices of all kinds open either only in the morning or not at all. In Scotland the same holds good, but on New Year's Day no Money Order, etc., business is done, and hours are as Sunday. Throughout the U.K. there is only one letter and parcel delivery; in Scotland also on SACRAMENTAL FAST DAYS and Holidays fixed by Local Authorities.

§ The deferred rate (abbrev. "d.") system applies to places and rates marked thus.

PUBLICANS, Annual Licences, for Spirits, Beer, and Wine, to be consumed on the premises: a Duty equal to half the annual value of the premises, subject to a minimum of from £5 to £35, according to population of district. There is an option to pay in proportion to the annual "compensation value" in certain cases of large public-houses and "seasonal" hotels. (Hotels and Restaurants): Duty charged according to proportion that receipts from intoxicating liquors bear to total receipts, or, optionally, 25% of the "annual licence value"; subject in either case to a minimum charge. (Clubs): an Excise Duty of 6d. in the £ on their purchases of intoxicating liquors, but no Licence Duty.

Publicans keeping their premises closed the whole of Sunday, or closing one hour sooner than otherwise required on week-days, pay only six-sevenths of the above duty; and keeping closed on Sunday, and also closing one hour earlier each day through the week, only five-sevenths of the above duty.

A reduction of duty is also allowed in certain cases where the hours of sale are curtailed by war restrictions.

INVENTORY DUTY, <i>see</i> ESTATE DUTY.	
LAND TAX.—The quota payable by each Parish, as fixed in the year 1798 (less the amount redeemed), is raised by an equal pound rate, the rate of Assessment not to exceed 1s. in the £. Where the income of the owner of the land (when not a body of persons, corporate or incorporate) does not exceed £160 he is exempt from payment of land tax, and if the owner's income does not exceed £400 one-half of the tax is remitted, but he must claim this relief before payment of the tax.	
LAND VALUES DUTIES:—	
(I.) INCREMENT VALUE DUTY: payable on the occasion (a) of any transfer or sale of land or any interest therein, (b) of any lease for more than 14 years, (c) of the land, or interest in it, passing on death. (d) In the case of Corporations, in addition to (a) and (b), and in place of (c), the duty is payable in 1914 and every 15 years thereafter.	
Rate of duty [payable as a stamp duty by (a) the seller, (b) the lessor, (c) the deceased's estate, or (d) the Corporation]: £1 for every £5 of "increment value," i.e., the increase in the value of the site—apart from the value of buildings, &c., thereon—since April 30, 1909, or since the last payment of duty.	
Exemptions, &c.—Agricultural land, while it has no higher value than for agricultural purposes only.—Small residences occupied by the owner, or holder of lease of 50 years, where annual value does not exceed £40 in London, £26 in towns of 50,000 population, and £16 elsewhere.—Small agricultural holdings, where land and dwelling do not exceed £30 annual value, occupied and cultivated by the owner, and not exceeding 50 acres (of average value not exceeding £75 an acre).—Recreation grounds owned by corporate and other bodies, without view of profit, are not liable to the periodical charge (d).—Flats (transfer, lease, &c., of separate dwelling).—Ten per cent. of increment allowed free on first and on any subsequent occasion, but such allowances not to amount to more than 25 per cent. in any period of five years.—Allowance is made where Reversion Duty has been paid for the same benefit or increment.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909.—Minerals not so exempt are subject to a special basis of charge to Increment Value Duty, as an annual duty.	
(II.) REVERSION DUTY: payable by the lessor on the determination of a lease.	
Rate of Duty: £1 for every £10 of the value of the benefit accruing to the lessor.	

Exemptions, &c.—Reversions purchased before April 30, 1909, under leases which determine within 40 years of purchase.—Leases of agricultural land.—Leases the original term of which did not exceed 21 years.—Allowance made where fresh lease is granted before expiration of original lease, $2\frac{1}{2}$ per cent. of duty for each unexpired year, up to 50 per cent. of whole duty.—Allowance is made where Increment Value Duty has been paid for the same benefit or increment.—Mining leases are not charged.

(III.) **UNDEVELOPED LAND DUTY**: payable by the owner (including a lessee for a term of 50 years or more) of any land which has not been developed by the erection of dwelling-houses or buildings for the purpose of any trade, &c., other than agriculture (but including glass-houses or greenhouses as trade buildings), or is not otherwise used *bond-fide* for any trade, &c., other than agriculture.

Rate of Duty: One halfpenny annually for every £1 of the "site value," i.e., the market value of the fee simple of the land if divested of buildings, timber, &c., and less the value of any minerals.

Exemptions, &c.—Land the site value of which does not exceed £50 an acre.—Agricultural land, except on such part of the site value as exceeds its agricultural value.—Parks and spaces open to the public as of right, or to which the public are allowed reasonable access.—Recreation grounds, used as such under agreements for not less than 5 years.—Land not exceeding 1 acre occupied with a dwelling-house.—Garden (with a dwelling-house) up to 5 acres, when site value of the whole does not exceed 20 times its annual value.—Agricultural land held under an existing agreement, not chargeable until agreement terminates.—Agricultural land occupied and cultivated by the owner, if all land owned by him does not exceed £500 in value.—Allowance is made where Increment Value Duty has been paid in respect of undeveloped land.

(IV.) **MINERAL RIGHTS DUTY**: payable in respect of the rental value of all rights to work minerals and of all mineral wayleaves.

Rate of Duty [payable by the proprietor where he works the minerals, or, in any other case, by the immediate lessor of the working lessee]: 1s. 6d. annually for each £1 of rental value.

EXCESS MINERAL RIGHTS DUTY: payable in addition to Mineral Rights Duty, where the amount payable as rent varies according to the price of the minerals, and exceeds the pre-war rent.

A duty equal to 80 per cent. of the excess.

Exemptions, &c.—Common clay, common brick clay, common brick earth, sand, chalk, limestone, and gravel are not charged.—*Reversion Duty* is not charged on the determination, nor *Increment Duty* on the grant, of a mining lease.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909, are exempt from *Increment Value Duty*, and minerals not so exempt are charged to that Duty on a special basis in the form of an annual duty.

***LEASES**:—Lease or tack of any dwelling-house or part thereof for any definite term not exceeding a year at a rent not exceeding £10 per annum, &c.; for any definite term less than a year of any furnished dwelling-house or apartments

where the rent for such term exceeds £25, 5s.; of any lands, tenements, &c., at a yearly rent:—

Excd.	Not Excd.	Not exceeding 35 years.	Between 35 years and 100.	Exceeding 100 years.

100, for £50, or fractional part of £50.—0 10 0 ... 3 0 0 ... 6 0 0
Lease of any kind not specially charged 1 0 0
Agreement for lease not exceeding 35 years, same as actual lease.

* Section 15 of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money, stock, or security (other than rent), the amount or value of which does not exceed £500, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rent exceeds £500, duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of any property," &c.

The Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent, and that rent exceeds £20 a year.

LEGACY AND SUCCESSION DUTIES:—Also see "Estate Duty."

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, see note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100 (16 & 17 Vict. c. 51, s. 18).

Rates of duties payable on legacies, annuities, and residues, and of Succession Duties where deceased died before 1st July, 1883, or where Estate Duty, Finance Act, 1894, is payable.

To Husband or Wife or Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see above)

£1 per cent.

Exceptions.—Estates not exceeding £15,000.—Legacies and successions of less than £1,000 (£2,000 in the case of widow or child under the age of 21 of deceased), whatever may be value of whole estate.

To Brothers and Sisters of the Deceased, or their Descendants £5 per cent.

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants £10 per cent.

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants £10 per cent.

To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased £10 per cent.

Where deceased died on or after 1 July, 1883, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1%, 4%, 6%, 7%, and 11% respectively.

The Husband or Wife is chargeable with Estate Duty and Legacy and Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same; persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

Schedule A : Lands, Tenements, &c. *See above*

Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief is given in certain cases in respect of Income Tax under Sch. A to the extent of either $\frac{1}{4}$ or $\frac{1}{6}$ part of the assessment (*57 & 58 Vict. c. 35*).

† Special rates of tax and scales of allowances are applicable to the official pay of persons who have served during the year as members of any of the naval, military or air forces of the Crown, or in a state of a naval or military character in connexion with the present war, for which payment is made out of money provided by Parliament, or in any war abroad of the British Red Cross Society or the St. John Ambulance Association, or any body with similar objects.

Also in the case of persons serving during the year for not less than three months as master or member of the crew of any ship or fishing boat.

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance and management, may be claimed in addition. This special allowance does not apply to houses of annual value exceeding £12. Five years' average taken.

Schedule B: Nurseries & Markt. Gardens
In respect of the Occupation of Farms, &c., on twice the Annual Value; or (by special request, if made before 5th June (5th August in Scotland) in the current income-tax year) on profits of husbandry, as in case of Trades, under Schedule D.

Schedule C: Dividends or Annuities from public revenue (Government Stocks, &c.)

Schedule D: Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.

See above.

† **Exemption and Abatements.**

Income not exceeding £130 Exempt.

Excd.	Not Excd.		
£130	£400	Abatement of	£120
400	600	"	100
600	700	"	70

When the total joint income of a husband and wife does not exceed £500, a wife can separate her claim for exemption or abatement from that of her husband on account of profits derived from any business carried on by means of her own personal labour (60 & 61 Vict. c. 24, s. 5), provided the husband is assessable under Sch. D, and that his income is unconnected with the business of the wife. Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent, or annual value. (Finance Act, 1907, s. 28, and Finance Act, 1918, s. 28).

ALLOWANCE FOR CHILDREN may be claimed by persons whose total incomes do not exceed £800. Persons whose incomes exceed £800, but do not exceed £1,000, may claim relief for the number of children exceeding two. £25 to be free of tax in respect of each child under 16 years old.

RESIDENTS ABROAD.—No exemption or other relief dependent on total income is given to persons not residing in the United Kingdom. **Exceptions:** present or former servants of the Crown, widows in receipt of pensions granted in consideration of the employment of their late husbands in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons residing abroad for their health.

Spoiled Stamps.

ALL applications for allowance must be made within two years from the time of spoilage of unexecuted instruments, or within two years of the date or of the first execution of others.

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3; Saturday, 10 to 1. At Telegraph Street, E.C. (sea policy and general spoiled stamps), from 11 to 3 on Wednesday and Friday.

Deeds Stamped after Execution.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution :—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY :

Agreements under hand only, liable to the duty of 6d. — Agreements for letting furnished houses for less than a year, if in the form of letters and correspondence only.—Appraisements.—Attested copies,—within 14 days of first execution.

Foreign sea policies, within 10 days of arrival in U.K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO DUTY :—

Articles of clerkship.

Bills of exchange upon stamps of sufficient amount but of improper denomination.

Charter-parties. Receipts, within certain limits of time.—*Vide* Table of Penalties.

Contract notes.

Letters of Allotment and Renunciation. Scrip certificates.

Share warrants. Warrants for goods.

Policies of insurance, other than Marine policies.

INSTRUMENTS WHICH CANNOT LEGALLY BE STAMPED AFTER EXECUTION :—

Bills of exchange (except as before mentioned).—Bills of lading.

Marine policies executed in the United Kingdom. Proxies and Voting Papers (except those first executed abroad, which may now be stamped within 30 days after first receipt in U.K.).

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10s. or less 1/4d.

On goods pledged for more than 10s. 1d.

For INTEREST on pledges not exceeding 40s., for every 2s. or part of 2s., per month..... 1/4d.

And after the first month any time not exceeding 14 days to be charged as half a month.

On pledges exceeding 40s., for every half-crown or part of half a crown, per month 1/2d.

FORFEITURE.—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10s., if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—i.e., the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a

magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one halfpenny; when the loan is above 5s., one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s., provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge :—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10s.

BIRTHS, MARRIAGES, DEATHS, WILLS, AND OTHER USEFUL INFORMATION.

BIRTHS.

WHEN a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees, amounting to ten shillings. No birth occurring in England and Wales can be registered after the lapse of seven years from the date thereof. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

DEATHS

When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar

by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees amounting to ten shillings.

CORONERS' INQUESTS.—Sudden deaths are supposed by the law to demand inquiry, and Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which

the death took place. Any person summoned as a witness is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting *jurymen* being £5. In the case of sudden or suspicious death in Scotland, the Lord Advocate may order a public inquiry to be held in the manner prescribed by the Fatal Accidents Inquiry (Scotland) Act, 1895, as altered by an amending Act passed in 1906.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions. [See also Vaccination Order, 1907.]

MARRIAGE BY Banns OR LICENCE.

Banns of Marriage.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force (see also 6 & 7 Will. IV. c. 85, and 1 Vict. c. 22). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the

case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Midgeley v. Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the Ecclesiastical parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 353). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service.

Marriage with a deceased wife's sister—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another minister.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is *2s. 6d.*, and a stamp duty of *1d.* Searches in the register-books may be made on payment of small fees, viz., *1s.* for a single year, and *6d.* additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and *5s.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knight-riding Street, Doctors' Commons, E.C., are available for London and all England and Wales; those procured at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 1), are available for London and all England and Wales, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, *10s. 6d.* No previous notice is required, and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from *£1 15s.* to *£2 12s. 6d.* By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knight-riding Street, Doctors' Commons, E.C. 1 (tel., 6834 Central). Fees for licence stamp, &c., *£25.*

MARRIAGE BEFORE A REGISTRAR AND IN NONCONFORMIST BUILDINGS.

Marriages can take place in a District Registrar Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a registrar office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE) FOR MARRIAGE.

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

ISSUE OF CERTIFICATE AND LICENCE FOR MARRIAGE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

(1) *Marriage by Certificate* :—

- a. If both parties live in the same district :—The certificate of the Superintendent Registrar of that district.
- b. If they live in different districts :—A certificate from the Superintendent Registrar of each district.

(2) *Marriage by Licence* :—The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows :—

a. Section 24 of 19 & 20 Vict. cap. 119, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given.

b. The Act 3 and 4 Vict. cap. 72, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Guillet v. Guillet*, 27 T.L.R. 476).

MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows :—
“I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.”; and each of the parties must say to the other, “I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband].” A wedding-ring may be, and is generally, used at a marriage at a register office.

MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an “authorised person” (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar’s attendance must be obtained.

The parties must at some time during the ceremony make the following declarations :—

“I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.”

Also each of the parties must say to the other :—

“I call upon these persons here present to

witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]” ; or, in lieu thereof :—

“I, A. B., do take thee, C. D., to be my wedded wife [or husband].”

Rules and Regulations relating to this Act were published in October, 1909. (See *Statutory Rules and Orders*, 1909, No. 1332.)

NAVAL MARRIAGES ACT, 1908.

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer, seaman, or marine borne on the books of one of His Majesty’s ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays; he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

FEES.

For entering notice of a marriage by certificate in the marriage notice-book	s. d.
For entering notice of a marriage by licence in the marriage notice-book.....	1 0
For a certificate for marriage without licence.....	1 0
For a certificate for marriage by licence	1 0
For a licence for marriage	30 0
Stamp duty on a licence for marriage.....	10 0
For a marriage by certificate in the presence of a Registrar	5 0
For a marriage by licence in the presence of a Registrar	10 0

Exclusive of the fee for a certificate of the marriage (marriage lines), the total fees for a marriage by certificate, when the parties live in the same district, amount to 7s. ; if they live in different districts, to 9s.

For a marriage by licence the total fees are £2 12s. 0d.

CERTIFICATES OF BIRTHS, DEATHS, OR MARRIAGES.

Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3s. 7d., viz., 1s. for search, 2s. 6d. for the certificate, and 1d. for the stamp affixed thereto. They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place. For the certificate of a birth in Scotland, application should be made to the Registrar-General in Edinburgh.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament :

Friendly Societies Act, 1896, Birth or Death, 18.; Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6d.; Savings Banks Act, 1887, Birth, Death, or Marriage, 18.; National Insurance Acts, 1911 and 1913, Birth, 6d., Marriage, 18.; Industrial Assurance Companies Act, 1896, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 18., but only from the local Registrar.

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act, 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907. The marriage of a woman with her deceased husband's brother is still illegal, and the Act forbids the marriage of a man with the sister of his divorced wife during the wife's lifetime.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed June 27, 1892; came into force Jan. 1, 1893. Order in Council dated Nov. 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

- (a) That both the parties are British subjects; or,
- (b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,
- (c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,
- (d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

- (a) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,
- (b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or,
- (c) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above-named Act.

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner as if the party so

resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and *b*) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

- (a) That he or she believes that there is no impediment.
- (b) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 18, 1892, and are payable to His Majesty's Govt.:-

For receiving notice of an intended marriage.....	£ s. d.
For receiving notice of a caveat.....	0 10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him.....	1 0 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place.....	0 10 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same.....	0 5 0
Marriages may be solemnized 8 a.m. to 3 p.m.	1 0 0

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid v. Braid*, 1909, 25 F.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892, before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

Act of 1906. — Under the *Marriage with Foreigners Act, 1906*, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (re *Green Noyes v. Pitkin*, 1909, 25 T.L.R. 222).

MARRIAGES IN SCOTLAND.

The marriage laws of Scotland are peculiar among those of all nations for the latitude allowed the contracting parties, and, beyond requiring proof of present consent, the utter absence of direction as to celebration. No religious ceremony is obligatory, although the intervention of the Church is recognised, and is usual in practice. That the parties give their free and serious consent is the only requisite. Males over fourteen and females over twelve may contract marriage without consent of their parents or guardians.

Marriages are of two kinds: (1) Those solemnized by a minister after (a) banns, or (b) publication of notice by the Registrar, called Regular Marriages; and (2) those celebrated without the assistance of a clergyman, called Irregular Marriages.

On Banns.—The proclamation of banns in Scotland has been customary authentically since 1242, and is probably of greater antiquity. It is regulated chiefly by the Acts of Assembly of the Church of Scotland. One of the parties must have resided in the parish where the banns are to be proclaimed for the space of fifteen clear days immediately preceding the proclamation in the parish church. The banns are proclaimed in the parish church on two separate Sundays during service, but it is customary to complete the publication by proclamation at two services on the same Sunday. Where the parties reside in different parishes, the proclamation is made in both. There is no provision for cases where one of the parties resides in England, but it is usual to accept an English certificate. Application for proclamation of banns is made to the session clerk of the parish church. A certificate of residence signed by two householders is usually required to accompany the application. The fee for banns is 2s. 6d.

The certificate of publication of banns is authority to a clergyman of any denomination to celebrate the marriage. After the lapse of three months the banns are useless. The marriage must take place in presence of at least two witnesses capable of giving evidence. It need not be celebrated in a church, but may be in a dwelling-house or elsewhere, and at any hour; the time and place is a matter of absolute indifference to the law. After the marriage a schedule, signed by the parties, the clergyman, and two witnesses, must be transmitted to the registrar within three days, under penalties. Clergymen do not charge fees.

After Notice by Registrar.—This procedure is regulated by the Marriage Notice (Scotland) Act, 1878. Both parties must have resided in Scotland for at least fifteen days prior to publication of the notice. Application is made to the registrar, who publicly exhibits the notice of the intended marriage for seven days. At the expiry of this period, unless written objections have been filed, the registrar issues a certificate of publication, which is equivalent in effect to banns. The fee is 1s. 6d. Roman Catholics avail themselves of this method exclusively.

Irregular Marriages.—By declaration or acknowledgment. One of the parties must have

resided in Scotland for twenty-one days immediately preceding. The parties, being capable of marriage and without legal impediment, may express either verbally or in writing, in presence of two witnesses (to whom the parties are known) capable of giving evidence, their mutual consent to take each other then and there for husband and wife. This act constitutes marriage. Registration is not essential to the validity of the marriage. If, however, it is desired to register the marriage, application is made to the sheriff of the county where it has been contracted. It is advisable to employ a solicitor to conduct the matter. The fees are £1 5s. A copy of the entry in the register duly signed by the registrar is sufficient proof of the marriage.

DIVORCE FOR THE POOR.

An unhappy outcome of the war, revealed by Police and Divorce Court records, is the large number of cases of infidelity on the part of wives of soldiers while their husbands have been fighting in the trenches or away from home on duty. While the symptom has been observed among all classes of the community, the cases of the breaking-up of poor households that have been brought to notice have been so frequent that the matter has drawn wider attention to the question of cheap divorce. That facilities are in existence to assist persons with small resources to obtain relief in the Divorce Court is not generally known. A special department, where free legal advice can be obtained, and solicitor and counsel provided for husband or wife who has a case for divorce but who is not possessed of the means of proceeding in the ordinary way, was set up at the Royal Courts of Justice some four years ago, its official style being that of "London Prescribed Officers (Poor Persons)," with Mr. Adrian Hassard-Short as Secretary.

Although no fees are payable for the help given by the department, the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings do not cost more than £10, and can be completed for as little as £6, compared with from £50 to £60 necessitated by the normal procedure. Before a case is taken up, the applicant has to satisfy the department that he or she is really poor—not possessed of more than £50, exclusive of wearing apparel and trade tools, and not earning more than £3 a week. If this condition is fulfilled, a *prima facie* case for divorce must be shown, the names and addresses must be supplied of two persons, other than witnesses or near relatives, to whom reference may be made as to the applicant's character and means, and a declaration must be made as to means. When the system was initiated, it was proposed that a fund should be created for the payment of out-of-pocket expenses, the money to be provided either by the State or by private benevolence. The suggestion has again come into prominence with the increased demand for help to secure the severance of unhappy unions; while another method of reducing the cost that has secured favour is to make divorce cases triable at Assizes, on the lines of the Royal Commission's recommendation.

Partly through ignorance of the work of the

Poor Persons' Department, cases in which petitioners sue *in forma pauperis* have comparatively seldom been before the judges of the Divorce Court, but the number of suits is expected to show a large increase owing to the war. In the first six months of 1917 the appeals for assistance received at the High Court totalled 24,000, and of this number over 500 were granted and the cases taken up for hearing. As a result of the attention called to the facilities by a metropolitan magistrate, over 300 applications were made to the department in two days, the majority of the applicants being soldiers who complained that their wives had been unfaithful during their absence.

ILLEGITIMACY.

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. A new Act will come into force on Jan. 1, 1919, providing that the putative father may be ordered to pay 10s. a week, instead of 5s. as hitherto. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

BRITISH NATIONALITY AND NATURALIZATION.

The following is an abstract of the British Nationality and Status of Aliens Act, 1914, which comes into force on Jan. 1, 1915, and which consolidates and amends the common law and the statute law previously existing on the subject of British Nationality and Naturalization:—

BRITISH NATIONALITY.—The following are British subjects:—

1. Every person born, of whatever parentage, within His Majesty's Dominions and allegiance.
2. Every person born out of His Majesty's Dominions whose father was born within His Majesty's Dominions, and had not, at the time of the child's birth, lost the British nationality so acquired. As to the children of naturalized British subjects, see below at (7).
3. Every person born out of His Majesty's Dominions, before Jan. 1, 1915, whose father's father was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.
4. Every person born on board a British ship.
- 5.* Every person to whom a Certificate of Naturalization under the Naturalization Act, 1870, or the British Nationality and Status of Aliens Act, 1914, or of Re-Admission to British Nationality has been granted, or who has ac-

quired British nationality by special Act of Parliament or by conquest or annexation.

6. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

7. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions:—

- (a) in the case of a child born before January 1st, 1915,
 - (i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or
 - (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.
- (b) in the case of a child born after January 1, 1915,
 - (i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or
 - (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

LOSS OF BRITISH NATIONALITY.—A British subject loses his British nationality:—

- (a) if by any voluntary or formal act he becomes naturalized in a foreign country;
- (b) if, in certain cases, he makes a declaration of alienage. These cases are:—
 - (i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship and is also by birth or becomes during minority a subject of any foreign State,
 - (ii) where a person is a British subject, but was born out of His Majesty's Dominions, and
 - (iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been naturalized as a British subject may divest himself of that status;
- (c) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality;
- (d) in the case of a woman, if she marries an alien;

(N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)

- (e) in the case of a person to whom a Certificate of Naturalization is granted after January 1, 1915, if the Secretary of State revokes the Certificate;
- (f) if the territory of which he is an inhabitant is severed from the Crown; cf., e.g., the cases of the inhabitants of Hanover and Heligoland.

* See "Acquisition of British Nationality" below.

ACQUISITION OF BRITISH NATIONALITY.—An alien may acquire British nationality:—

- (a) by special Act of Parliament;
- (b) by the conquest, annexation, or cession of the territory of which he is an inhabitant;
- (c) in the case of a woman, by marriage with a British subject, and
- (d) by naturalization.

Naturalization.—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after Jan. 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

- (a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;
- (b) be of good character and have an adequate knowledge of the English language; and
- (c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £3, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application is not returnable, whether or not a Certificate is granted.

N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate lingue*, but are triable in the same manner as if they were natural-born subjects.

UNDESIRABLE ALIENS.—An undesirable alien—e.g., one who is without means, or who is a lunatic, or an idiot, or who has been guilty in

another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be “undesirable” within the meaning of the Aliens Act, 1905.

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on 22 Dec., 1916. Section 1 requires registration, irrespective of nationality, by—

(a) Every firm in the United Kingdom carrying on business under a business name which contains any addition to the surnames of the partners other than their Christian names or the initials thereof;

(b) Every individual in the United Kingdom carrying on business under a business name which contains any addition to his surname other than his Christian names or the initials thereof;

(c) Every individual firm who, or a member of which, has changed his name, except in the case of a woman in consequence of marriage.

The exception in (c) is inserted in order to exempt from registration a married woman trading in her married surname. A married woman trading in her maiden surname is required to register under Section 1 (b).

Section 2 requires registration by a firm, individual, or corporation carrying on business wholly or mainly as nominee or trustee for other persons, or acting as general agent for a foreign firm.

Provisions to these sections make registration unnecessary (1) where the addition to the surname indicates succession to a former owner; (2) where an “s” is added to the surname in a case where the partners bear the same surname; and (3) where the business is carried on by an official appointed by any court.

Addresses of Registrars.

England and Wales—39, Russell Square, W.C. 1.
Scotland—Exchequer Chambers, Parliament Square, Edinburgh.

Ireland—Coleraine House, Dublin.

Forms of application for registration can be obtained at these addresses. The fee for registration is 5s., which is paid by affixing a 5s. stamp (to be obtained at a post office) to the form of application.

Section 18 states that any individual or firm required to register by the Act must show, on trade catalogues, trade circulars, show cards, and business letters,

(a) in the case of an individual, his present Christian name or the initials thereof and present surname, any former Christian name or surname, his nationality if not British, and, if his nationality is not his nationality of origin, his nationality of origin; and

(b) in the case of a firm, the present Christian name or the initials thereof and present surnames, any former Christian names and surnames, and the nationality if not British, and, if the nationality is not the nationality of origin, the nationality of origin of all the partners in the firm, or in the case of a corporation being a partner, the corporate name.

In order to keep the Register up to date Section 6 requires that any change that may occur in the particulars registered shall be notified to the Registrar within 14 days of the occurrence of such change. The Board of Trade have power,

however, to extend the period in which the notification should be made.

Section 13 provides that if any registered individual or firm ceases to carry on business, the individual (or if he is dead his personal representative) or the remaining partners, must notify the Registrar of such cessation within three months.

After an application for registration, or a notification of change has been registered, a certificate is issued, which by Section 11 must be exhibited in a conspicuous position at the principal place of business.

The forms registered are filed, and can be inspected, or certified copies thereof can be obtained, on payment of the prescribed fees.

The fees payable under the Act are—

- (a) on registration, 5s. ;
- (b) on statement of change, 2s. 6d. ;
- (c) for inspection of a registered form, 6d. ;
- (d) for certificate of registration other than the first, 2s. ;
- (e) for a certified copy of a registered form, 6d. for a folio of 72 words.

The Act imposes severe penalties for failure to comply with its provisions, and puts defaulters under serious disabilities as regards enforcing their rights under any contracts made during the default.

Among other matters in the Interpretation Clause (Section 22) the following are important :—

“Business” includes profession.

Reference to a change of name does not apply in the case of a British-born subject if the change was made before the attainment of the age of 18.

A “foreign firm” is one whose principal place of business is situated outside His Majesty’s Dominions.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the January 1, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets 2s. 6d. for every case in his private practice and 1s. for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers: typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Govern-

ment Board. In some districts the following have been declared infectious: measles, röteln or German measles, whooping cough, chicken-pox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—
